

**STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES**

**TRANSFER OF WATER RIGHT
TRANSFER NO. 80749**

This is to certify that: **FRANK TIEGS LLC**
PO BOX 3350
PASCO, WA 99302

has requested a change to the water right(s) listed below. This change in water right(s) is authorized pursuant to the provisions of Section 42-222, Idaho Code. A summary of the changes is also listed below. The authorized change for each affected water right, including conditions of approval, is shown on the following pages of this document.

Right Acre Limit: 350.0

POU Total Acres: 1570.0

CONDITIONS OF APPROVAL

1. This right is limited to the irrigation of 350 acres within the authorized place of use in a single irrigation season.
2. Rights 61-7114, 61-2207A, 61-2207B, 61-7262A, and 61-10561 when combined shall not exceed a total diversion rate of 16.96 cfs, a total annual maximum diversion volume of 5436.0 af at the field headgate, and the irrigation of 1208 acres.
3. Rights 61-7114, 61-2207A, 61-2207B, 61-7206D, 61-7262A, 61-10561, 61-12185, 61-12203, and 61-12205 when combined shall not exceed a total diversion rate of 19.98 cfs, a total annual maximum diversion volume of 6356.0 af at the field headgate, and the irrigation of 1438 acres.

Transfer No. 80749

WATER RIGHT NO. 61-2207A

As Modified by Transfer No. 80749

CONDITIONS OF APPROVAL

4. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
5. Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 161.
6. Prior to the diversion and use of water under Transfer approval 80749, the right holder shall install and maintain acceptable measuring device(s) at the authorized point(s) of diversion in accordance with Department specifications, or shall obtain an approved variance from the Department to determine the amount of water diverted from power records or to maintain an existing measuring device.
7. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.
8. The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
9. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
10. Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as determined by the Snake River Basin Adjudication court in the final unified decree entered 08/26/2014.

WATER RIGHT NO. 61-7206D**As Modified by Transfer No. 80749**

Right Acre Limit: 13.7
POU Total Acres: 1570.0

CONDITIONS OF APPROVAL

1. This right is limited to the irrigation of 13.7 acres within the authorized place of use in a single irrigation season.
2. Rights 61-12185, 61-12203, and 61-12205 when combined shall not exceed a total diversion rate of 2.22 cfs, a total annual maximum diversion volume of 760.0 af at the field headgate, and the irrigation of 190 acres.
3. Rights 61-7114, 61-2207A, 61-2207B, 61-7206D, 61-7262A, 61-10561, 61-12185, 61-12203, and 61-12205 when combined shall not exceed a total diversion rate of 19.98 cfs, a total annual maximum diversion volume of 6356.0 af at the field headgate, and the irrigation of 1438 acres.

Transfer No. 80749

WATER RIGHT NO. 61-12205

As Modified by Transfer No. 80749

CONDITIONS OF APPROVAL

4. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
5. Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 161.
6. Prior to the diversion and use of water under Transfer approval 80749, the right holder shall install and maintain acceptable measuring device(s) at the authorized point(s) of diversion in accordance with Department specifications, or shall obtain an approved variance from the Department to determine the amount of water diverted from power records or to maintain an existing measuring device.
7. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.
8. The period of use for the irrigation described in this approval may be extended to a beginning date of 3/15 and an ending date of 11/15 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/1 and after 10/31 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than 10/26/2000.
9. The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
10. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
11. Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as determined by the Snake River Basin Adjudication court in the final unified decree entered 08/26/2014.

WATER RIGHT NO. 61-2207B**As Modified by Transfer No. 80749**

DEPARTMENT OF WATER RESOURCES

Transfer No. 80749

MINIMUM REQUIREMENTS CHECKLIST
TO BE SUBMITTED WITH APPLICATION FOR TRANSFER

An application for transfer must be prepared in accordance with the minimum requirements listed below to be acceptable for processing by the Department. Incomplete applications will be returned. The instructions, fee schedule, Part 2A reports and additional Part 2B forms are available from any Department office or on the Department's website at www.idwr.idaho.gov.

