WESTERN REGIONSTATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT
To appropriate the public waters of the State of IdahoIdent. No. 65-23690

AMENDED

1. Name of applicant(s) Patrick Hill Phone _____
 Name connector (check one): ☐ and ☐ or ☐ and/or
 Mailing address PO BOX 4529 City MCCALL
 State IDAHO ZIP 83638 Email _____
2. Name of representative, if any Falvey'S, LLC - Mathew Falvey Phone 208-315-2198
 Mailing address PO BOX 710 City MCCALL
 State IDAHO ZIP 83638 Email mathew@falveysllc.com
- a. ☒ Send all correspondence for this application to the representative and not to the applicant OR
☐ Send original correspondence to the applicant and copies to the representative.
- b. ☒ The representative may submit information for the applicant but is not authorized to sign for the applicant OR
☐ The representative is authorized to sign for the applicant. Attach a Power of Attorney or other documentation.
3. Source of water supply Unnamed Stream which is a tributary of North Fork Payette River
4. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
18N	03E	17			NW	NE	Valley	Unnamed Stream	
18N	03E	8			SW	SE	Valley	Unnamed Stream	

5. Water will be used for the following purposes:
- Amount 8.9 afa for Wildlife/Recreation Storage purposes from 01/01 to 12/31 (both dates inclusive)
 (cfs or acre-feet per year)
- Amount 2.5 afa for Irrigation Storage purposes from 01/01 to 12/31 (both dates inclusive)
 (cfs or acre-feet per year)
- Amount 2.5 afa for Irrigation from Storage purposes from 04/15 to 10/31 (both dates inclusive)
 (cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
6. Total quantity to be appropriated is (a) _____ cubic feet per second (cfs) and/or (b) 11.4 acre-feet per year (af).
7. Proposed diverting works:
- a. Describe type and size of devices used to divert water from the source. Excavation within existing stream channel near boundary between Sections 8 and 17
- b. Height of storage dam 0 feet; active reservoir capacity <1.0 acre-feet; total reservoir capacity <1.0 acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 12. For dams 10 feet or more in height AND having a storage capacity of 50 acre-feet or more, submit a separate [Application for Construction or Enlargement of a New or Existing Dam](#). Application required? ☐ Yes ☒ No
- c. Proposed well diameter is NA inches; proposed depth of well is NA feet.
- d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ No
- e. If well is already drilled, when? NA; drilling firm NA;
 well was drilled for (well owner) NA; Drilling Permit No. NA

Received by BS Date 4-26-17 Time - Preliminary check by CP
 Fee \$ 100.00 Received by BS Receipt No. W044890 Date 1/17/2017

8. Description of proposed uses (if irrigation only, go to item 9):

a. Hydropower; show total feet of head and proposed capacity in kW. NA

b. Stockwatering; list number and kind of livestock. NA

c. Municipal; must complete and attach the [Municipal Water Right Application Checklist](#).

d. Domestic; show number of households NA

e. Other; describe fully. Pond to support local wildlife

9. Description of place of use:

a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.

b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE

				W/R															
18N	03E	17															0.5		0.5
																	W/R		

Total number of acres to be irrigated: 0.5

10. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? None

11. a. Who owns the property at the point of diversion? Applicant

b. Who owns the land to be irrigated or place of use? Applicant

c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: NA

12. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. Create a pond approximately 50'W x 100'L x 8' deep within the existing stream channel. Total volume required is 11.4 acre-feet. 0.4 acre-feet will be used to fill the pond initially and 8.5 acre-feet for replacing seepage and evaporation losses. I will use 2.5 acre-feet to irrigate 0.5 acres and I applied for this additional storage volume to replace irrigation water and keep the pond full for wildlife and recreation use. 3 RA

13. Time required for completion of works and application of water to proposed beneficial use is 3 years (minimum 1 year).

14. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map or maps clearly identifying the proposed point of diversion, place of use, section #, township & range. The map scale shall not be less than two (2) inches equal to one (1) mile.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

Application for Permit No. 65-23690

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the STAR NEWS on 5/18/2017 and 5/25/2017. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the application.

Sincerely,

A handwritten signature in black ink, appearing to be 'R. Neely'.

NOTICE OF PROPOSED CHANGE OF WATER RIGHT

TRANSFER NO. 81190

M & T RANCHES LLC, PO BOX 30, OLA, ID 83657; has filed Application No. 81190 for changes to the following water rights within GEM, VALLEY County(s): Right No(s). 65-10473, 65-2945, 65-3061, 65-3062, 65-3063, 65-3064, 65-3065, 65-3069, 65-9538, 65-9539. The purpose of this transfer is to define a permissible place of use for 10 water rights to use the available water supply on the property more efficiently. The applicant is installing pivots and other sprinkler irrigation methods to better utilize the available water supply for the ranch. Water will be used at the current place of use generally located south of Holbrook Lane, approximately 1.5 miles southeast of Ola, Idaho.

Permits will be subject to all prior water rights. For additional information concerning the property location, contact Western Region office at 208-334-2190, or for a full description of the right(s) or proposed transfer (s) please see www.idwr.idaho.gov. Protests may be submitted based on the criteria of Idaho Code §§ 42-203A and 42-222. Any protest against the approval of the application(s) must be filed with the Director, Dept. of Water Resources, Western Region, 2735 Airport Way, Boise, ID 83705 together with a protest fee of \$25.00 for each application on or before 6/5/2017. The protestant must also send a copy of the protest to the applicant.

Dear Mr. Bassista:

The Idaho Department of Water Resources (IDWR) is seeking written comment and/or recommendation(s) from your agency regarding the above referenced water right application(s). Copy(s) of the application(s) are enclosed with this email for your reference. Please review the application(s), complete the enclosed recommendation form, and submit your reply, if any, to this office by the protest deadline of June 5, 2017.

If your agency desires to formally protest approval of this application, you may do so by filing a written protest along with a \$25.00 filing fee for each protested application by the protest deadline.

IDWR will assume your agency does not object to this application if a timely response is not received. Please contact me if you have any questions regarding the application. Thank you for your help.

Sincerely,

Rachel Neely

RE: Applications for Permit Nos. 65-23684, 65-23689, 65-23617, 65-23668, 65-23690 & Application for Transfer No. 81190

Dear Watermaster:

The Idaho Department of Water Resources (IDWR) is seeking written comment and/or recommendations from you regarding the above referenced water right applications. Copies of the applications are enclosed with this email for your reference. Please review the applications, complete a recommendation form, and submit your reply, if any, to this office by June 5, 2017.

IDWR will assume you do not object to these applications if a timely response is not received. Please contact me if you have any questions in this matter. Thank you for your help.

Sincerely,

Rachel Neely

Administrative Assistant I
IDWR-Western Region

MEMORANDUM

Date: April 27, 2017
To: Water Right File 65-23690
From: cparker
Re: Corrections

The irrigation season was corrected and government lot numbers were added to descriptions, both without an amendment per Admin AP Memo No. 9).

MEMORANDUM

Date: April 27, 2017
To: Water Right File 65-23690
From: cparker
Re: Priority Date

The 04/26/17 amendmend increased the diversion rate from 1 afa to 11.4 afa. The fee for both rates is the same, but the increased diversion rate advances the priority date to 04/26/17.

Parker, Cody

From: Parker, Cody

Subject: Patrick Hill Water Right Application
Attachments: Draft Application.pdf; DOC002.pdf

Mr. Falvey,

Attached is the draft application I have drawn up for Patrick Hill. The proposed changes would increase the total volume from 1 acre-foot to 11.4 acre-feet. The 11.4 acre-feet allows you to fill the pond (~0.4 af), keep it full despite losses due to seepage and evaporation (8.5 af), and replace water used for irrigation (2.5 af). The new volume requires the same fee, so no additional payment would be required. However, increasing the volume will advance the priority date of the water right to the date that we receive the amended application. If these changes are acceptable please have the applicant sign and return the forms to the IDWR Western Region office. If you have any questions or concerns please let me know. Thanks for your help.

