APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

1. Name of applicant(s) Charles P. Roberts Joy C. Roberts Phone 208-941-2294
Name connector (check one): ☒ and ☐ or ☐ and/or
Mailing address 2000 W. Homer Rd., Eagle, ID 83616 Email cjroberts2000@msn.co
2. Name of representative, if any N/A Phone _____
Mailing address _____ Email _____
- a. ☐ Send all correspondence for this application to the representative and not to the applicant OR
☐ Send original correspondence to the applicant and copies to the representative.
- b. ☐ The representative may submit information for the applicant but is not authorized to sign for the applicant OR
☐ The representative is authorized to sign for the applicant. Attach a Power of Attorney or other documentation providing authority to sign for the applicant.
3. Source of water supply ground water which is a tributary of N/A
4. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
5N	1E	30			SW	SE	Ada	ground water	
					and SE	SE			
(Legal description is: S 1/2 of SE 1/4)									

5. Water will be used for the following purposes:
Amount 0.15 cfs for irrigation purposes from Mar. 1 to Nov. 15 (both dates inclusive)
(cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
6. Total quantity to be appropriated is (a) 0.15 cubic feet per second (cfs) and/or (b) N/A acre-feet per year (af).
7. Proposed diverting works:
- a. Describe type and size of devices used to divert water from the source. 7.5 hp submersible pump with 2 1/2 inch in ground PVC pipes. Only one (1) well will be constructed
- b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total reservoir capacity 12/14/16 _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11. For dams 10 feet or more in height AND having a storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ No
- c. Proposed well diameter is 8" inches; proposed depth of well is 280 feet.
- d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ No
- e. If well is already drilled, when? _____; drilling firm _____; well was drilled for (well owner) _____; Drilling Permit No. _____

Received by CS Data 9/14/16 Time 10:30 Preliminary check by SB
Fee \$ 100.00 Receipted by CS Receipt No. WD44630 Date 9/14/16

8. Description of proposed uses (if irrigation only, go to item 9):
- Hydropower; show total feet of head and proposed capacity in kW. _____
 - Stockwatering; list number and kind of livestock. _____
 - Municipal; must complete and attach the Municipal Water Right Application Checklist.
 - Domestic; show number of households _____
 - Other; describe fully. _____
9. Description of place of use:
- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
 - If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	(SW)	(SE)

Homer Rd, Eagle, ID 83616, 208-941-2294, cjroberts2000@msn.com

#12 Description:

We propose to replace our old irrigation well with a new one to water our property. The old 8 inch well had a 7.5 hp pump to run a big gun sprinkler on the cattle pasture. Underground PVC pipes brought water to 7 stand pipes from which the sprinkler watered the grass. This set-up was in place when we purchased the property in 1993 and we have since expanded it to 10 stand pipes plus it now waters the garden, orchard, lawns and landscaping. This way the 6 inch domestic well just has to supply water to the two occupied houses (one house is a rental and we live in the other one which was built in 1920) on the property as well as three hydrants for occasional hose use.

We have found no records on the old irrigation well but when Caron Pump came out on 7/28/16 and pulled the pump (for the first time since we have lived here) the date on the pump tag said 1972 so the well is at least that old. They found there was not enough water in the well which measured 130 feet deep with static water at 124 feet. When Waterpro Well Drilling tried to clean out the well on 9/1/16 they found obstructions at 132 feet and declared the well unsalvageable.

IDWR (Dennis Owsley) monitored the static water level on our domestic well (2000 W Homer Rd, Eagle, ID 83616) for a few years and the level hovered around 130 feet.

In 2015 we ceased raising custom beef cattle (we raised cattle for sale for 19 years) and started harvesting grass hay for sale through our business, C & J Farm. We will continue this practice if we secure irrigation rights and can put in a new well. The new irrigation well will continue to water the approximately ^{3.5}~~4~~ acres of grass hay field. It will also continue to water our fruit orchard, 50x60 foot garden, lawns and landscaping for both occupied houses (combined area of approximately ^{0.5}~~2~~ acre). *gm 12/14/16 mw 1/13/17*

The new irrigation well will have an 8-inch casing and a 7.5 hp pump just like the old one. It will be located near the old well and Monte with Waterpro Well Drilling estimates the depth will be around 280 feet deep. He is basing this estimate on the domestic well he put in on our property in 2008 when the casing on our old domestic well failed.