Name of Applicant(s) Frank Tiegs LLCCheck whether each item below is *attached* (Yes) or *not applicable* (N/A) for the proposed transfer.Yes N/A * Means the item is always required and must be included with the application.

- ☒ * Completed Application for Transfer of Water Right form, Part 1.
- ☐ * Signature of applicant(s) or applicant's authorized representative on Application for Transfer Part 1. Include evidence of authority labeled Attachment #3 (see below) if signed by representative.
- ☒ * Application for Transfer Part 2A. Attach a Part 2A report describing each water right in the transfer as currently recorded.
- ☐ ☒ Complete and attach an Application for Transfer Part 2B for each water right for which only a portion is proposed to be changed through this transfer application.
- ☒ * Application for Transfer Part 3A is always required (see Attachment #7a below); Parts 3B and 3C must be completed for transfer applications proposing to change the nature of use of the water right(s) or proposing changes to supplemental right(s).
- ☐ * Correct fee submitted with transfer application form. (Fee schedule is on website and instructions for application for transfer.)

Attachments to Application - Label each attachment with the corresponding number shown below as Attachment #1-10.

- ☒ ☐ #1 If the applicant is a business, partnership, organization, or association, and not currently registered in the State of Idaho as a business entity, attach documentation identifying officers authorized to sign or act on behalf of right holder. (See Part 1.)
- ☐ ☒ #2a Water Right ownership documentation if Dept. records do not show the applicant as the current water right owner. **
- ☐ ☒ #2b If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s).**
** Additional fee(s) required for water right ownership changes; see fee schedule.
- ☐ ☒ #3 Documentation of authority to make the change if the applicant is not the water right owner.
- ☐ ☒ #4 Power of Attorney or documentation providing authority to sign or act on the applicant's behalf. (See Part 1.)
- ☐ ☒ #5 If the transfer application proposes to change the point of diversion for a water right affecting the Eastern Snake Plain Aquifer (ESPA), attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. ESPA transfer spreadsheet and model grid labeled cells are available on the Department's website at www.idwr.idaho.gov/WaterManagement/WaterRights/WaterRightTransfers/resources.htm.
- ☐ ☐ #6 Notarized statement of agreement or a statement on official letterhead signed by an authorized representative from each lien holder or other entity with financial interest in the water right(s) or land affected by the proposed transfer. (See Part 1.5.c.)
- ☒ * #7a Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described on the application. Include legal description labels. If only a portion of the right is proposed to be changed, identify the current location of the part of the existing right(s) proposed to be changed. (See Part 3A.)
- ☒ ☐ #7b If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. If some or all of any right is leased to the Water Supply Bank, you must also show the the specific location and/or acres to be idled at the new, proposed place of use to satisfy lease requirements.
- ☐ ☒ #8a If the transfer application proposes to change the nature of use or period of use for one or more rights, provide documentation describing the extent of historic beneficial use for the water rights proposed to be transferred and document how enlargement will be avoided. (See Part 3B.) Additional fee required for proposed changes to nature of use; see fee schedule.
- ☐ ☒ #8b If the transfer application proposes to change the place of use of a supplemental irrigation right, provide documentation regarding the historic use of the supplemental right(s) and availability or reliability of the primary right(s) being supplemented, both before and after the proposed change. (See Part 3C.)
- ☐ ☒ #9 Water Supply Bank information for all rights proposed for transfer and currently leased to the Bank. (Attachment WSB)
- ☐ ☒ #10 Other. Please describe: _____

**STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES**

**APPLICATION FOR TRANSFER OF WATER RIGHT
PART 1**

Name of Applicant(s) Frank Tiegs LLC Phone 509-545-4545
Mailing address PO BOX 3350 PASCO, WA 99302 Email _____

- ☐ If applicant is not an individual and not registered to do business in the State of Idaho, attach documentation identifying officers authorized to sign or act on behalf of the applicant. Label it **Attachment #1**.
- ☐ Attach water right ownership documentation if Department records do not show the transfer applicant as the current water right owner. Label it **Attachment #2a**.
- ☐ If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s). Label it **Attachment #2b**.
- ☐ Attach documentation of authority to make the proposed change if the applicant is not the water right owner. Label it **Attachment #3**.

