Subject: Re: Water Right Permit 74-15701 & Request to Waive Lockable Device and .25 inch Fish Screen Permit Requirements

Darla,

I am the Water Master for this claim. I do not require a lockable headgate or measuring device. There are no other diversions this would have a conflict with and there is no consumptive use.

Subject: Water Right Permit 74-15701 & Request to Waive Lockable Device and .25 inch Fish Screen Permit Requirements

April 4, 2017,

Re: Request from permit holder attached above.

Dear Watermaster:

The Department of Water Resources (Department) has received a letter from the permit holder requesting a waiver of 2 permit conditions. The Department also requires written agreement from the watermaster that the requirements may be waived. The two conditions that the permit holder is requesting be waived are the following as stated in my earlier letter of March 8, 2017.

Condition No. 6 of this permit states:

"Prior to diversion of water under this right, the right holder shall install a lockable device, subject to the approval of the Department, in a manner that will provide the watermaster suitable control of the diversion."

Condition no. 9 of this permit states:

"A fish screen of 0.25 inch or smaller mesh shall be installed and maintained at the point of diversion"

I will move forward with a response to the permit holder upon a reply from you.

Sincerely,

Darla Block