RE: Application for Permit – Request for more information

Dear Mr. and Mrs. Roberts,

The purpose of this letter is to request additional information related to the application for permit 63-34268 submitted on September 14, 2016. First, while inferred with this application, section 7 ("Proposed diverting works") needs to explicitly note that only one well will be constructed. This is required since there are two quarter-quarters (SWSE and SESE) noting the location of the Point of Diversion (POD); providing well siting flexibility. Second, in section 9 ("Description of place of use") the noted partial and total irrigable acreages associated with your property on the SWSE and SESE quarter-quarters appear to be incorrect. According to tax lot data we have on file for your property (see attached map), the SWSE quarter-quarter is 0.5 acres, the SESE quarter-quarter is 4.0 acres, with a total possible irrigable acreage of 4.5 acres. Finally, applications associated with properties located within Basin 63 (Boise River Basin) are required to provide the water bearing zone that the proposed well will be withdrawing water from.

An amended application is attached with two of the required edits associated with sections 7 and 9 completed. Please review, and if deemed accurate, initial both edits. Additionally, (1) please note the water bearing zone in section 12 of the application and initial that change, and (2) note a proposed location of the POD within each quarter-quarter (SWSE and SESE) on the attached map and initial the edit, with the understanding that only one well will actually be constructed. When complete, please return the amended application to Idaho Department of Water Resources Western Region. If you have any questions you can contact me at (208) 334-2190, or by email at erik.boe@idwr.idaho.gov.

Sincerely,

Erik Boe, P.E.
Staff Engineer, IDWR Western Region

Application for Permit No. 63-34268

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the IDAHO STATESMAN on 5/18/2017 and 5/25/2017. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the application.

Sincerely,

A handwritten signature in black ink, appearing to read 'Rachel Neely'.

Permits will be subject to all prior water rights. For additional information concerning the property location, contact Western Region office at (208) 334-2190; or for a full description of the right(s), please see www.idwr.idaho.gov. Protests may be submitted based on the criteria of Idaho Code § 42-203A. Any protest against the approval of the application(s) must be filed with the Director, Dept. of Water Resources, Western Region, 2735 Airport Way, Boise ID 83705 together with a protest fee of \$25.00 for each application on or before 6/5/2017. The protestant must also send a copy of the protest to the applicant.

RE: Application for Permit – Request for more information

Dear Mr. and Mrs. Roberts,

The purpose of this letter is to request additional information related to the application for permit 63-34268 submitted on September 14, 2016. First, while inferred with this application, section 7 ("Proposed diverting works") needs to explicitly note that only one well will be constructed. This is required since there are two quarter-quarters (SWSE and SESE) noting the location of the Point of Diversion (POD); providing well siting flexibility. Second, in section 9 ("Description of place of use") the noted partial and total irrigable acreages associated with your property on the SWSE and SESE quarter-quarters appear to be incorrect. According to tax lot data we have on file for your property (see attached map), the SWSE quarter-quarter is 0.5 acres, the SESE quarter-quarter is 4.0 acres, with a total possible irrigable acreage of 4.5 acres. Finally, applications associated with properties located within Basin 63 (Boise River Basin) are required to provide the water bearing zone that the proposed well will be withdrawing water from.

An amended application is attached with two of the required edits associated with sections 7 and 9 completed. Please review, and if deemed accurate, initial both edits. Additionally, (1) please note the water bearing zone in section 12 of the application and initial that change, and (2) note a proposed location of the POD within each quarter-quarter (SWSE and SESE) on the attached map and initial the edit, with the understanding that only one well will actually be constructed. When complete, please return the amended application to Idaho Department of Water Resources Western Region. If you have any questions you can contact me at (208) 334-2190, or by email at erik.boe@idwr.idaho.gov.

Sincerely,

Erik Boe, P.E.
Staff Engineer, IDWR Western Region

APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

1. Name of applicant(s) Charles P. Roberts Joy C. Roberts Phone 208-941-2294
 Name connector (check one): ☒ and ☐ or ☐ and/or
 Mailing address 2000 W. Homer Rd., Eagle, ID 83616 Email cjroberts2000@msn.co
2. Name of representative, if any N/A Phone _____
 Mailing address _____ Email _____
- a. ☐ Send all correspondence for this application to the representative and not to the applicant OR
☐ Send original correspondence to the applicant and copies to the representative.
- b. ☐ The representative may submit information for the applicant but is not authorized to sign for the applicant OR
☐ The representative is authorized to sign for the applicant. Attach a Power of Attorney or other documentation providing authority to sign for the applicant.
3. Source of water supply ground water which is a tributary of N/A
4. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
5N	1E	30			SW	SE	Ada	ground water	
					and SE	SE			
(Legal description is: S 1/2 of SE 1/4)									