Provide contact information below if a consultant, attorney, or any other person is representing the applicant in this transfer process.

☐ No Representative

Name of Representative Greg Sullivan Phone 208-736-8543
Mailing address 2016 N Washington St Ste 4 Twin Falls, Idaho 83301 greg.sullivan@brockwayengi.com

- ☐ Send all correspondence for this application to the representative and not to the applicant.
OR
- ☒ Send original correspondence to the applicant and copies to the representative.
- ☒ The representative may submit information for the applicant but is not authorized to sign for the applicant.
OR
- ☐ The representative is authorized to sign for the applicant. Attach a Power of Attorney or other documentation providing authority to sign for the applicant and label it **Attachment #4**.

I hereby assert that no one will be injured by the proposed changes and that the proposed changes do not constitute an enlargement in use of the original right(s). The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

A. PURPOSE OF TRANSFER

1. ☒ Change point of diversion ☐ Add diversion point(s) ☒ Change place of use
☐ Change nature of use ☒ Change period of use ☐ Other _____
2. Describe your proposal in narrative form, including a detailed description of non-irrigation uses to justify amounts transferred (i.e. number of stock, etc.), and provide additional explanation of any other items on the application. Attach additional pages if necessary and label it **Part 1A.2**.
The transfer proposes to create a permissible place of use for the water rights.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT PART 1 Continued

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:

Existing wells, pumps, motors, mainlines and delivery system.

- b. Who owns the property at the point(s) of diversion? Frank Tiegs LLC

If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?

If yes, ☐ attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: None

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- d. Are any of the water rights proposed for transfer currently leased to the Water Supply Bank?

If yes, ☐ complete Attachment WSB.

- e. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:

None

- f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:

None

- g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

- ☐ ☒ undergone a period of five or more consecutive years of non-use,
☐ ☒ currently leased to the Water Supply Bank,
☐ ☒ currently used in a mitigation plan limiting the use of water under the right, or
☐ ☒ currently enrolled in a Federal set-aside program limiting the use of water under the rights?

If yes, describe:

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT PART 2

A. DESCRIPTION OF RIGHT(S) AS RECORDED

For each water right listed in Part 1B.1 of the application, attach a **Part 2A** report obtained from any Department office or from the Department's website @ www.idwr.idaho.gov, Water Right Transfers, Step 1.

Insert **Part 2A** reports into the application following **Part 1**.

B. IF ONLY A PORTION OF THE RIGHT IS PROPOSED TO BE CHANGED, DESCRIBE THE PORTION BEING CHANGED AS IT APPEARS BEFORE THE REQUESTED CHANGES

- ☐ Complete and attach one copy of Part 2B for each right for which only a portion is proposed to be changed. If the entire right is proposed to be changed, Part 2B is not applicable. Additional copies of the Part 2B form can be obtained from any Department office or from the Department's website @ www.idwr.idaho.gov, Water Right Transfers, Step 3, or Water Right Forms, Changes in Use. Insert completed Part 2B forms into the application following Part 2A of the same water right.

Right Number: _____

1. amount _____ (cfs/ac-ft) for _____ purposes from _____ to _____
 amount _____ (cfs/ac-ft) for _____ purposes from _____ to _____
 amount _____ (cfs/ac-ft) for _____ purposes from _____ to _____
 amount _____ (cfs/ac-ft) for _____ purposes from _____ to _____
 amount _____ (cfs/ac-ft) for _____ purposes from _____ to _____
 amount _____ (cfs/ac-ft) for _____ purposes from _____ to _____
 amount _____ (cfs/ac-ft) for _____ purposes from _____ to _____
 amount _____ (cfs/ac-ft) for _____ purposes from _____ to _____
2. Lands irrigated or place of use: (If irrigation, identify with number of acres irrigated per $\frac{1}{4}$ $\frac{1}{4}$ tract.)

