4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request. For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
35-2391	Irrigation	3.44	688	172.0		1.18	236	59
35-7789	Irrigation	4.68	936	234.0		0.37	73.6	18.4
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	1.55 CFS	309.6 AF	77.4 AC

*Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it Attachment 4B:

N/A

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it Attachment 4C:

**RE: APPLICATION TO RENT WATER FROM THE WATER SUPPLY BANK
WATER RIGHT NOS. 35-2391 and 35-7789**

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

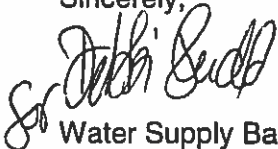

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of \$1,652.40 was calculated based on the current rental rate of \$17.00 per acre-foot times a diversion volume of 309.6 acre-feet. An annual payment shall be received by the Department prior to the execution of this agreement and prior to January 1 in all subsequent years for the duration of the rental period. The agreement will be void if payment is not received prior to the due date in a given year. If you would like to terminate the agreement prior to the end of the rental period, you must submit written notice of your intent to the Department at least 30 days prior to the rental fee due date.

Please send a check for \$1,652.40 made payable to the Idaho Department of Water Resources, together with the signed rental agreement, within 14 days so I can complete processing. MEMORANDUM FOR APPLICATION 383

To: Water Rights 35-2391 & 35-7789

From: Clay Webster

Date: 3/24/2017

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: The department received rental application 383 with the lease for 35-2391 from Brockway Engineering on 2/14/2017 for Lance Funk. It proposes to rent 1.55 cfs and 309.6 af to irrigate a partial pivot in located in the NWSE, NESE, & SWSE of Sec 19 Twp 06S Rge 29E.

We also received rental application 369 with a lease application for WR 35-7618. This application was to rent 1.48 cfs and 316.0 af to irrigate 79 acres in a partial pivot located in the SWNE of Sec 19 Twp 06S Rng 29E and a partial pivot located in the NWNE of Sec 30 Twp 06S Rng 29E.

We also received rental application 370 with applications to lease WRs 35-14040 and 35-14308 into the bank. This application is to rent 1.58 cfs and 382.4 af to irrigate the rest of the pivot for application 383 in the SWSE & SESE of Sec 19 Twp 06S Rng 29E and a portion of the partial pivot on application 369 located in the NWNE, SWNE and SENE of Sec 19 Twp 06S Rng 29E. Water rights 35-7632A, 35-14442 & 35-14443 are the rights that irrigate the rest of this pivot.

The maps for the POU's were helpful, however the PODs had discrepancies between the maps and the applications on all of these submittals. Clarification was requested from the consultant.

The owners of 35-2391 has a private agreement to be paid directly from the renter. The WSB will only charge the admin fees for this WR.

AUTHORITY TO FILE: These applications were all signed by Lance Funk. Current taxlot information shows that he is the owner at the POU's. One of the PODs is located on Lance Funk's property and one is located on Monty Funk's property. I will add the easement condition to the rental to keep the Board and Department from being held liable.

WATER RIGHT VALIDITY: 35-2391 is being leased into the WSB entirely from 2017 through 2020. This rental is proposing to use 1.18 cfs and 236 af for 59 acres of this rental. 35-7789 was entirely leased into the bank from 2016 thru 2019. This right was leased to the bank and the applicant then petitioned for shares from the Aberdeen Springfield canal company to irrigate the POU. This rental proposes to rent 0.37 cfs and 73.6 af for 18.4 acres of this rental. No forfeiture concerns are noted.

INJURY TO OTHER WATER RIGHTS: The move has been modeled by the consultant and though they used the wrong from cells for 35-2391 and 35-7789, I ran the model with the correct data and verified that no mitigation is required.

