Re: Thorpe Family Trust, Application #63-34335

Basis of Protest

1. The application seeks a significant amount of water without a meaningful analysis or recognition of the potential impacts to established uses and rights of adjoining property owners.
2. The application seeks large volumes of water, for both diversion and storage, for a period of use when the Dixie Slough runs a very low volume, roughly 20cfs. The applicant and/or IDWR must address how water will be allocated in this time period and during shortages, particularly in light of the need for scouring and other aspect of the proper functioning of the Slough.
3. The asserted "wildlife and recreation" purposes seem to describe a duck hunting site. The large volume of water and surface area of land to be covered should raise a concern over whether some form of commercial venture is contemplated.
