The watering practices on the Stowell property are an annual event. We also have live stock graze annually as we as cut the hay annually.

I sent you an e mail earlier today but am now realizing the info is not sufficient.

Those pictures were taken the first part of May. We are watering from the well and we water about 3-4 hrs a day with hand lines of about 3 to four large rain birds. Then Mr Ryan Danzie comes and cuts the hay around last part of June and bails it for his horses. The part you see being watered and the part where the cows are is located east of the house. And covers the North and South boundaries of the property.

Hopefully this info helps you.

Thanks

Todd,

Thanks for the quick response, and for providing the pictures showing sprinkling and stock use. The department needs more explanation as to what exactly the photos are showing (such as descriptions of what part of the property the photos are representing in relation to the home), a detailed version of the water diversion system (hand lines wheel lines, pump, generator, etc.), exact dates of water use and the length of time irrigation occurred, etc. These details can be provided in a simple letter, so we can better understand the extent of water use for the property involved in the transfer. The more details the better.

Thanks for your diligence,

Scott Stosich

Thank you for the reminder. I have these pictures of us using the land.

In response to our phone conversation earlier this morning. We water that West End of the house quite regularly throughout the summer months . We try to keep it as green as possible to eliminate any fire hazards number one. Number 2 there has been a few livestock graze on that in the past as well as a few horses. We also have had a neighbor who comes and cuts the hay for his horses. We water that area approximately once a week with hand lines to keep the area green and free from higher fire hazard however some summer months it is difficult to keep up with it because of hot windy weather.

But for the most part we water it as regularly as we can on average once a week.

Todd,

I am following up per our conversation about proof of use for water right 25-10609. I haven't received any of the additional information from you in order to proceed with the transfer.

Please let me know if it was sent so I can look into where those photos/evidence might be located. If you have any questions, let me know.

Thanks,

Scott Stosich

Todd,

As discussed over the phone, I will add the domestic portion of water right 25-10609 to the transfer application. The department will also need to see evidence of irrigation use in the western portion of the place of use, i.e. an affidavit discussing specifics about irrigation system, time of use (dates will be helpful), what the water was used for, and any other resources to assist in making sure the place of use has indeed been irrigated.

If you have any questions, please call or email any time.

Thanks,

Scott Stosich
