STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT
To appropriate the public waters of the State of Idaho

1. Name of applicant(s) Idaho Department of Fish and Game Phone 208-287-2842
Name connector (check one): ☐ and ☐ or ☐ and/or
Mailing address 600 S. Walnut, PO Box 25 City Boise
State Idaho ZIP 83707 Email zach.kirk@idfg.idaho.gov
2. Name of representative, if any Zach Kirk, PE, IDFG Phone 208-287-2842
Mailing address 600 S. Walnut, PO Box 25 City Boise
State ID ZIP 83707 Email zach.kirk@idfg.idaho.gov
- a. ☒ Send all correspondence for this application to the representative and not to the applicant OR
☐ Send original correspondence to the applicant and copies to the representative.
- b. ☐ The representative may submit information for the applicant but is not authorized to sign for the applicant OR
☒ The representative is authorized to sign for the applicant. Attach a Power of Attorney or other documentation.
3. Source of water supply Redfish Lake Creek which is a tributary of Salmon River
4. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
10N	13E	35		NW		SW	Custer	Redfish Lake Creek	See Exhibits A and B

5. Water will be used for the following purposes:
- Amount 1.5 cfs for ESA Listed-Fish Propagation purposes from Jan 1 to Dec 31 (both dates inclusive)
(cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
6. Total quantity to be appropriated is (a) 1.5 cubic feet per second (cfs) and/or (b) _____ acre-feet per year (af).
7. Proposed diverting works: SEE Exhibits C, D & E
- a. Describe type and size of devices used to divert water from the source. Water shall be diverted by using a 4'-4" wide opening in the concrete holding pool with aluminum stop logs. Operating as a 4'-4" broad crested weir.
- b. Height of storage dam NA feet; active reservoir capacity NA acre-feet; total reservoir capacity NA acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 12. For dams 10 feet or more in height AND having a storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ No
- c. Proposed well diameter is NA inches; proposed depth of well is NA feet.
- d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ No
- e. If well is already drilled, when? NA; drilling firm NA; well was drilled for (well owner) NA; Drilling Permit No. NA

For Department Use
Received by VL Date 4/5/17 Preliminary check by _____
Fee \$ 290- Received by 5-4-17 Receipt No. BTL0640 Date 5/4/17

8. Description of proposed uses (if irrigation only, go to item 9):

- Hydropower; show total feet of head and proposed capacity in kW. NA
- Stockwatering; list number and kind of livestock. NA
- Municipal; must complete and attach the Municipal Water Right Application Checklist.
- Domestic; show number of households NA
- Other; describe fully. Generally the IDWR use category is fish propagation for ESA listed Sockeye Salmon. However, specifically the use is pass through water to fill a holding tank to hold adult Sockeye Salmon.

9. Description of place of use:

- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
10N	13E	35										H							

Total number of acres to be irrigated: NA

10. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? NA

11. a. Who owns the property at the point of diversion? The United States Forest Service

b. Who owns the land to be irrigated or place of use? NA

c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: The Idaho Department of Fish and Game has a special use permit from the Forest Service. See attached

12. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. The 1.5 cfs is required for the adult holding pool at the Redfish Collection Facility for proper function of the facility in order to accomplish the goal of ESA listed fish species propagation. An adult holding pool is required to hold adult sockeye salmon (potentially 400 fish a day returning) for research and spawning activities.

SEE Exhibits C, D & E

13. Time required for completion of works and application of water to proposed beneficial use is 2 years (minimum 1 year).

14. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map or maps clearly identifying the proposed point of diversion, place of use, section #, township & range. The map scale shall not be less than two (2) inches equal to one (1) mile.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

RE: Application For Permit No. 71-10973

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the **CHALLIS MESSENGER** on **6/1/2017** and **6/8/2017**. Protests to this application may be submitted for a period ending ten (10) days after the second publication. Any protest against this application must be filed with the Department of Water Resources, together with a protest fee of \$25.00 for each application, on or before **June 19, 2017**.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the application.

Sincerely,

Denise Maline
Administrative Assistant

Hi Morgan,

Attached is a cover letter and an application for permit within your district, currently being processed. Please review the information and provide any necessary comments within 21 days.

Please feel free to contact our office if you have any questions regarding this application.

Thank you,

Denise

RE: Application For Permit No. 71-10973

Dear Morgan:

A copy of the above referenced application is enclosed. Please review the application, then complete the enclosed recommendation form as necessary, and return it to this office within 21 days of the date of this letter.

If the application is approved, IDWR will include appropriate standard conditions of approval for a water right located within a water district, such as regulation by the watermaster, lockable controlling works, and/or measuring devices. Any special conditions or other concerns you have related to this application should be specifically addressed in your recommendation.

IDWR's regional offices can finish reviewing an unprotested application as soon as the protest period has past. Your prompt response to this request will ensure that your recommendation can be considered. If IDWR has not received your written recommendation within 21 days from the date of this letter, IDWR will presume that you do not oppose approval of the application and that you have no comments for IDWR to consider.

Sincerely,

Denise Maline
Administrative Assistant

To: Clark, Cynthia (Bridge)
Subject: Application for permit in Wild & Scenic Basin 71

Just a heads up, I'm currently processing an application for permit (71-10973) in basin 71 for IDF&G that has been submitted for advertising next week.

