Re: Evaluation of Sufficiency of Information Submitted

Application for transfer proposes moving a 20 acre portion (0.21 cfs) of a ground water irrigation right, 43-2277 (0.57 cfs), from a farm located at the northwest edge of Malta to a second farm located approximately 2.7 to 3.2 miles south and 0.05 to 0.5 miles east of Malta to an existing well and permissible place of use (PPU).

At the PPU proposed for the portion split from 43-2277, there are currently seven irrigation ground water rights with a combined limit of 1.19 cfs and 317.2 af that are used to irrigate a 100 acre PPU: 43-2354A; 43-13287; 43-13289; 43-13291; 43-13738; 43-13739 and 43-13746. The current PPU will increase from 100 acres to the proposed 120 acres. A combined limit of 1.4 cfs and 397.2 af will be added to all the water rights and the portion of 43-2277 (43-13784) will be limited to 20 acres within the PPU.

Overlap review indicates there are no other irrigation water rights appurtenant to the place of use on either farm. All points of diversion (POD) at the current and proposed POU are within the Raft River Critical Ground Water Area and Water District 143. Watermaster comments will be solicited.

- **Authority to File:** IDWR records indicate the applicants are the current owners of all water rights in this transfer. Warranty deed in file indicates applicants own the lands involved in this transfer.
- **Water Right Validity:** The water rights in this transfer were all decreed in the SRBA on 6/28/2002. Grounds at the farm the water right is being transferred from appear irrigated in recent imagery. Irrigation and well construction at the second farm were authorized in 2015 under Transfer #79777. Recent aerial and satellite imagery indicates that development has occurred at the second farm.
- **Injury to Other Water Rights:** None anticipated.
- **Enlargement of Use:** None anticipated.
- **Local Public Interest:** No issues anticipated. Application is subject to public notice.

- **Beneficial Use/Conservation of Water Resources:** Proposed use is recognized as a beneficial use of water.
- **Effect on the Economy of the Local Area:** None Anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing

Re: Fee Evaluation

Filing fees charged for transfer application #81344 were based on the on the current transfer fee schedule and the proportional increase in POU size. 0.21 cfs is being transferred in the application and the proportional increase in the size of the PPU is 20%, which is equivalent to: $0.20 \times 1.19 \text{ cfs} = 0.238 \text{ cfs}$. Therefore: $0.21 \text{ cfs} + 0.238 \text{ cfs} = 0.49 \text{ cfs}$, making the total fee for this transfer \$500.00 (Receipt No. S036060).
