RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
4. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
5. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
6. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
7. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
8. This right is limited to the irrigation of 145.0 acres within the authorized place of use in a single irrigation season.
9. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
10. This rental of rights 17-2052 and 17-7063 when combined shall not exceed the irrigation of 118.1 acres.

WATER SUPPLY BANK RENTAL AGREEMENT No. 158

11. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.
12. The period of use for the irrigation of right 17-2052 described in this approval may be extended to an ending date of 10/31 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water after 9/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than December 7, 2012.
13. This rental agreement does not authorize the construction of a well.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request. For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)

						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

N/A

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. *****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of **\$413.78** was calculated based on the current rental rate of \$17.00 per acre-foot times a diversion volume of 243.4 acre-feet. Since you have a private agreement with the lessor, **you are only obligated to pay the 10% administrative fee or \$413.78.** An annual payment shall be received by the Department prior to the execution of this agreement and prior to January 1 in all subsequent years for the duration of the rental period. The agreement will be void if payment is not received prior to the due date in a given year. Please send a check for \$413.78 made payable to the Idaho Department of Water Resources, together with the signed rental agreement, within 14 days so I can complete processing.

MEMORANDUM FOR APPLICATION # 793

To: Water Rights 17-7063 & 17-2052
From: Clay Webster
Date: 4/28/2017
Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: The department received this application from Brockway Engineering on behalf of CSS Potato Farms LLC to rent 0.83 cfs and 257.7 af to irrigate a 125 acre pivot located in the NW quarter of T14S R 32E S36.

The applicant provided an agreement between the leased water right owners and the renters that the renters will only have to pay the 10% admin fee for this rental.

AUTHORITY TO FILE: The application was signed by Reagan Grabner who is listed as a manager of CSS Potato Farms LLC on the Idaho Secretary of State web site. The property is listed as belonging to Brad R Woolstenhulme. The applicant provided a farm lease agreement from Mr. Woolstenhulme.

WATER RIGHT VALIDITY: 17-2052 was licensed in 1973 and 17-7063 was licensed in 1982. A portion of these rights was leased into the bank for this year as a lease rental package with this application.

INJURY TO OTHER WATER RIGHTS: The rental will be placing the place of use immediately south of the original POU. The point of diversion will remain the same.

ENLARGEMENT OF USE: During review of the lease we found that there were only 118.1 acres available for lease in the QQs offered. The rental will have to be adjusted to only rent those acres. I have no other enlargement concerns.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The location for the rental PD is not subject to a Water District.

Jean,

If the leased acre amount is going to be amended to 118.1 acres, then the rental application must be changed to reflect that same 118.1 acres. The plan is to install a new pivot point at the rental location and physically move the pivot to the rented location. So the same acres are going to be irrigated because the pivot size is going to be exactly the same.

Subject: WSB Lease for 17-2052 and 17-7063 Holbrook Farm

Greg,

Attached is a map of the portion of water rights 17-2052 and 17-7063 owned by Holbrook Farm that are proposed to be leased to the Bank that duplicates the map that came with the WSB Lease applications. I have put the number of acres available for lease on each QQ which equal 118.1 acres. The acres on the map submitted with the applications are incorrect. The Department is going to need a new Attachment 2, attached, for each application to correctly match the available acres.

I have also attached a DRAFT contract with the 118.1 acres for your benefit. Please provide the additional information within 30 days and the Department will continue processing these applications. If the information is not received within 30 days, the Department will return the applications unprocessed. If you have any questions, please contact the Department. Thank you.
