3. The Director of the Idaho Department of Water Resources has reviewed the application for compliance with the Water Supply Bank rules and has approved the Lease subject to conditions listed below.

NOW, THEREFORE, in consideration of the mutual covenants and contracts herein contained, and other good and valuable consideration, the receipt of which is hereby acknowledged, the parties hereto agree as follows:

1. **WATER RIGHTS:** The Lessor shall lease and the Board shall accept into the Bank the Applicant's water rights described as follows:

1. The water rights referenced above will be rented from the bank at the current rental rate.
2. There is no rental payment to the lessor of the water right if the right or a part thereof is not rented from the bank.
3. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. 8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.

10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the lands above.
13. This right may only be rented for use as a supplemental right in conjunction with a primary surface water right.

Ms. Hersley,

I am responding to your letter of May 1, 2017 regarding Aberdeen-Springfield Canal Company water delivery to property currently owned by Jeffery and Chana Duffin located in Township 06S, Range 31E, Sect. 20, SWNE, SENE, SENW (scanned copy attached).

Typically we do not release delivery information without the shareholder's consent. However, in this instance I can provide some general information to your. The short answer to your question is yes, we have provided water to this Parcel.

Our records show that Aberdeen-Springfield Canal Company shares have been appurtenant to these lands since December 19, 1919. Water delivery to this and adjacent parcels has been provided via the Company's Head Gates M-56-5, M-57-8 and our 'N lateral spill ditch' (if you look carefully at the Basin35.sid layer for the SRBA you can see the ditches). I believe Mr. Duffin accomplished some work in the spill ditch (replaced old pump with new pump and intake) for that property within the last five years, and improvements were made in the Spring of 2016. As this spill ditch often has spill flow, shareholders need to order water only when there is no spill water present. What's more, water intentionally let into this ditch for delivery is often charged to another head gate owned by the recipient to facilitate delivery recording, as seems to be the case for this parcel. Consequently I cannot provide daily delivery records for this parcel. However, I see that one of Mr. Duffin's other head gates shows an increase of 80 miner's inches over normal for a week in July of 2016 (which would correspond to the amount I suspect is necessary to deliver 55 miner's inches to the pump in the N lateral spill, and would also correspond to a period of little or no operational spill at N lateral).

I note in my calendar that I performed some calculations to determine the necessary size of a pond to provide 55 miner's inches continuously to the pump for 24 hours (our minimum pond-size requirement) and subsequently inspected the system improvements (widening and deepening the ditch) in March of 2016. I again inspected the pond banks in May and July and noted the pump was running.

Let me know if you have other questions.

RE: Water Delivery for Duffin

Dear Water Provider:

The Department of Water Resources is inquiring about the water use of Jeffrey Duffin. Mr. Duffin owns and irrigates land with a ground water source located in Township 06S, Range 31E, Section 20, SWNE, SENE and SENW. Has Aberdeen Springfield Canal Co. ever provided water to Mr. Duffin for irrigation at this location?

The Department has applications for different processes with conflicting information on them. We are trying to clarify what water is being used.

Please respond to within 30 days by sending the information to the address above, email to jean.hersley@idwr.idaho.gov or faxing to (208) 287-6700, attention: Jean.

If you have any questions, please contact me at (208) 287-4942. Thank you.

Sincerely,

Jean Hersley