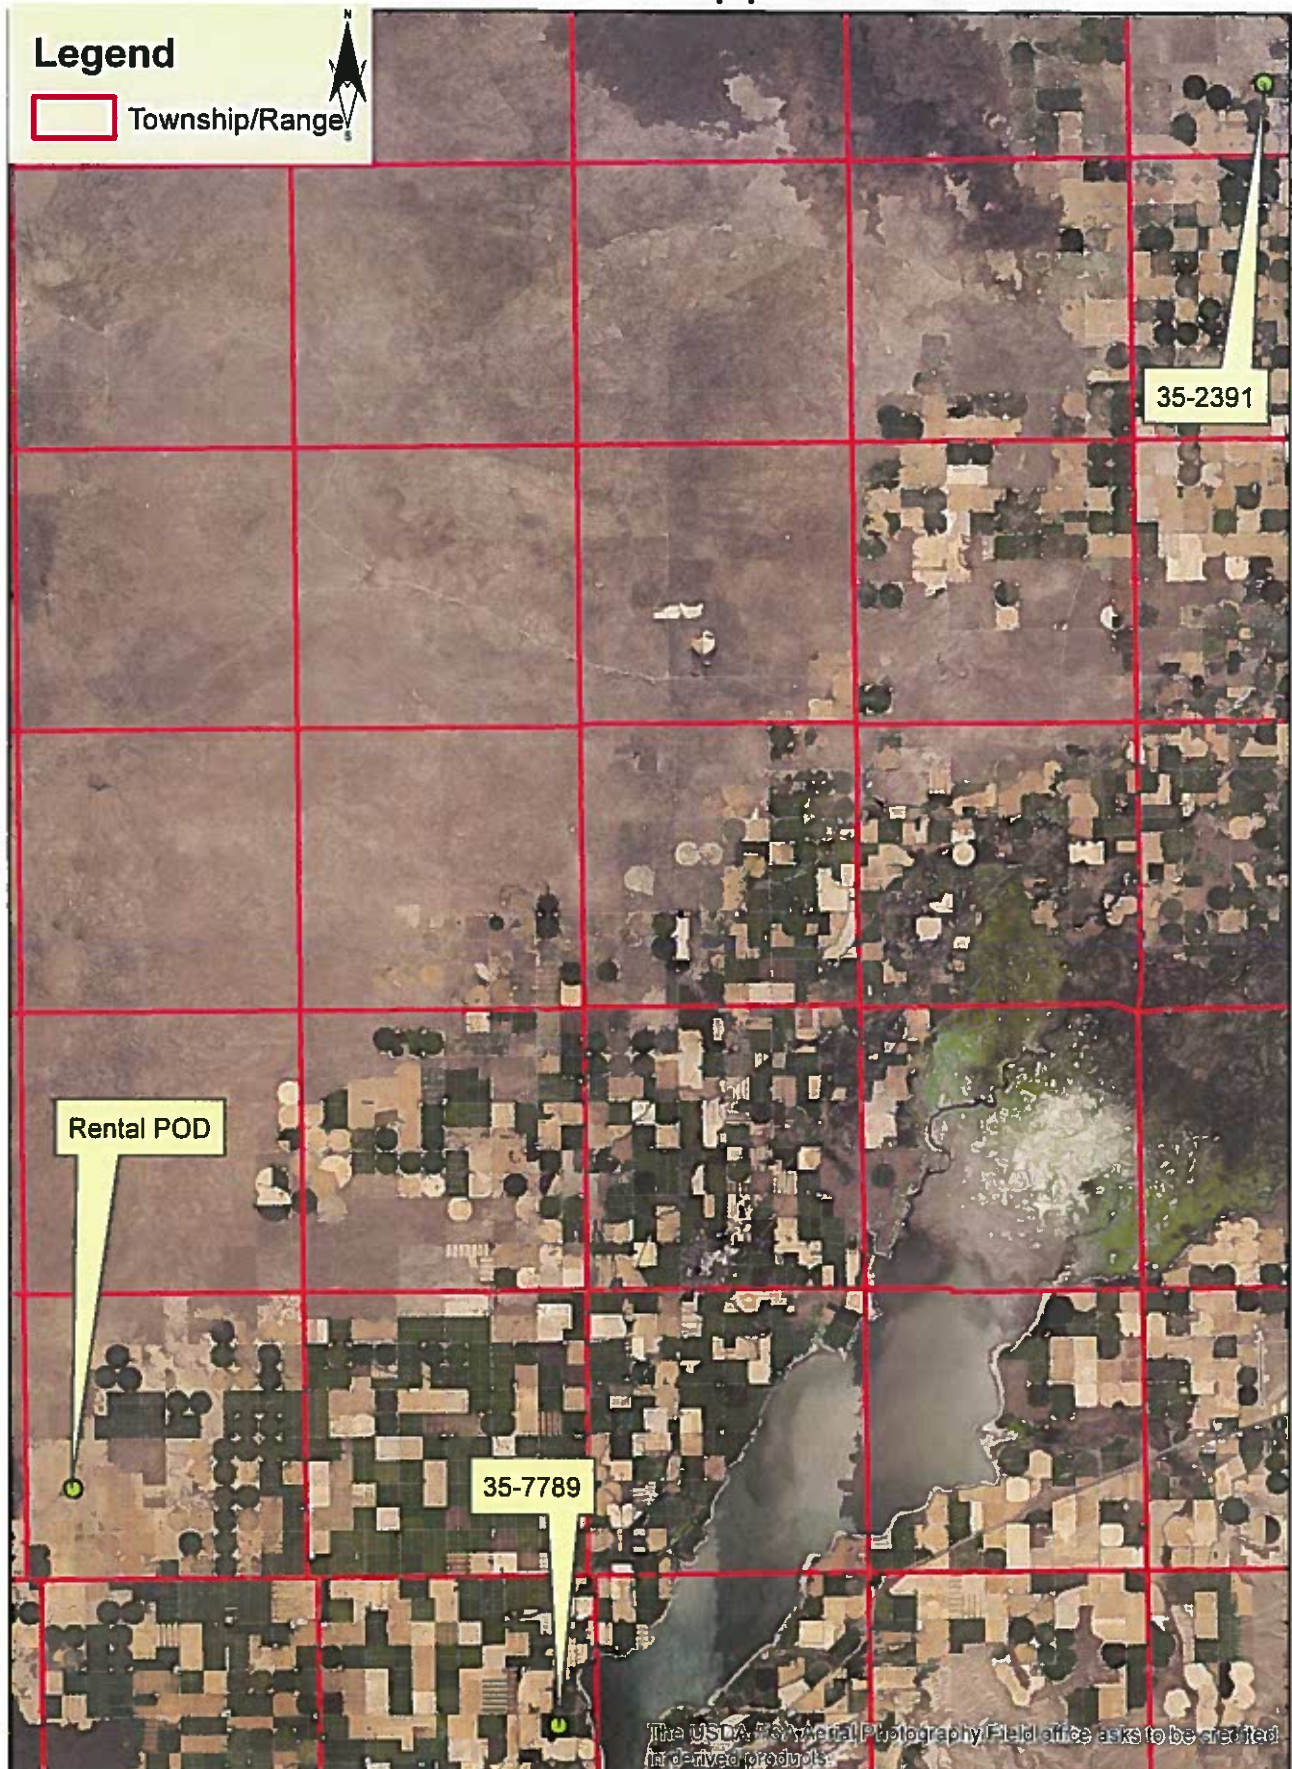

ENLARGEMENT OF USE: I have no enlargement concerns with this rental.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The location for the rental PD is subject to Water District # 120.

Subject: RE: WSB Rental applications 369, 383 and 370 for Lance Funk

Clay,

The rental of irrigation water from water right 35-7618 will only divert water from the well located in the SWNW of Section 20 of 06S 29E.

The rental of irrigation water from water rights 35-14040 and 35-14308 will be diverted from the well located in the SWNW of Section 20 of 06S 29E and the well located in the NENE of Section 30 06S 29E.

The pivot located in the NE ¼ of Section 19 will be irrigated by the Rental 369 (25.5+25.5+0.1+0.1 =51.2 acres) and 79.0 acres rented from 35-7621. The 51.2 acres will have 0.95 cfs and the 79.0 acres will have 1.54 cfs for a total of 2.49 cfs to be applied on 130.0 acres. Which means that there will be an application rate of 0.019 cfs/acre (2.49/130.0). The 0.019 cfs/acres is more than adequate to provide a sufficient diversion rate for this pivot.

I had not considered the cfs/acre for water right 35-14040 as an issue because for the past several years of renting water right 35-14040. This discussion was not touched on or discussed by IDWR. It was not an issue that prevented this water right to be rented multiple times for the full 47.5 acres. I am currently working on scenarios that would eliminate the issues that you are now raising.

RESPONSE DEADLINE

April 11, 2017

RE: ADDITIONAL INFORMATION REQUEST FOR PROCESSING APPLICATIONS 369, 383 and 370 TO RENT WATER FROM THE WATER SUPPLY BANK

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Mr. Sullivan:

The Department of Water Resources ("Department") acknowledges receipt of your Applications to Rent Water from the Water Supply Bank ("Bank"). A preliminary review of your application has been completed and it has been determined that additional information is required to continue processing the applications for Lance Funk located in sections 19 and 30 of Township 06S Range 29E.