Total Acres: 1223

Conditions of Approval:

1. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
2. X27 This right is limited to the irrigation of 350 acres within the authorized place of use in a single irrigation season.
3. R65 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
4. X35 Rights 61-2207A, 61-2207B, 61-7114, 61-7262A, and 61-10561 when combined shall not exceed a total diversion rate of 16.96 cfs, a total annual maximum diversion volume of 5436.0 af at the field headgate, and the irrigation of 1208 acres.
5. F06 The following rights are diverted through points of diversion described above: 61-2207A, 61-2207B, 61-7114, 61-7262A, and 61-10561.
6. 046 Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.
7. T19 Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.
8. Diversion from the point of diversion authorized in the NE SE Section 24, T04S, R06E shall not exceed a rate of 5.00 cfs.
9. T07 The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
10. 01M After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.

Total Acres: 1223

Conditions of Approval:

1. R65 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
2. X35 Rights 61-2207A, 61-2207B, 61-7114, 61-7262A, and 61-10561 when combined shall not exceed a total diversion rate of 16.96 cfs, a total annual maximum diversion volume of 5436.0 af at the field headgate, and the irrigation of 1208 acres.
3. T07 The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
4. X61 The period of use for the irrigation described in this approval may be extended to a beginning date of 3/15 and an ending date of 11/15 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 3/01 and after 10/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than 10/26/2000.
5. T19 Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.
6. Diversion from the point of diversion authorized in the NE SE Section 24, T04S, R06E shall not exceed a rate of 5.00 cfs.
7. F06 The following rights are diverted through points of diversion described above: 61-2207A, 61-2207B, 61-7114, 61-7262A, and 61-10561.
8. 01M After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.
9. X27 This right is limited to the irrigation of 395 acres within the authorized place of use in a single irrigation season.
10. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
11. 046 Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 3

A. PLAT MAP (See Part 3A of Instructions for application for transfer for complete requirements.)

- ☒ Attach a map of the diversion, measurement, control, and distribution system. Label it **Attachment #7a.**
- ☐ If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b.**

If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

If any part of the irrigation water right is leased to the Water Supply Bank, you must also specify the location and number of acres that will remain idled for the duration of the lease contract at the new, proposed place of use.

B. CHANGES IN NATURE OF USE (Water Balance)

- ☐ If you propose to change the nature of use or period of use of all or part of the right(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a**.

C. PLACE OF USE CHANGES TO SUPPLEMENTAL IRRIGATION RIGHTS

- ☐ If you propose to change the place of use of a supplemental irrigation right, answer below and attach supporting documentation. Label it **Attachment #8b**.

Describe how the supplemental water rights have been used historically in conjunction with other water rights at the existing place of use. Describe the time during the irrigation season that the supplemental rights have been used. Include information about the availability or reliability of the primary right(s) being supplemented, both before and after the change. If the applicant is proposing to change a supplemental irrigation right to a primary right, provide the information required on Part 3B above:

Transfer Approval Notice

Dear Water Right Holder and other Interested Persons:

The Department of Water Resources has issued the enclosed approved Transfer of Water Right(s). Please be sure to thoroughly review the conditions of approval and remarks listed on the approval document.

The Transfer of Water Right(s) is a PRELIMINARY ORDER issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless the APPLICANT petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

ANY PERSON aggrieved by any decision, determination, order or action of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Department and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

If the transfer approval includes a condition requiring measuring and recording devices, such devices shall comply with specifications established by the Department. Detailed specifications are available on the Department's home page on the Internet, or you can request a copy by contacting any office of the Department. Please be sure to thoroughly review the specifications to avoid unnecessary costs for reinstallation or modification due to non-conforming or improperly installed devices.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at (208)334-2190.

