RE: Water Right Permit# 65-23582

Mr. Appleby,

The Squaw Creek Irrigation District is responding to a letter from Idaho Department of Water Resources where you are attempting to apply (application for Permit 65-23582) for water rights, proposing to divert waste water for irrigation storage.

The Squaw Creek Irrigation District board has determined there is no waste water available for the additional storage for which you are requesting. All storage water from Sagehen Reservoir was allocated in 1938, when the original dam was built. Therefore, no written consent will be provided from the Squaw Creek Irrigation District.

If you have any questions please direct those questions to Chairman, Harry McCaulou - 208.584.3546 or call Deborah L Carlock-Newton, Secretary to schedule a meeting with the Squaw Creek Irrigation District Board - 208.859.6331

Sincerely yours,

Squaw Creek Irrigation District;

Re: Application for Permit 65-23582

Dear Applicant:

You recently filed a water right application with the Idaho Department of Water Resources (IDWR) proposing to divert waste water for irrigation storage, irrigation from storage and recreation storage. IDWR must determine if the water you wish to appropriate is waste water available for appropriation or whether it is "live" water under control of an irrigation delivery organization to satisfy downstream users. The irrigation organization(s) in your area appears to be Squaw Creek Irrigation District.

The waste water status in your area can be determined by providing written consent from the correct irrigation delivery organization confirming if the water does not remain under its control for other users. Also, please provide written confirmation of a right-of-way to use the waste ditch or waste drain if that conveyance is owned by the organization or by some other person or entity.

In regards to the quantity being applied for, please make the following changes:

- Cross out the 2.5 af storage volume for the irrigation storage and irrigation from storage use and replace it with a 19.0 af volume (17.5 af irrigation volume + 1.5 seepage and evaporation).
- Cross out the 2.5 af recreation storage and replace with 4.0 af (2.5 af capacity + 1.5 af seepage and evaporation).
- Cross out the 2.5 af notation in item #5 and replace with a total quantity of 19.0 af.

Please provide the requested information within sixty (60) days. You may request up to six months additional time if necessary. The application will be voided without a timely written response. Refunds are not issued for voided applications.

IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please contact me at 208-334-2190 if you have any questions. Thank you for your attention to these matters.