Please provide the following information within 14 days of the date of this letter or the application will be returned:

- Clarification of the Point(s) of Diversion requested on these applications (see maps provided)
- How the partial pivot located in SWNE and SENE of Twp 06S 29E section 19 could possibly operate on 0.95 cfs?
- How your client would prevent enlargement of 35-7632A, 35-14442 and 35-14443, which currently operate with 0.01 cfs per acre, when you add rights 35-7618 and 14308, which operate at 0.02 cfs per acre. Simply by combining the two disproportionate sets of rights into the same system provides an expectation of enlargement of use of the higher rate rented rights being spread to acres under the existing portion of the pivot and allowing a more consumptive crop to be grown.
- How your client would prevent enlargement of 35-14040 (0.01 cfs/acre) while renting with 35-2391 (0.02 cfs /acre), 35-7789 (0.02 cfs /acre) and 35-14308 (0.02 cfs/acre) to irrigate a pivot?
This is the same enlargement issue noted above.

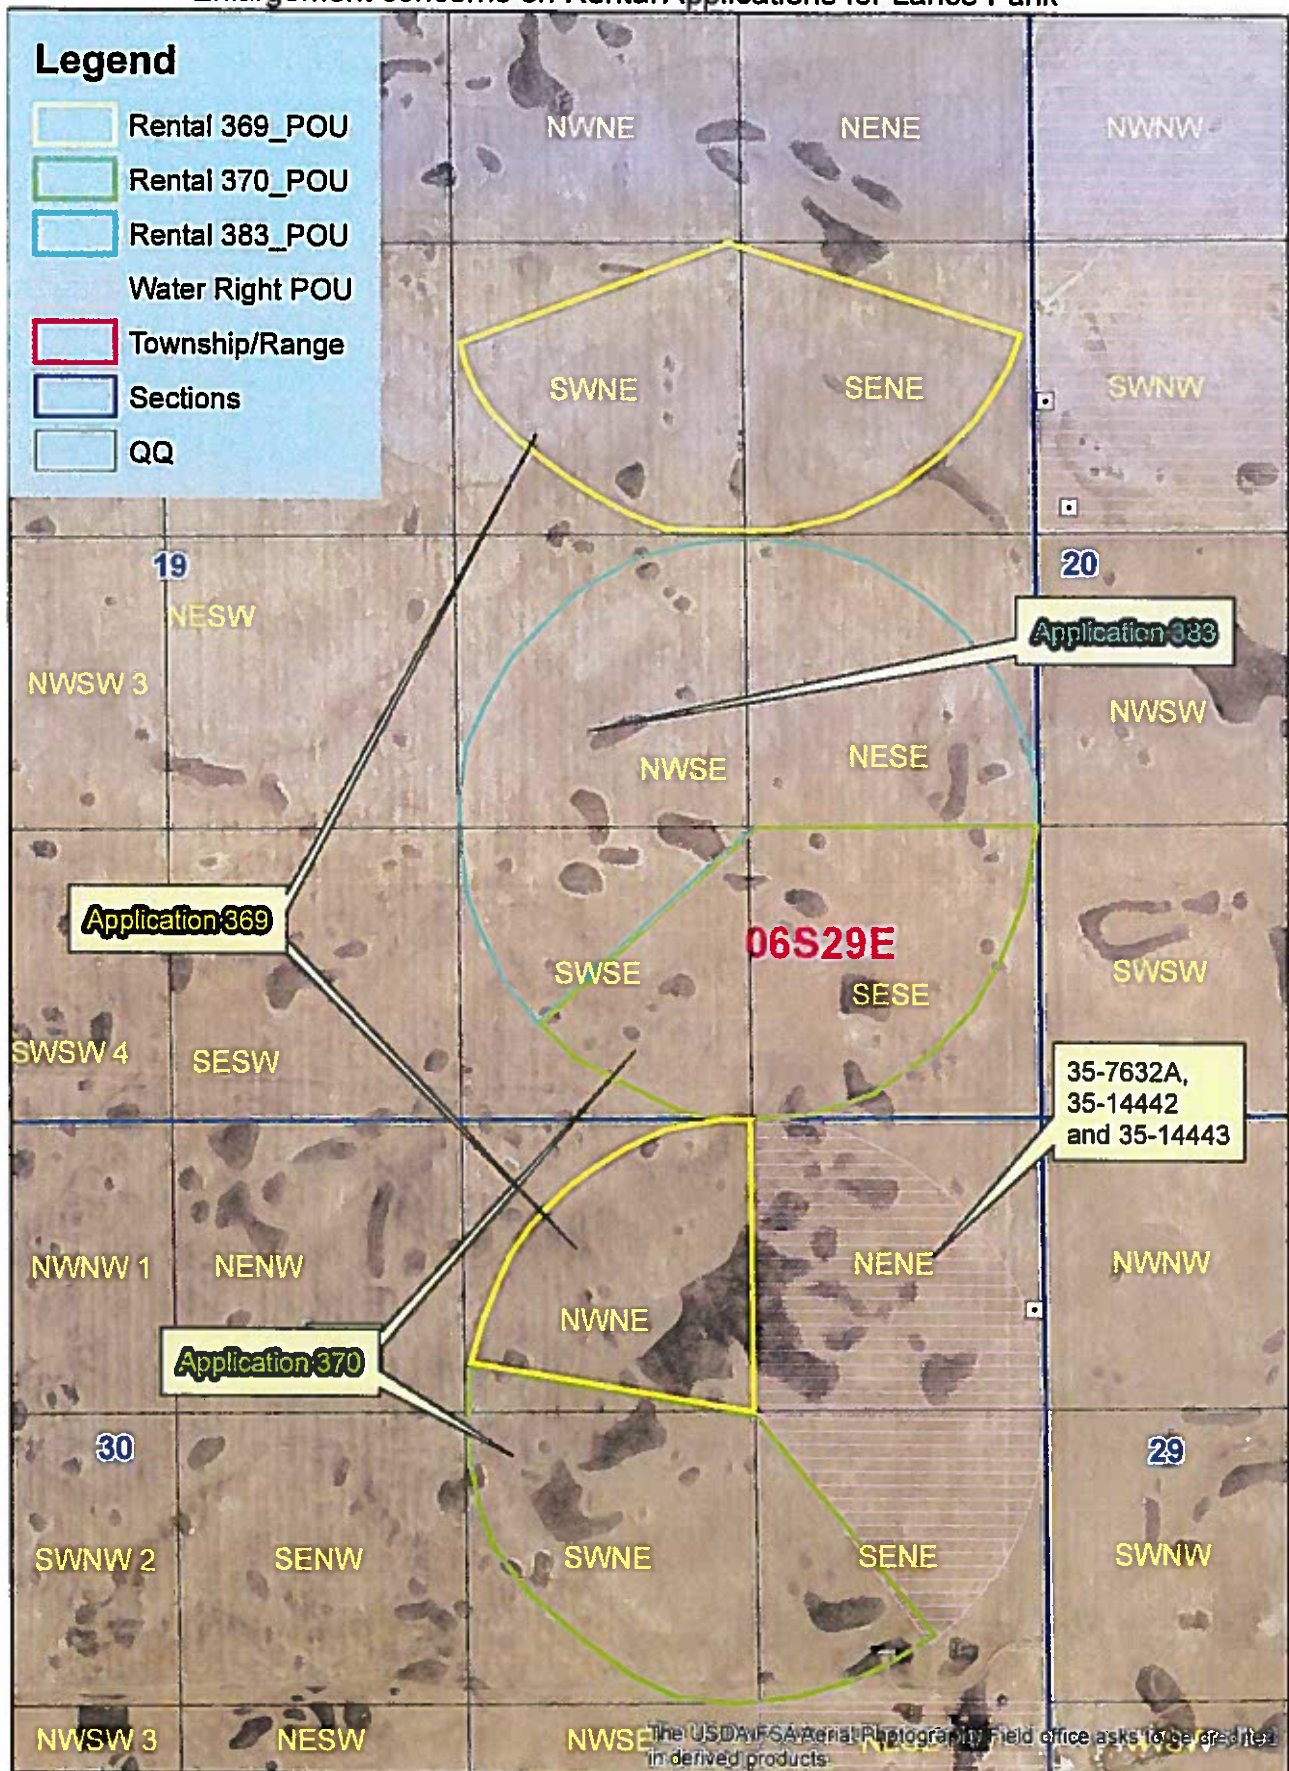

Please provide the required information within 14 calendar days. If sufficient information is not received within 14 days, your application will be returned to you unprocessed.

Sincerely,

Clay Webster
Water Resource Agent Sr.
