RE: Water Right Permit No. 85-7225

Dear Permit Holder(s):

The Idaho Department of Water Resources (Department) is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit.

I recently performed a field examination on your property and determined that certain elements of the permit has been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

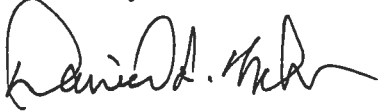

The application for permit you submitted and the permit approved by the Department allowed a place of use in SE $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 17 in Township 36 North, Range 1 East for irrigation of 20 acres, irrigation storage, irrigation from storage, domestic, fire protection, and fire protection storage.

I found during my field visit that none of the water from Little Canyon Creek is being used for domestic purposes, so that use was removed. I also discovered that place of use for that you divert water from the pond for fire protection from storage, so I added that use on to the amendment of permit. I determined that actual place of use for all of the uses straddled the 40 acre tract line, so all of the uses are in both the SW $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 16 in Township 36 North, Range 1 East and SE $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 17 in Township 36 North, Range 1 East. The enclosed amendment form and maps show the corrected places of use. An amendment of permit will be needed to move forward with the licensing of this permit.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when issued. Please review the amendment form carefully. If you concur with the information presented, please sign and return the form with the \$100.00 filing fee within 14 days or by July 20, 2017. If we do not receive the amendment of permit form back from you, we will be forced to void the permit, since no water was developed at the point of diversion or place of use described in the application for permit or the approved permit.

If you have any questions, please don't hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Daniel A. Nelson".
