4. Well Information

The system consists of three interconnected wells known as the Remington Well (5 hp in the NENW), the Savage Well (3 hp in the NWNW), and the Yale Creek Well (3 hp in the SWNW).

D. FLOW MEASUREMENTS

None of the three wells had enough exposed pipe on which to place a flow meter, so theoretical calculations are included on an attached spreadsheet.

The pumping levels used in the theoretical calculations were derived from well drillers' reports.

It is of note that the well log for the Savage Well could not be located with 100% certainty. Island Park Water Company originally drilled the well, in addition to eight others serving the Shotgun Subdivisions. Of the nine total wells that Island Park Water Company drilled, five contained erroneous legal descriptions on the well logs. The correct location of seven of the other wells are discussed below, and in the field reports for licenses 21-13222, 21-13223, 21-13224, and 21-13225.

The other well which is not easily matched with a well log is locally known as the Springfield Well and is located in the SWNW of Section 12. The well logs used for the Savage and the Springfield wells (as well as two additional well logs) describe a location within the SWNW of Section 12. One was drilled in July of 1972, and the other in August of 1972. The well drilled in August diagrams on its well log a location in the NE ¼ of the QQ in which it was drilled. The Savage Well is in the NE ¼ of the QQ in which it was drilled, as opposed to the Springfield Well, which is in the SW ¼ of the QQ in which it was drilled. As a result, I decided to use the static water level from the log of the well drilled in August for the Savage Well.

The Remington Well's log contained a correct legal description. It is the only well both described, and physically located in, the NENW of Section 12.

The log used for the Yale Creek Well contains a corrected legal description, in which only the Yale Creek Well is located.

A pump test was run on one well (Chickasaw) of the nine wells drilled by Island Park Water Company to serve the Shotgun Subdivisions. It reported no drawdown after being pumped for ½ hour at 300 gpm. Therefore, no drawdown correction was applied as part of the theoretical calculations.

E. FLOW

 X Additional Computation Sheets Attached

CALCULATIONS

The system's three wells can produce 0.47 cfs.

35 homes covered by this license / 125 homes covered by system * 0.47 cfs produced by the system = 0.13 cfs for this license.

F. VOLUME CALCULATIONS

0.6 AFA in-home use/hookup

0.6 AFA domestic irrigation/hookup

0.6 AFA in-home use/hookup + 0.6 AFA domestic irrigation / hookup = 1.2 AFA/hookup * 35 hookups / system = 42.0 AFA/system

G. NARRATIVE/REMARKS/COMMENTS

This right covers 35 of the 125 hookups in Shotgun Subdivision numbers 2, 3, and 4, as well as in the Yale Creek Cabin Sites subdivision in the S ½ of the SW ¼, south of Beaver Springs Road. The remaining 90 hookups in Shotgun Subdivisions 2, 3, and 4 are covered by 21-7444.

This right is a split portion of the original permit 21-7443. It is for 35 of the original permit's 100 hookups.

The determination of 125 total hookups on the system was made by examining the lots' property owners and, using aerial photography, determining the number of structures on the lots. If contiguous lots were owned by the same entity and contained only one structure the size of a home/cabin, the property owner was assumed to have only one hookup.

It is of note is that the Proof of Beneficial Use for this right was received on February 12, 1992, yet 2015 aerial photography

was used in this analysis. Based on the dates the wells were drilled, dates on subdivision plats, and aerial photography from the 1990s, the beneficial use was developed in its entirety during the development period. Therefore, using 2015 aerial photography because of its higher quality has no effect on the issued license.

The original permit's 0.40 cfs is the Department's standard rate for domestic in-home use only for 100 homes. However, the homes covered by this license were developed with irrigation of lawns and trees. Nothing in the permit's conditions excluded the irrigation of ½ acre for domestic purposes.

H. RECOMMENDATIONS

1. Recommended Amounts

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>DIVERSION RATE</u>	<u>ANNUAL VOLUME</u>
DOMESTIC	01/01 to 12/31	0.13 CFS	42.0 AF
	<u>Totals:</u>	0.130 CFS	42.0 AF

2. Recommended Amendments

☐ Change P.D. as reflected above ☒ Add P.D. as reflected above ☐ None

☐ Change P.U. as reflected above ☒ Add P.U. as reflected above ☐ None

Permit 21-7443 was amended prior to licensing. The amendment applied to licenses 21-13222, 21-13223, 21-13224, and 21-13225, which were split from permit 21-7443 at licensing.

Examiners Notes:

Lift was taken from well log. Hp was emailed. A standard psi for domestic use of 50 was used to estimate the pressure against the pump.
