RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
4. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
5. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
6. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date. This rental for mitigation by non-use may be ineffective if the mitigating water right is not in priority.
7. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
8. Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.
9. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
10. This rental agreement does not authorize the construction of a well.

11. Use of water under this rental will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 120.
12. This rental does not grant any right-of-way or easement across the land of another.
13. Rights 35-8605A and 35-7836 are also diverted through point of diversion described above.

Is this application being submitted with a lease application as a lease/rental package?

Yes ☐ No ☒

If yes, specify companion water rights in Section 4

This application must be completed according to the minimum requirement checklist below. This checklist is part of the rental application and must be included with the rental application. Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.

Rental applications should be submitted well in advance of the desired start date for the use of rental water. Rental applications may be processed as early as November 1 of the year prior to the intended use of rental water. Any rental application received on or before November 1 for use in the next year will be assigned a received date of November 1. Rental applications submitted more than one year in advance of the proposed start date for the use of rental water will not be accepted and will be returned to applicants. Rental applications may be returned to applicants if the desired start date for the use of rental water cannot be accommodated by the Water Supply Bank. Rental requests will not be accepted once the rental season of use period has concluded.

One rental application per beneficial use of water. For multiple beneficial uses of water, separate rental requests should be submitted for each unique beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources.

For additional instructions on completing a rental application, visit the Bank's website at http://idwr.idaho.gov/water_supply_bank.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request. For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
35-13995	Irrigation	0.18		14.7		0.11	36	8.9
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	0.11	36	8.9
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it Attachment 4B:

N/A

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it Attachment 4C:

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: On March 13, 2017 TJ Budge submitted two rental applications on behalf of Heritage Farms LLC. The two applications requested water for 19.5 acres and 8.9 acres. On January 27, 2017, the Department sent a letter to Heritage Farms LLC concerning unauthorized water use, action E2017-1109. The letter identified 8.9 acres. This rental is intended to cover those acres.

Heritage Farms LLC does not own the land at the point of diversion. However, the rental will share the POD with right 35-8605A which also belongs to Heritage Farms.

AUTHORITY TO FILE: Mr. Budge signed the application. The documents that accompanied the application included a special power of attorney for water rights appointing the law firm of Racien Olson Nye Budge and Bailey to manage water right transactions on behalf of the applicant.

WATER RIGHT VALIDITY: The lease for 35-14040 proposed to put the entire right into the Bank. Parent right 37-7448 was decreed in 2002. Part of 35-7448 was placed in the CREP program and the other portion in the Bank. Transfer 74094 split 35-7448 into 35-13702 and 35-13703. A change of ownership split 35-13702 into 35-14040 and 35-14041. Forfeiture is not an issue.

Right 35-14308: 51.4 acres are leased into the Bank through December 2019. The parent of this right was decreed in 2004. This right was split from the parent right by transfer and has been in the Bank since 2006. This right is limited to 208 acre within 6,154.0 acres. The water right holder is required to submit a 206 map every year prior to the irrigation season to the Department. Last season 48.1 acres were in the Bank and the remaining acres were irrigated. Forfeiture is not an issue.

INJURY TO OTHER WATER RIGHTS: The rights proposed under this rental are all within the ESPA. The ESPA transfer tool found that no mitigation is required. (see attachment)

ENLARGEMENT OF USE: A review of the water right place of use found that the acres have not been irrigated during past few years. The season of use and headgate requirement are the same for the lease and rental points of diversion. There is no enlargement anticipated through this rental.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest. Both the lease and rental points of diversion fall within the ESPA Ground Water Management Area.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: James Cefalo did not have concerns about this rental.

RE: Unauthorized Water Use - E2017-1109

To whom it may concern:

During a recent review of water rights in Power County, the Idaho Department of Water Resources (IDWR) discovered that approximately 8.9 acres of your property located in the SE ¼, T07S, R29E, Section 15 are being irrigated without a valid water right. Enclosed are maps outlining the 8.9 acres in question. According to IDWR records, no irrigation water rights are associated with the acres highlighted in yellow.

Diversion of water without a valid water right is unlawful pursuant to Idaho Code § 42-351. **You are hereby instructed to cease and desist the irrigation of the 8.9 acres located in the SE ¼, T07S, R29E, Section 15 as outlined on the enclosed maps. Irrigation of these acres may not occur in the 2017 irrigation season, or future seasons, until a valid water right has been obtained or identified.**

Please notify me if believe there is a valid water right associated with the property, or if you feel my analysis in error. If my analysis is correct, please contact me within 14 days of receiving this letter to discuss ways to address the unauthorized water use. Pending your response to this letter, IDWR will determine whether to issue a formal Notice of Violation and commence an administrative enforcement action that may include civil penalties and mitigation requirements for the irrigation taking place in 2016.

Sincerely,

Cass Jones