5. Water will be used for the following purposes:
 Amount 0.15 cfs for irrigation purposes from Mar. 1 to Nov. 15 (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
6. Total quantity to be appropriated is (a) 0.15 cubic feet per second (cfs) and/or (b) N/A acre-feet per year (af).
7. Proposed diverting works:
- a. Describe type and size of devices used to divert water from the source. 7.5 hp submersible pump with 2 1/2 inch in ground PVC pipes. Only one (1) well will be constructed.
- b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; _____ reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refilling schedule in 11. For dams 10 feet or more in height AND having a storage capacity of 50 acre-feet or more, submit a separate application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ No
- c. Proposed well diameter is 8" inches; proposed depth of well is 280 feet.
- d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ No
- e. If well is already drilled, when? _____; drilling firm _____;
 well was drilled for (well owner) _____; Drilling Permit No. _____

 Fee \$ 100.00 Receipted by CS Receipt No. W044630 Date 9/14/16

For Department Use

8. Description of proposed uses (if irrigation only, go to item 9):

- Hydropower; show total feet of head and proposed capacity in kW. _____
- Stockwatering; list number and kind of livestock. _____
- Municipal; must complete and attach the Municipal Water Right Application Checklist.
- Domestic; show number of households _____
- Other; describe fully. _____

9. Description of place of use:

- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW			SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NW	SW	SE	NE	NW	(SW)	(SE)	
5N	1E	30														2½	2½	5
																0.5	4.0	4.5

Total number of acres to be irrigated: 5 4.5

10. Describe any other water rights used for the same purposes as described above. Include water _____ by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? N/A

- Who owns the property at the point of diversion? Charles P. and Joy C. Roberts
- Who owns the land to be irrigated or place of use? Charles P. and Joy C. Roberts
- If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: N/A

12. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. see attachment

13. Time required for completion of works and application of water to proposed beneficial use is 1 years (minimum 1 year).

14. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map or maps clearly identifying the proposed point of diversion, place of use, section #, township & range. The map scale shall not be less than two (2) inches equal to one (1) mile.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

#12 Description:

We propose to replace our old irrigation well with a new one to water our property. The old 8 inch well had a 7.5 hp pump to run a big gun sprinkler on the cattle pasture. Underground PVC pipes brought water to 7 stand pipes from which the sprinkler watered the grass. This set-up was in place when we purchased the property in 1993 and we have since expanded it to 10 stand pipes plus it now waters the garden, orchard, lawns and landscaping. This way the 6 inch domestic well just has to supply water to the two occupied houses (one house is a rental and we live in the other one which was built in 1920) on the property as well as three hydrants for occasional hose use.

We have found no records on the old irrigation well but when Caron Pump came out on 7/28/16 and pulled the pump (for the first time since we have lived here) the date on the pump tag said 1972 so the well is at least that old. They found there was not enough water in the well which measured 130 feet deep with static water at 124 feet. When Waterpro Well Drilling tried to clean out the well on 9/1/16 they found obstructions at 132 feet and declared the well unsalvageable.