Sincerely,

 Rachel Nzele for:

Nick Miller

Western Regional Manager

EXPLANATORY INFORMATION TO ACCOMPANY A PRELIMINARY ORDER

(To be used in connection with actions when a hearing was not held)

(Required by Rule of Procedure 730.02)

The accompanying order or approved document is a "Preliminary Order" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources ("department") unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. **Note: the petition must be received by the department within this fourteen (14) day period.** The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after: (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its service date if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) The petition for reconsideration is disposed of; or
- (b) The petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held.
- ii. The final agency action was taken.
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

MEMORANDUM

TO: Transfer No. 80749
FROM: Rachel Sommer
DATE: April 10, 2017
RE: Evaluation of Application

Summary of Application Proposal

The following proposals are to be met following a transfer approval in the name of Frank Tiegs LLC. The purpose of this transfer is to create a permissible place of use (PPU) and modify the points of diversion for rights 61-7114, 61-2207A, 61-2207B, 61-7206D, 61-7262A, 61-10561, 61-12185, 61-12203, and 61-12205. Each of the nine rights will share the same PPU and will divert water from five existing wells, affecting 19.98 cfs. Also proposed is a season of use change for rights 61-7114, 61-7206D, 61-7262A, 61-10561, 61-12185, 61-12203, and 61-12205.

Location of Application Proposal

The proposal is located approximately one mile east of State HWY 51, four and half miles west of I-84 between Power Line/18th/18th East St and Old Mtn City-Mtn Home Rd, and almost entirely north of Clover Hollow Rd in Elmore County.

Summary of Information Submitted

Authority to File:

The property and water rights associated with this transfer are in the name of Frank Tiegs LLC. Frank Tiegs signed the transfer and is the sole member and manager of Frank Tiegs LLC.

Water Right Validity:

The following rights were decreed in the SRBA:

61-7114, priority date 6/9/1972; 61-2207A, priority date 8/24/1967; 61-2207B, priority date 8/24/1967; 61-7206D, priority date 11/8/1974; 61-7262A, priority date 6/4/1976; 61-10561, priority date 4/14/1970; 61-12185, priority date 8/30/1971; and 61-12205, priority date 6/4/1976. 61-12203, licensed with a priority date of 10/29/1993, no SRBA claim required.

Rights presumed valid; beneficial use confirmed via imagery from 2015 aerial imagery.

Overlapping POU/POD:

POU overlap – Combined use limitations will be added and/or maintained to address all overlap to ensure no enlargements will take place. Overlap Analysis attached.

- Parent rights 61-7097, 61-7262B, and 61-7299 carried a combined use limitation of 6.53 cfs, 2,226.4 af, and 556.6 acres. On November 11, 2008 an ownership change was received to split the rights between two parties. Rights 61-12185, 61-12203, and 61-12205 were created to represent one parties interest, and rights 61-12186, 61-12204, and 61-12206 were created to represent the second parties interest. The combined use limitations carried over were incorrect; see memo dated November 9, 2015 in Transfer file 78279 and application file 61-11974 (memo attached). The limitations were corrected on rights 61-12186, 61-12204, and 61-12206 through transfer 78279. Right 61-12185 and 61-12203 still describes incorrect limitations and/or may include rights from the second party above. Correct combined use limitations of 2.22 cfs, 760 af, and 190 acres will be added to 61-12185 and 61-12203 through transfer 80749.
- Rights 61-7114, 61-2207A, 61-2207B, 61-7262A, 61-10561 have overlapping irrigation components.
- Rights 61-12185, 61-12203, 61-12205 have overlapping irrigation components.
- Rights 61-7206D have overlapping irrigation components.
- If approved all nine rights within this transfer will have condition X27 added to describe the individual acre limit within the PPU.

POD overlap –

- All rights within this transfer propose to share the same five wells. No other POD overlap exists.
- Department records indicate well 307029 drilled in 1997 is located in 04S, 06E, Sec 26. The well log describes the well in the NWNE. However, conversations and documentation from the applicant have identified this well as being located in the NENW and have stated no well exists in the NWNE of said property. The Departments records have been updated to reflect the correct well location.
- The condition on rights 61-7114, 61-2207A, 61-2207B, 61-7262A, and 61-10561 limiting the POD authorized in the NESE of S4, T04S, R06E to a rate of 5.0 cfs will be removed. The condition was added to the rights through transfer 76782 because the transfer fee submitted was based on the proposed maximum diversion rate of 5.0 cfs from the proposed well. Transfer 80749 was submitted with a fee based on the total diversion rate authorized under each right. If Transfer 80749 is approved, the limiting condition will be removed.
- Conversations and documentation from the applicant place only five wells existing on the property associated with this transfer.