The following will be advertised:

Application for permit proposes the appropriation of water from Redfish Lake Creek for uses associated with fish propagation to provide non-consumptive pass through water for use in a holding tank for adult sockeye salmon. Proposed point of diversion and place of use are located approximately 4.7 miles south and 1.2 miles east of Stanley. The decreed minimum stream flow rights for the federal Wild & Scenic Rivers are subordinate to certain categories of water use and to specific amounts of water use established after the minimum stream flow. The water use proposed in this application will benefit from the subordination provision because it is for non-consumptive purposes.

If you have any questions, let me know.

Thanks,
Bill Mills

Subject: RE: Permit Application for Holding Tank on Redfish Lake Creek

Mr. Kirk,

Please find the Department's letter regarding upper Salmon River water right applications attached (I will be mailing it today). Typically, the Department holds applications for 30 days after mailing the letter before processing the application(s) to give applicants time to respond or withdraw their applications. I had assumed, in error, that we could proceed with advertising immediately because this permit application contributes to the efforts to recover the ESA listed species in the upper Salmon River. However, if you respond by email indicating that we should continue with processing the application, I can proceed with advertising as indicated in the previous email. Otherwise, I will have to hold the application for 30 days to comply with Department guidelines for processing applications in the Upper Salmon River basin.

My apologies for any inconvenience,

Sincerely,

Bill Mills

RE: Applications to Appropriate Water in the Upper Salmon River Basin

Dear Water Right Applicant:

The Department of Water Resources' (IDWR) records show you filed applications to establish new uses of water in the upper Salmon River basin. Idaho Code § 42-203A(5) requires IDWR to determine whether each water right application satisfies all the criteria necessary for appropriating water in Idaho. One statutory criterion requires IDWR to determine the local public interest relative to the proposed water use. Idaho Code § 42-202B(3) defines the local public interest as "the interests that the people in the area directly affected by a proposed water use have in the effects of such use on the public water resource." The local public interest has many facets, including the effects of a proposed water use on aquatic habitat for fish and wildlife resources.

The upper Salmon River basin is home to stocks of chinook salmon, sockeye salmon, steelhead trout, and bull trout, all of which are listed as threatened or endangered under the Endangered Species Act (ESA). Since the early 1990s, local water users, conservation districts, and federal and state agencies have cooperated to implement conservation measures intended to protect and restore habitat for ESA-listed species in the upper Salmon River watershed. For example, at the request of local water users the Idaho Legislature directed the Idaho Water Resource Board (IWRB) to establish a minimum stream flow in the lower Lemhi River for fish passage. The minimum stream flow is maintained through a water supply bank and temporary or permanent acquisition of additional water supplies by willing buyers from willing sellers.

Pursuant to the Snake River Water Rights Agreement of 2004, Idaho has been developing a long term conservation plan for the benefit of ESA-listed species in the Lemhi River basin. Improving conditions in flow-limited river reaches and streams is a fundamental component of the Lemhi plan. In addition to IDWR, numerous state agencies, including the Office of Species Conservation, Idaho Department of Fish and Game, Idaho Department of Environmental Quality, Idaho Soil and Water Conservation Commission, and Idaho Department of Lands, have committed and continue to commit significant resources toward this objective under the following programs:

- Columbia Basin Water Transactions Program
- National Marine Fisheries Service Pacific Coastal Salmon Recovery Fund
- U. S. Fish & Wildlife Service Aquatic Species Conservation Fund
- Salmon and Clearwater River Basins Habitat Fund
- 2008 Columbia Basin Fish Accords

Letter to Idaho Fish & Game RE: Upper Salmon River Basin Water Right Applicants
May 22, 2017
Page 2

A myriad of habitat restoration projects are being constructed/implemented in other parts of the upper Salmon River basin. These projects have been coordinated with the local communities and water users through the Upper Salmon River Basin Watershed Program and predecessor programs, including the model watersheds. Furthermore, the Snake River Water Rights Agreement of 2004 contemplates the development of additional conservation plans for other upper Salmon River basin watersheds. Accordingly, the draft Comprehensive State Water Plan under revision by the IWRB contains policies for the Salmon River basin that focus on the protection and restoration of instream habitat for ESA-listed species through voluntary participation in conservation programs.

Because of the ESA-listed species recovery efforts in the upper Salmon River basin, IDWR must determine on a case-by-case basis whether it is in the local public interest to authorize proposed water uses that would further deplete flow-limited stream reaches.

Pursuant to Rule 40.04.c of the Water Appropriation Rules (IDAPA 37.03.08.040.04.c), the applicant has the ultimate burden of persuasion regarding the items that must be evaluated in connection with each water right application. Before proceeding further with your applications, IDWR requests you submit additional information about how your proposal invokes any local public interest concerns for ESA species recovery. Within 30 days, please submit any additional information you believe IDWR may need to evaluate and determine the local public interest in the water you propose to divert and use. If IDWR has not received a response from you within 30 days, IDWR will assume you have no comment regarding the local public interest, and processing of your application will resume with the information currently on file. Processing will include public notice and the potential for formal protests by other interested parties. Applications that are not in the local public interest will be denied. If you wish to withdraw your applications before they are processed, please notify IDWR in writing.

If you have any questions, please call Shelley Keen at 208-287-4947, or email him at shelley.keen@idwr.idaho.gov. For applications in administrative basins 73-75, you may also contact IDWR's Eastern Region office in Idaho Falls at 208-525-7161. For applications in administrative basins 71 or 72, you may also contact IDWR's Southern Region office in Twin Falls at 208-736-3033.

Sincerely,

Bill Mills
