4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request. For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

*Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.

B. Attach a separate page if space is insufficient and label it Attachment 4B:

N/A

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

**RE: APPLICATION TO RENT WATER FROM THE WATER SUPPLY BANK
WATER RIGHT NOS. 35-7777 and 35-14308**

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of \$3,593.80 was calculated based on the current rental rate of \$17.00 per acre-foot times a diversion volume of 382.4 acre-feet. An annual payment shall be received by the Department prior to the execution of this agreement and prior to January 1 in all subsequent years for the duration of the rental period. The agreement will be void if payment is not received prior to the due date in a given year. If you would like to terminate the agreement prior to the end of the rental period, you must submit written notice of your intent to the Department at least 30 days prior to the rental fee due date.

Please send a check for \$3,593.80 made payable to the Idaho Department of Water Resources, **together with the signed rental agreement, within 14 days** so I can complete processing. The full fee for the rental of the above-described rights is \$3,593.80 per year for 2017 and \$4,228.00 for 2018. The rental fee includes an administrative fee of \$650.08 per year for years 2017 and \$764.80 for 2018. Note that the renter is obligated to pay only the administrative fees associated with the water right 35-7777.

MEMORANDUM FOR APPLICATION 370

To: Water Rights 35-7777 and 35-14308
From: Clay Webster
Date: 4/17/2017
Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: The department received this application (370) to rent 1.58 cfs and 382.4 af to irrigate the rest of the pivot for application 383 in the SWSE & SESE of section 19 Twp 06S Rng 29E and a portion of the partial pivot on application 369 located in the NWNE SWNE and SENE of section 19 Twp 06S Rng 29E. Water rights 35-7632A, 35-14442 & 35-14443 are the rights that irrigate the rest of this pivot. These applications came in from Brockway Engineering for Lance Funk.

The department also received rental application 383 with the lease for 35-2391 and 35-7789 from Brockway Engineering on 2/14/2017 for Lance Funk. It proposes to rent 1.55 cfs and 309.6 af to irrigate a partial pivot in located in the NWSE NESE & SWSE of section 19 Twp 06S Rng 29E.

We also received rental application 369 with a lease application for WR 35-2391, 35-7777 and 35-14040. This application was to rent 1.48 cfs and 316.0 af to irrigate 79 acres in a partial pivot located in the SWNE of section 19 Twp 06S Rng 29E and a partial pivot located in the NWNE of section 30 Twp 06S Rng 29E.

On 28 March the department requested information on enlargement issues with the requested water rights being comingled with 35-7632A, 35-14442 and 35-14443, which were the rights that completed the southern pivot. The department received an amendment to this application changing one of the water rights on 30 March.

AUTHORITY TO FILE: This application was signed by Lance Funk. He is currently listed as the owner on current taxlot data.

WATER RIGHT VALIDITY: 35-7777 was decreed in 2002 and is being leased into the bank from 2017 through 2020. 35-14308 was decreed in 2004 and leased to the bank from 2017 through 2019.

INJURY TO OTHER WATER RIGHTS: The move has been modeled by the consultant and though they used the wrong to cell and the wrong from cells for 35-7777 and 35-14308, I ran the model with the correct data and verified that no mitigation is required.

ENLARGEMENT OF USE: 35-7777 has combined limits with 35-2391, however they are all additive and these rights were leased to the bank separately. In order to prevent enlargement of the southern pivot, that portion of the rental will have to be limited to 0.01 cfs per acre. I have no other enlargement concerns.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The location for the rental PD is subject to Water District # 120. Comments have been requested from the Regional Office and watermaster.

Clay,

In regards to Rental 370. I have proposed to not rent water from 35-14040. I am proposing to rent 47.5 acres of water right 35-7777 instead. I have attached a scanned copy of Page 3 and page 4 of the Rental application along with the ESPA modeling to support the change.

Clay,

The rental of irrigation water from water right 35-7618 will only divert water from the well located in the SWNW of Section 20 of 06S 29E. 369

The rental of irrigation water from water rights 35-14040 and 35-14308 will be diverted from the well located in the SWNW of Section 20 of 06S 29E and the well located in the NENE of Section 30 06S 29E. 370

The pivot located in the NE ¼ of Section 19 will be irrigated by the Rental 369 ($25.5+25.5+0.1+0.1=51.2$ acres) and 79.0 acres rented from 35-7621. The 51.2 acres will have 0.95 cfs and the 79.0 acres will have 1.54 cfs for a total of 2.49 cfs to be applied on 130.0 acres. Which means that there will be an application rate of 0.019 cfs/acre ($2.49/130.0$). The 0.019 cfs/acres is more than adequate to provide a sufficient diversion rate for this pivot. 369

I had not considered the cfs/acre for water right 35-14040 as an issue because for the past several years of renting water right 35-14040. This discussion was not touched on or discussed by IDWR. It was not an issue that prevented this water right to be rented multiple times for the full 47.5 acres. I am currently working on scenarios that would eliminate the issues that you are now raising.

RESPONSE DEADLINE

April 11, 2017

RE: ADDITIONAL INFORMATION REQUEST FOR PROCESSING APPLICATIONS 369, 383 and 370 TO RENT WATER FROM THE WATER SUPPLY BANK

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Mr. Sullivan:

The Department of Water Resources ("Department") acknowledges receipt of your Applications to Rent Water from the Water Supply Bank ("Bank"). A preliminary review of your application has been completed and it has been determined that additional information is required to continue processing the applications for Lance Funk located in sections 19 and 30 of Township 06S Range 29E.

Please provide the following information within 14 days of the date of this letter or the application will be returned:

- Clarification of the Point(s) of Diversion requested on these applications (see maps provided)
- How the partial pivot located in SWNE and SENE of Twp 06S 29E section 19 could possibly operate on 0.95 cfs?
- How your client would prevent enlargement of 35-7632A, 35-14442 and 35-14443, which currently operate with 0.01 cfs per acre, when you add rights 35-7618 and 14308, which operate at 0.02 cfs per acre. Simply by combining the two disproportionate sets of rights into the same system provides an expectation of enlargement of use of the higher rate rented rights being spread to acres under the existing portion of the pivot and allowing a more consumptive crop to be grown.
- How your client would prevent enlargement of 35-14040 (0.01 cfs/acre) while renting with 35-2391(0.02 cfs /acre), 35-7789 (0.02 cfs /acre) and 35-14308 (0.02 cfs/acre) to irrigate a pivot? This is the same enlargement issue noted above.

Please provide the required information within 14 calendar days. If sufficient information is not received within 14 days, your application will be returned to you unprocessed.

Sincerely,

Clay Webster
Water Resource Agent Sr.