Injury to Other Water Rights:

There should be no injury to other water rights under this transfer as long as the new right holder abides by the amount of water that is appurtenant to this property.

Enlargement of Use:

No enlargement should occur under the proposed transfer application. New irrigation water is not being sought under the proposal.

Local Public Interest:

It is within the local public interest to allow property owners to develop their property as long as the application is processed without issues.

Beneficial Use/Conservation of Water Resources:

The application proposes beneficial use consistent with conservation of water resources in Idaho.

Legal Notice:

Pursuant to Section 42-222, Idaho Code, the Department has discretion to provide public notice as deemed appropriate.

The water right changes proposed through this transfer application do not appear to change the effect on the original or hydraulically connected water source or affect other water rights. IDWR policy dictates the season of use on the face of irrigation rights will not be increased as the proposed period of use change requests. Instead, IDWR policy states a standard shoulder season condition (X61) should be used to allow subordinated use of the right to avoid injury and/or enlargement. The period of use will not change on rights 61-7114, 61-7206D, 61-7262A, 61-10561, 61-12185, and 61-12205; instead, X61 will be maintained as a condition on the rights and will be added to right 61-12203.

Considering the period of use on the face of the rights is not changing, and there is no hydraulic affect likely from the POD and POU changes proposed, no publication is necessary. Because the rights are within Water District 161, the Department requested comments from the watermaster.

Summary of Application Approval / Denial

The application is consistent with criteria of I. C. § 42-222 and should be processed. Assuming protests are not filed and/or other information does not contradict the above analysis, the application can be approved as reflected by the draft approval.

MEMORANDUM

TO: Transfer Memo 78279
FROM: Patrick Kelly
DATE: 11/9/15
SUBJECT: Combined use limit review.

Current combined use limits for 61-12186, 61-12204 & 61-12206 state: 4.30 cfs, 1,465.0 af and 210.7 acres within a 366.5 acre PPU. Going back and tracking where this came from, I found that the three rights mentioned above come from an ownership change completed in 2008. The parent rights of 61-7097, 61-7262B & 61-7299 carry a combined limit of 6.53 cfs, 2,226.4 af and 556.6 acres on the issued decree.

An assignment of water rights was received showing the Ketterlings received a 65.85% share of the three parent rights in rate, volume and area. 65.85% of each parent right was then assigned in the name of TLK Properties LLLP. 65.85% of the parent right combined use limit should have resulted in a diversion rate of 4.3 cfs, 1,466.1 af and 366.5 acres. Instead, a combined use limit of 4.3 cfs, 1,465.0 af on 210.7 acres was issued post ownership change. The 210.7 acres matches the individual limit of 61-7097. It is my belief that the error was made by Department staff when they created the combined limit of 210.7 acres. A limit of for 366.5 acres should have been issued to match the 65.85% share of 556.6 acres.

The remaining 34.15% was issued to Frank Tiegs LLC during the ownership split. A combined use limit in conditions state that 61-12185, 61-12205 and 61-12203 shall not exceed 2.22 cfs, 760 af and 190 acres. This matches the 34.15% split of the parent rights. This confirms that a combined use limit of 366.5 acres should correct the 210.7 acre limit and that an expansion of any right by doing so will not result from such a change.

See the attached table breaking down the water right split.