Evaporation Loss Calculations

This spreadsheet has been designed by Idaho Department of Water Resources to estimate the annual evaporation losses from a pond.

FILE NUMBER	65-23690
REVIEWER	Cody Parker
DATE	1/1/2000

User Input
Calculated value
Formula Explanations

The acronyms used on the Kimberly Research Center website are defined below:
P = Precipitation
ET= Evapotranspiration
P _d = Precipitation deficit
P _d =ET-P

USING THIS SPREADSHEET

Use the link below to access the Kimberly Research Center website. This website provides the Precipitation Deficit for a station most representative of the pond under examination. The Precipitation Deficit is the total amount of free water surface evaporation minus the precipitation for a given area, which gives the total amount of evaporative losses incurred by the pond. There are several weather sites that are used throughout the state. IDWR staff can find the nearest site using Arc Map. The shape file containing the sites can be found at <X:/Spatial/Climate/ETIdahostations.shp>.

Instructions:

1. Use the link below to navigate to ET Idaho 2012.
2. Select the station which is most representative to your pond location.
3. Click Submit Query.
4. Under "Land Covers with Evapotranspiration Estimates," select "Open Water - Shallow Systems (ponds, streams)" or "Open Water - small stock ponds" depending on the pond size.
5. Click the link to "Precipitation Deficit."
6. Reference and copy (ctrl + C) the first subheading "Mean" values.
7. Click the "Paste Values from ET Idaho" button. The table will automatically enter a zero (0) for any negative precipitation deficit values.

Found at: <http://data.kimberly.uidaho.edu/ETIdaho/>

Precipitation Deficit

Station: Twin Falls 2 NNE (NWS -- 109294)

Month	mm/day ¹	Days per month	mm/Month
Jan	-1.98	31	0.00
Feb	-1.57	28	0.00
March	-0.90	31	0.00
April	0.39	30	11.70
May	0.88	31	27.28
June	1.82	30	54.60
July	3.44	31	106.64
August	2.88	31	89.28
September	1.49	30	44.70
October	0.20	31	6.20
November	-2.07	30	0.00
December	-2.53	31	0.00

PLEASE NOTE: The seasonal average for precipitation deficit should not be used for calculations because precipitation often exceeds evaporation during wetter months of the year. If the pond is kept full, excess precipitation during wetter months does not serve to refill the pond during drier months.

For example, see Sandpoint KSPT (NWS -- 108137), the annual precipitation deficit is -106 mm. However, April through September have positive precipitation deficit values. To properly estimate the annual volume of water necessary to refill a pond due to evaporation losses, the table will automatically enter a zero (0) for each month that the precipitation value is reported as a negative value.

As described above, precipitation offsets evaporation in winter months, so the net effect is that wintertime precipitation deficit is usually zero.

Total mm/year = 340.40

$$\left(\frac{340.40}{304.8} \right) \times 0.12 = 0.1 \text{ AFA}$$

Seepage Loss Calculations

This spreadsheet has been designed by Idaho Department of Water Resources to estimate the total annual seepage losses from a pond.

FILE NUMBER	65-23690
REVIEWER	Cody Parker
DATE	1/1/2000

User Input
Calculated value
Formula Explanations

INPUTS

Pond Surface Area (AC.)	0.12	AC.
-------------------------	------	-----

Pond Surface Area (SQ. FT.)	5227	SQ. FT.
-----------------------------	------	---------

I used the following method to obtain my Soil Classification Information:	NRCS Web Soil Survey	
My Soil Classification is	SM	
Suggested Seepage Rate (FT./DAY)	0.2000	FT./DAY

Formula: (Surface Area X Seepage Rate) X 7.48 = Gallons Per Day Loss
--

Convert to GPD	7820	GPD
----------------	------	-----

Total Seepage Loss (AFA)	8.8	AFA
--------------------------	-----	-----

Though sand and gravel seepage rates may actually be higher, the maximum allowable rate is 0.2 ft/day, pursuant to Administrative Memo "Seepage Loss Standards for Ponds and Reservoirs."

