

MEMORANDUM

Date: July 3, 2017
To: Transfer 81636
From: Dennis Dunn
Re: Review & Evaluation of Sufficiency of Information

This transfer proposes to correct the point of diversion for water right 25-7038. The SRBA partial decree described the POD in the SESWNW of Section 29. The well is actually located in the NESWNW of Section 29. Transfer proposes to drop the 10-acre tract designation (SWNW of Section 29). Transfer also proposes to drill a new well in the same QQ to serve as a back-up well for the subdivision and satisfy IDEQ requirements.

Authority to File: The Highway Estates Water Users are the owners of record by decree. The company owns the ground at the existing and proposed well site.

Water Right Validity: The water right has been in continuous use since development.

Injury to Other Water Rights: None

Enlargement of Use: There is no enlargement of the right. Although a second well is being drilled, the subdivision will still be limited to the 0.2 cfs and 22.8 af.

Local Public interest: This transfer provides an additional well should the current well be unable to provide water for the homes attached to it.

Beneficial Use/Conservation of Water Resources: No issues identified.

Effect on Economy the Local Area: NA

Effect on Agricultural Base of the Local Area: NA

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
