Transfer Attachment 8a

Per approved transfer No. 80626, the City has 19 water rights appurtenant to the Twenty Mile South Farm (TMSF) that, when combined, authorize irrigation of 3,653 acres within a 4,225-acre PPU. Currently 150 of those acres are in the Bank under water right 63-7755B (Lease Contract No. 391). Seven of those 150 acres, located in the NENE, S25, T1N, R1E, are requested for transfer to allow the associated consumptive water be used for processing (dampening) compost at the City's new compost facility to be located within their TMSF irrigation PPU. A rental application is being submitted to allow water to be used for the compost facility while the transfer is being processed. Once the transfer is approved, the City will submit a new lease application for 143 acres to account for transfer and use of the 7 acres.

Water right 63-7755B was decreed in 2009. The 7 acres proposed for transfer were leased to the Water Bank in 2015, thereby protecting them from forfeiture since the date of the decree. Historical irrigation use on the 7 acres is also evidenced on the attached 2011 aerial. As confirmed in the attached email statement from Ben Nydegger, TMSF Manager, Alfalfa is one of the crops that has been historically grown on the 7 acres. Based on area ET Idaho data shown below, consumptive water appurtenant to 7 acres of alfalfa will provide 21.96 afa (equivalent to 7,155,666 gpy) for industrial use at the City's proposed compost facility, which is sufficient for the planned operation. Although the right allows a 275-day irrigation season of use (3/1 - 11/30), the consumptive use volume proposed for transfer is based on a 260-day irrigation season of use (3/1 - 11/15), which ET Idaho uses for the alfalfa growing season at this location.

**APPLICATION FOR TRANSFER OF WATER RIGHT
ATTACHMENT WSB:
TRANSFERRING WATER RIGHTS LEASED TO THE WATER SUPPLY BANK**

Approval of a transfer application will not impact the terms of a Water Supply Bank Lease Contract. Any transferred water right or portion of a water right that is leased to the Water Supply Bank (Bank) shall remain unused while the lease is active.

If the transfer proposes to relocate the place of use of an irrigation water right, and the relocated acres include land currently idled due to a Bank lease contract, the applicant is required to identify the areas that will be idled at the new place of use for the duration of the lease contract. The acres to be idled should be clearly identified on the map created for Attachment 7B of the transfer application. The applicant should confirm the map is attached when completing the table below. If the leased portion of the place of use is not proposed to be relocated, a map is not required.

A Bank lease contract shall remain in effect until it expires, a new lease proposal is processed to replace it, or the water right is released from the Bank through written confirmation issued by the Water Resource Board. If the proposed transfer is approved, the water right owner will be provided sufficient time to allow the lease contract to expire before beneficial use of water at the new place of use will be expected. Meanwhile, water rights leased to the Bank are protected from forfeiture for the duration of the lease contract.

Water right owners who would like to adjust the terms of their lease contracts can either submit a new lease proposal on an [Application to Lease a Water Right to the Water Supply Bank](#) form, or they can request early termination of their lease contracts by completing a [Request to Release a Water Right from the Water Supply Bank](#) form. If a water right is leased to the Bank, and it is currently being rented from the Bank, the lease cannot be reduced or terminated until the rental agreement concludes. A request to release a water right or to submit a new lease application should be sent to the Department's state office. To find out if there are any rentals associated with a leased water right, please call a Bank representative at the Department at 208-287-4800.

In the table below, please provide the requested information for any water right that is both proposed for transfer and leased to the Bank. The information needed to complete this table can be found in your Bank lease contract. A copy of your lease contract can be obtained using the 'Search Water Rights' option on the Department's internet page at www.idwr.idaho.gov or by contacting any Department office.

MEMORANDUM

Date: June 12, 2017
To: Transfer 81638
From: Clay Webster
Re: Review & Evaluation of Sufficiency of Information

This application proposes to transfer the consumptive portion of 7 acres of irrigation to industrial use to dampen compost at the city's new composting facility located within their Twenty Mile South Farm.

This change of nature of use will reduce the irrigatable acres by 7 acres. Since this right has combined limits with other rights, a review was needed to avoid an enlargement (see comments under water right validity). They will be idleing the 7 acre pivot corner in the NENE of S25 T01N R01E. The right will be reduced 9.5 af due to a change in nature of use (see comments under enlargement of use).

Authority to File:

The department received this application from SPF Water Engineering on behalf of the City of Boise on April 12, 2017. The application was signed by James Pardy. He is listed on the City of Boise website as the City Engineer.

Water Right Validity:

Water right 63-7755B was decreed in 2009. The right was then transferred to irrigate within a PPU in 2009. An unused portion of this right was placed in the WSB to protect it from forfeiture in 2015 and another unused portion was put on an extension of time to avoid forfeiture in 2017. The evaluation found that the unused portion had not been used within the PPU with the other set of stacked water rights, and therefore could be accepted into the bank. The transferred portion will come from what was placed into the WSB.

This transferred portion of this right will need to be put to beneficial use upon completion of the transfer to avoid forfeiture concerns.

Injury to Other Water Rights:

This transfer will not authorize any additional diversion of water. It is a change in nature of use which will reduce the amount of water being diverted during the irrigation season. No other injury concerns are noted.

Enlargement of Use:

This transfer proposes a change in nature of use. The consumptive proportion of the transferred 7 acres of irrigation will only be allowed to be transferred to the new industrial use. The consultant provided that one of the crops grown was alfalfa. She also provided ET Idaho data that showed the consupitive use for alfalfa is 3.137 af/acre in attachment 8a.

$4.84 \text{ cfs} / 286.0 \text{ acres} \times 7.0 \text{ acres} = 0.12 \text{ cfs}$ to be transferred

$1287.0 \text{ af} / 286.0 \text{ acres} \times 7.0 \text{ acres} = 31.5 \text{ af}$ to be transferred

$7 \times 3.137 = 21.96 \text{ af}$ is the amount available for the new use. The consultant has provided documentation showing that 21.96 af is the applicant's requirement for a year round season. This will be rounded to 22.0 af to stay within data entry standards. I have no other enlargement concerns.

Local Public interest:

This facility will allow the City of Boise residents to send compostable material to a separate facility and reduce the landfill requirement of the city. There are no apparent issues identified and the application will be advertised for public comment.

Beneficial Use/Conservation of Water Resources:

The transfer appears consistent with the conservation of water resources in Idaho.

Effect on Economy the Local Area:

No effects are anticipated.

Effect on Agricultural Base of the Local Area:

The proposal will dry up 7 acres of agricultural farm land. This will be changed to industrial use for a composting facility. The composting material could then be used for fertilizer. Minimal effects are anticipated to the agricultural base.