Suggested Seepage Rates for Different Soil Types:
GW, GP, GM, GC, SW, SP and SM (silty sand, sand silt mixtures and gravel mixtures) = 0.2 ft per day
OL and ML (inorganic silts - very fine sands, silty, or clayey fine sands) = 0.02 ft per day
SC (clayey sands, sand clay mixtures) = 0.007 ft per day
CL (Low to medium plasticity clays) = 0.003 ft per day
MH, OH, PT and CH (high plasticity clays) = 0.0003 ft per day
LINED PONDS (liners can be chemical, fabric, or bentonite) = 0 ft per day
Ponds Intercepting Groundwater (excavated ponds filled by ground water) = 0 ft per day

PLEASE NOTE: The initial basis for the Suggested Seepage Rates in the table above is found on Page 16 of Seepage from Fish Ponds, Bulletin 599, August 1989 Alabama Agricultural experiment Station, Auburn University, Auburn University Alabama. If you don't know the soil type, please refer to the map provided at the NRCS Web Soil Survey (Tab #1), an ArcMap Soil Classification Map (Tab #1.1), or published NRCS Soil Survey (Tab #1.2). Use "0" if the pond fill relies on the water table.

Total Storage Calculations

FILE NUMBER	65-23690
REVIEWER	Cody Parker
DATE	1/1/2000

This spreadsheet has been designed by Idaho Department of Water Resources to estimate the total seepage, evaporation and fill capacity required for a pond.

User Input
Calculated value
Formula Explanations

Surface Area (AC.)	0.12	"Surface Area" is automatically carried over from the "Seepage Loss" sheet.
Average Pond Depth (FT.)	3.2	"Average Pond Depth" depicts the actual depth of the pond either measured or estimated. Note: If you know the maximum depth and not the average depth, the Field Examiner's Handbook suggests multiplying the maximum depth by 0.4 to get the average depth, or you can use any method that seems reasonable to attain average depth.
Pond Capacity (AF)	0.384	Pond Capacity is calculated by multiplying the Pond Surface Area by the Average Pond Depth. If you know the capacity, divide the capacity by surface area and enter the average pond depth in the space above. Note: If pond capacity is determined using a method shown on the "Pond Capacity" sheet, the user may need to modify the value of "Pond Capacity" (cell B9) manually. Note that if the value is modified manually, the formula will be altered for future use.
Multiple Fill Volume Above Initial Fill to Fulfill From Storage Needs- "Multiple Fills" (AF)	2.116	The "Multiple Fill Volume Above Initial Fill" is the acre-feet of water required to meet a <i>from storage</i> component if the <i>from storage</i> component exceeds a one time fill. This section should not include the amount of water needed to fill the pond initially or the amount of water needed to maintain the pond level due to evaporation or seepage. For example: if a pond has a capacity of 5 acre feet and 2.5 acre feet of seepage and evaporation, but the pond is used for irrigation that requires 10 acre feet of from storage for the irrigation use, then you would insert 5 acre feet into this location (10 acre feet needed - 5 acre feet from the initial fill = 5 acre feet of additional storage needed). Note: You must have a "From Storage" component exceeding the initial fill on the permit to include a volume in this space.
Estimated Seepage Loss (AF)	8.8	The "Estimated Seepage Loss" is automatically carried over from the "Seepage Loss" sheet.
Estimated Evaporation Loss (AF)	0.1	The "Estimated Evaporation Loss" is automatically carried over from the "Evaporation Loss" sheet.
Total Volume Required (AF)	11.4	The "Total Volume Required" is calculated by adding the Pond Capacity, Multiple Fills, Seepage Loss, and Evaporation Loss amounts to determine the total amount of storage required.

