Re: Assignment of Permit for Water Permit No. 63-33882 (Split into 63-33882 and 63-34385)

Dear Water Right Holder(s):

The Department acknowledges the receipt of correspondence changing ownership of the above referenced water permit to you. The Department has modified its records to reflect the change in ownership and has enclosed a computer-generated report for your records.

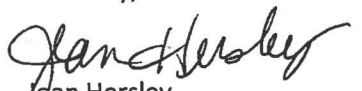

As requested on the Assignment of Permit, the original permit was divided into two parts. When a portion of the original water permit has been conveyed to another and the original permit has been split, then the original number remains the same and a new number is issued to the new portion. Each split contains only the portion of the original right for each separate owner. Enclosed is a copy of this new water right for your records. Please refer to this number when corresponding with our office.

Your portion of this water permit has a specified point of diversion, nature of use and place of use. If you plan on changing the nature of use, place of use, or point of diversion under this permit, including adding a new point of diversion, then an Amendment of Permit on your portion of this right is required. Please contact this office for further information on the Amendment of Permit form or you can find the forms at www.idwr.idaho.gov. If you do not plan on changing any items on your water right, then no further action is required at this time.

Also, the Department has enclosed computer-generated reports for water rights 63-34303 through 63-34312 that are appurtenant to property Nicholson Properties LP recently acquired from Anderson Enterprises. An error was found in the total number of acres. This was corrected and is reflected on the new water right reports enclosed.

Thank you again for your patience and cooperation. If you have any questions concerning the enclosed information, please feel free to contact this office.

Sincerely,

Jean Hersley
Technical Records Specialist I
