On June 4, 2017 John Leedom, the long-time Watermaster for the area in which my permitted use is located, visited my property at my request. During that visit he viewed the 1 acre portion of my property irrigated under the permit. He also inspected the electric water pump, the pump power supply and the location of the entry of the pump foot into Lake Fork Creek, all as described in my application. His inspection showed that the irrigation system was as described in the application and was complete and functional. I advised Mr. Leedom that the system has been used to deliver water regularly to the 1 acre permitted use during the 2017 irrigation season. The system continues to deliver irrigation water to the property as needed.

Mr. Leedom stated that he saw no need for a lock on the pump. He advised me to invite a representative of the Board to call him if there are any questions about his inspection and waiver of the Permit's lock requirement. His phone number is 208-634-9672.

PROOF ACKNOWLEDGEMENT LETTER

RE: Permit No. 65-23655

Dear Permit Holder(s):

The Department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the Department to conduct a field examination to determine and confirm the use being made of the water.

During my review of your proof and water right permit, I found that condition no. 5 of this permit states:
"Prior to diversion of water under this right, the right holder shall install a lockable device, subject to the approval of the Department, in a manner that will provide the watermaster suitable control of the diversion."

I recommend that this condition be complied with immediately and prior to the field examination. Enclosed is a copy of this permit for your information. If you feel this requirement is unnecessary you may request in writing to the Department that the requirement be waived. Additionally, you must contact the watermaster about his need for this requirement. If he agrees that the lockable device requirement is unnecessary, request that he/she provide the Department with written agreement that the requirement can be waived at this time. Upon receipt of your request and his acknowledgement the Department will issue an order waiving the requirement at this time.

Please be advised that Section 42-248, Idaho Code, requires you or the owner of this water right to maintain current ownership and address records on file with the Department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any Department office or at the Department's website at www.idwr.idaho.gov.

If you have any questions concerning the field examination, please contact the Western Region Office of the Department located in Boise at (208) 334-2190.

Sincerely,

Darla Block