Flow Rate into Pond (CFS)	0.00	The "Flow Rate into Pond" depicts the actual flow, either measured or estimated, into the pond. For offstream facilities, this will be equivalent to "diversion to storage" rate.
Highest Daily Evaporation Rate From Evaporation Tab. (mm/Day)	3.44	This number is carried over from the "Evaporation Loss" sheet. It is the highest recorded number in the "Precipitation Deficit Table".
Required Daily Maintenance Volume (AF/Day)	0.03	"Required Daily Maintenance Volume" is the maximum volume of water needed on any given day during the year to maintain pond volume. It is calculated by adding the highest daily evaporation loss to the average daily seepage loss in acre feet. The average daily seepage loss is calculated by dividing the "Estimated Seepage Loss" by 365 days. This is acceptable, since the seepage rate shouldn't vary throughout the season unless the pond completely freezes over during the winter months. The highest daily evaporation loss is calculated by dividing the Highest Daily Evaporation Rate by the 304.8 conversion factor and multiplying this number by the pond surface area to attain a combined daily acre feet requirement.
Minimum Maintenance Flow (CFS)	0.01	The "Minimum Maintenance Flow" is the minimum amount of flow required to maintain the level of the pond. This number is determined by dividing the "Maximum Required Daily Maintenance Volume" by 1.9835. This flow can be used to determine if the flow rate into the pond is adequate to maintain the pond level.
Days Required to Fill the Pond	-15	The "Days Required to Fill the Pond" is calculated by dividing the "Pond Capacity" by the "Flow Rate" minus "Minimum Maintenance Flow" multiplied by 1.9835. This section will assist you in determining if the flow rate being diverted to the pond is adequate to fill the pond while maintaining the pond level. The length of time to fill the pond will help determine if the flow rate is adequate for the size of pond being proposed. If this number is approximately 6 months (180 days) or more, the reviewer should have a discussion with the applicant to make sure he/she understands that it will take a significant length of time to fill the pond.
Days Required to Fill the Pond at 13,000 Gallons per Day	26	Some water users may want to fill a pond under the 13,000 gallons per day domestic exemption. The "Days Required to Fill the Pond at 13,000 Gallons per Day" is calculated by converting the "Pond Capacity" and the "Required Daily Maintenance Volume" to gallons. The "Pond Capacity" is then divided by 13,000 gallons minus the "Required Daily Maintenance Volume" in gallons to determine the number of days to fill pond. If this number is approximately 6 months (180 days) or more, the reviewer should have a discussion with the applicant to make sure he/she understands that it will take a significant length of time to fill the pond. Negative values indicate that the supply of 13,000 gallons per day is not enough volume to overcome the required daily maintenance volume; the pond will never fill.

Shelli and Mathew,

I went through your application for Patrick Hill's pond and modified it to what I think you intended to apply for. I have attached two PDFs. One is a new application I filled out based on the one you submitted and the second is a map you should submit with the application if it correctly locates the approximate location of the project. Your original application was not complete and didn't jibe well with department standards for describing your project. Since your client appears to be eager, and I we haven't been able to speak, I thought I'd correspond via email to speed up getting you the corrections. As I understand your proposal, you intend to excavate a pond within the outlet stream from the pond you refer to as "Eagle Lake". The excavation will result in an on-stream impoundment that is approximately 50 ft. x 100 ft. x 8ft, or about 1 acre-foot of volume. The intended use is storage for wildlife. I was a little unclear about where the pond will be exactly and the section lines don't line up well with the imagery, so I included descriptions for the location in both Section 8 and Section 17 to cover both possibilities.

Please review the attached application, make any corrections if I have misinterpreted your intentions, and then mail back the application after having Mr. Hill sign it. Be sure to include the map with the submittal.

Feel free to call me if you have any questions.

Nick.
