Narrative:

Permit 65-22754 authorized the diversion of 0.04 cfs from an unnamed stream for domestic use in the NE 1/4 of the SE 1/4 of Section 4, Township 08 North, Range 08 East. The total diversion rate is less than 0.24 cfs, qualifying this permit for an in-office field examination. The in-office exam was completed on 1/20/17 by WRA Cody Parker.

The permit states that the point of diversion and place of use are located within Lot 3, Blk 1, Enchanted Valley Subdivision. The name on the taxlot information matches the name on the Permit. Therefore, I can conclude that the POU and POD falls within the bounds of the land owned by the permit holder. The taxlot falls within the NE 1/4 of the SE 1/4 of Section 4, Township 08 North, Range 08 East, which matches the description for the POU and POD on the permit.

The diversion rate I have recommended is 0.02 cfs. I decided to go with 0.02 cfs as it is the BU Standard for an irrigation right for 1/2 acres of irrigation, rather than the standard 0.04 cfs for single-home domestic. I went this way because the right was developed as irrigation only with no structure on the property for in-home use. I have also recommended an annual volume of 1.5 af which allows for up to 1/2-acre of irrigation use. From a phone call with the permit holder, I determined that there was no in-home use under this right, so no additional volume is suggested for it.

There is no POD overlap for this water right. However, there is POU overlap with right no. 65-11340A, which is a community water system diverting from Archie Creek to the east. A combined use limit was specified on the permit stating that the use of this right and right 65-11340A should not exceed a combined diversion rate of 0.04 cfs for the domestic use on this taxlot. This condition should be retained on the license to prevent the right holder from using multiple water rights to provide additional water for domestic use. It does not appear that the right holder is using water from the community system at this time.

RE: Permit to Appropriate Water No. 65-22754

Notice of Pending Order to Void Permit

Dear Mr. Dixon,

I am writing to you today concerning water right permit No. 65-22754, which authorizes the diversion of 0.04 cfs from an unnamed stream for domestic use in the NE ¼ of the SE ¼ of Section 4, Township 8 North, Range 8 East, B.M., Boise County. The Idaho Department of Water Resources (IDWR) received your Proof of Beneficial Use for this permit on May 21, 2008. The next step in the water allocation process is to complete a field examination to determine the extent to which you have developed the water use proposed in your application, and authorized on your permit. On January 19, 2017, I began an in-office field exam for this permit.

To complete the field exam and move forward with licensing this water right I must determine if you have developed the domestic use listed on your permit. I cannot determine from the aerial imagery if there is a structure on the property that receives diverted water for domestic use. I need you to submit proof that such a structure exists. The Department will accept as proof any photos of the building or copies of paperwork that link the building to the address of the place of use.

Your written response can be sent to the address provided in the letterhead above, or emailed to me at cody.parker@idwr.idaho.gov. Please call me at 208-334-2190 with any questions or concerns that you may have. I look forward to a timely response from you within thirty (30) days of the date listed at the top of this letter. If I do not hear from you within thirty (30) days, I will assume you no longer have any interest in establishing a water right, and I will take action to void the permit. Thank you for your attention to these matters.

Respectfully,

Cody Parker
Water Resource Agent
