RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
4. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
5. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
6. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date. This rental for mitigation by non-use may be ineffective if the mitigating water right is not in priority.
7. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
8. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion.
9. This rental agreement does not authorize the construction of a well.
10. This right when combined with all other rights shall provide no more than 0.03 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the lands above.
11. Use of water under this agreement will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37.

12. The period of use for the irrigation described in this approval may be extended to a beginning date of 4/15 and an ending date of 10/31 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 06/01 and after 10/01 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.

- F. Has documented consent from all relevant water delivery entities been obtained? Yes ☐ N/A ☒
If yes, include documented consent as Attachment 3F.

- G. Do any POD(s) identified in Question 3E divert from a water source that may require water modeling? Yes ☐ No ☒
Refer to the Water Modeling Requirements Information Sheet to determine if a rental POD may require water modeling.

Application to Rent Water (Continued)

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☐ No ☒

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request. For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL			
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B:**

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☐

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C:**

MEMORANDUM FOR AGREEMENT # 146

To: Water Rights 37-20903 & 37-21433

From: Sandy Thiel

Date: April 20, 2017

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: On February 8, 2017, Jim Speck submitted a water supply bank rental application on behalf of the Michael D. Parmelee Revocable Trust of 2007. On the application they requested irrigation water for 1.3 acres above and beyond the domestic exemption. This rental was in response to an NOV issued in 2014.

AUTHORITY TO FILE: This application was signed by Michael D. Parmelee. According to the current tax-lot data, the property at the proposed place of use and point of diversion is owned by the Michael D. Parmelee Revocable Trust. Michael D Parmelee is a trustee.

WATER RIGHT VALIDITY: Right 37-20903 was decreed in 2010. Right 37-21433 is an enlargement right of 37-20903. It was decreed in 2011. Together these rights provide 0.03 cfs, 6.3 af and 1.8 acres. They are leased to the bank through 2019. The rental requested a minimum diversion rate of 0.04 cfs and 4.6 af. To achieve the 0.03 cfs they must rent the additional volume and acres.

There is not enough water to satisfy the requested minimum. However, in an email from Mr. Speck on March 24, 2016, he said that this rental would work (see email in file under water right 37-20903). I reviewed Bank leases in April 2017, and did not find other rights to fulfill this rental.

INJURY TO OTHER WATER RIGHTS: The points of diversion for both the leased rights and the rental fall within the Hailey Zone of the Water Supply Bank Interim Ground Water Rental Policy for the Wood River Valley. No injury is apparent.

ENLARGEMENT OF USE: These rights had 0.03 cfs, 5.4 af and 1.8 acres leased to the bank from 2015 through 2019. The applicant requested 0.04 cfs. However, these rights will only provide 0.03 cfs. The entire 1.8 acres will need to be rented and limited to the 1.3 acre place of use and 4.6 af. Aerial imagery shows that the leased acres are being idled. No other enlargement concerns are noted.

LOCAL PUBLIC INTEREST: The rental agreement will include a measuring device condition. Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The location for the rental point of diversion is subject to Water District # 37. Southern region did not have concerns. I did not receive a response from the water master
