Mary Sloan,

The statutory claim 74-16097 is a Notice of Diversion as an Alternative to Instream Stockwater Use. This notice is to allow diversion of water from the stream to a trough away from the stream & riparian area as described in 42-113 Idaho Code. The stockwater use existed in the stream, but has been unrecorded. The notice substitutes for filing a statutory claim described in 42-243 Idaho Code.

This notice does not require advertisement, but you may submit any comments you wish to be filed with the notice. I have attached a copy of the database report regarding the submitted water use & the pertinent statutes to this email for your reference.

The notice form & the acknowledgment letter are scanned & available from our website now. I know your concern was control of the water after it has been diverted. Idaho Code 42-113(a)(i) & (ii) requires the delivery system to be enclosed & a control mechanism or means for returning unused water to the stream as described on the notice.

Please advise me if you need any further information on this notice.
