

MEMORANDUM

Date: March 22, 2017
To: Water Right File 51-7368
From: rsommer
Re: Comment/Analysis

On March 17, 2017 the applicant amended the application to clarify ground water as the source and not an unnamed drain. The applicant explained the property historically saturated with ground water. Ditches were constructed to collect the water for the benefit of domestic and stockwater uses and to prevent damage to the property. The amendments to the application were made for clarification purposes. Because enlargements were not made to the application the priority date will not be advanced.