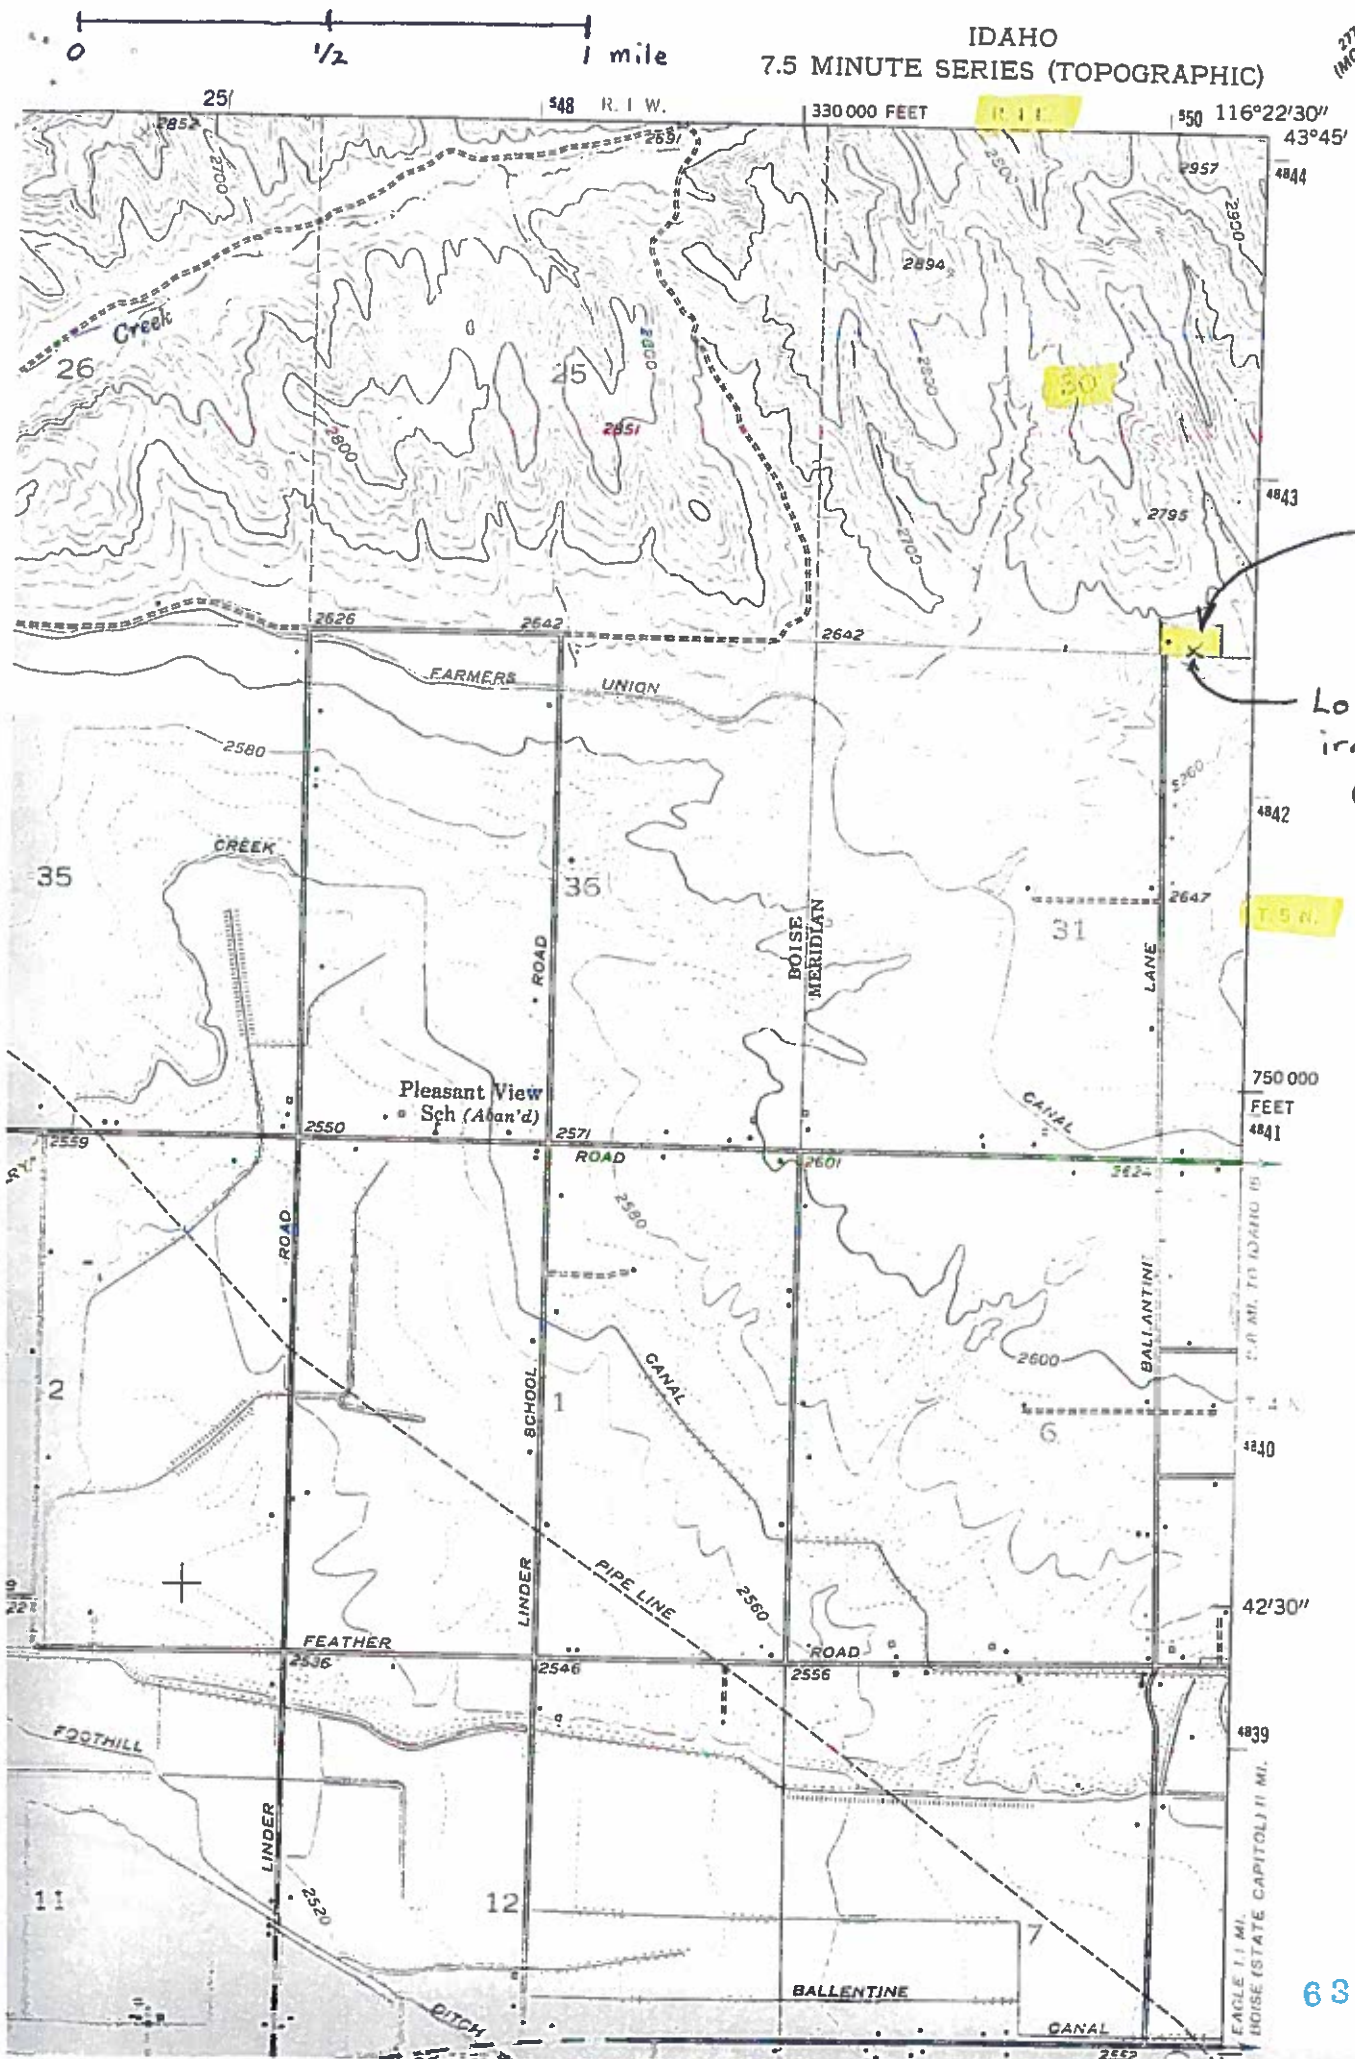

IDWR (Dennis Owsley) monitored the static water level on our domestic well (2000 W Homer Rd, Eagle, ID 83616) for a few years and the level hovered around 130 feet.

In 2015 we ceased raising custom beef cattle (we raised cattle for sale for 19 years) and started harvesting grass hay for sale through our business, C & J Farm. We will continue this practice if we secure irrigation rights and can put in a new well. The new irrigation well will continue to water the approximately 4 acres of grass hay field. It will also continue to water our fruit orchard, 50x60 foot garden, lawns and landscaping for both occupied houses (combined area of approximately 1 acre).

The new irrigation well will have an 8-inch casing and a 7.5 hp pump just like the old one. It will be located near the old well and Monte with Waterpro Well Drilling estimates the depth will be around 280 feet deep. He is basing this estimate on the domestic well he put in on our property in 2008 when the casing on our old domestic well failed.