Parent WR	Max Rate (cfs)	Max Vol (af)	POU (ac)

Assignment of Water Rights

This Assignment of Water Rights is entered into this 12th day of June, 2008, between **Trekkel 12.5 acres, LLC**, an Arizona limited liability company as to an undivided 21.87% interest, **Anthony G. Bagneschi, PC 401K Plan** as to an undivided 8.60% interest, **Bryan K. Waggoner, PC 401K Plan** as to an undivided 8.60% interest, **KU Investments LLC**, a Nevada limited liability company as to an undivided 15.05% interest, **Boise 2730, LLC** as to an undivided 13.33% interest, **Anthony Bagneschi**, a married man as to an undivided 11.12% interest, **Bryan Waggoner**, a married man as to an undivided 12.72% interest, and **Ryan Kealy**, a married man as to an undivided 8.71% interest (collectively "Assignor") and **Terry L. Ketterling and Linda K. Ketterling**, husband and wife, whose address is 475 East 16th North, Mountain Home, Idaho 83647 ("Assignee").

By executing hereunder, Assignor does hereby assign its right, title, and interest in and to the following water rights:

1. Water Right 61-10770 in its entirety;
2. 65.85% of Water Rights 61-7097, 61-7262B, and 61-7299, including, but not limited to, the places of use, diversion rate (65.85% of 6.53 CFS), volume of use (65.85% of 2,226.4 AFA), and acre limit (65.85% of 556.6 acres), and the points of diversion for said water rights that are located in Section 35 of T. 4 S., R. 6 E., Boise Meridian, Elmore County Idaho.
3. Grantor conveys 53 1/2 shares of the South Elmore Irrigation Company.

NICK MILLER
WATER DISTRICT #161

RE: Application for Transfer No. 80749

Dear Watermaster:

The Idaho Department of Water Resources (IDWR) is seeking written comment and/or recommendations from you regarding the above referenced water right application. Please review the attached application, complete the attached recommendation form, and return to me by **April 24, 2017**. IDWR will assume you do not object to this application if a timely response is not received.

Please contact me if you have any questions regarding this matter.

Sincerely,
Rachel Sommer | Water Resource Agent
Idaho Dept. of Water Resources | Western Regional Office
208.334.2190 | 2735 Airport Way, Boise ID 83705

Rachel,

See the attached map of the five wells for transfer 80749. I sent a map with only the proposed PPU on it and also a map with the current PODs identified by IDWR and had the farm manager identify where the current wells are located.

Let me know if you need additional information to proceed with this transfer.

Subject: RE: Transfer Application 80749 - Frank Tiegs LLC
Attachments: POD's and Well Logs.pdf

Greg,

Part 1B.3 and Part 1B.5a of the transfer application are incomplete. A description of the diverting works, and when applicable tags numbers, are required. The information is necessary for the Department to update and connect all records. This information is also used to determine when well upgrade fees are required. There are ten wells recorded on the property associated with this transfer. You stated below that there are only five wells associated with the property in this transfer. If this is correct we may need to schedule an inspection for well inventory purposes.

It appears the well logs you submitted do not coincide with the amended Exhibit A and proposal map you submitted. Well 5 is described as being located in the NWNE of section 26 and the original proposal map also identifies a POD in this quarter-quarter. The amended Exhibit A and proposal map you submitted shows Well 5 being located in the NENW of section 26. Please let know if you would like to amend your application or proceed clarifying the correct well location is in the NENW of section 26.

Sincerely,

Rachel Sommer | Water Resource Agent

Rachel,

I have attached the well logs that I was able to find on the IDWR data base.

Is there a particular reason you asked for this information? It is not normally asked for by IDWR or provided in transfer applications.

To: 'Greg Sullivan'
Subject: RE: Transfer Application 80749 - Frank Tiegs LLC

Good Afternoon Greg,

Please submit further documentation identifying the five existing wells proposed as points of diversion through this transfer. This can be accomplished by providing well tag no's, well id no's, well log reports, etc.

Sincerely,

Rachel Sommer | Water Resource Agent
Idaho Dept. of Water Resources | Western Regional Office
208.334.2190 | 2735 Airport Way, Boise ID 83705

Sommer, Rachel

To: Sommer, Rachel
Subject: RE: Transfer Application 80749 - Frank Tiegs LLC
Attachments: Scan021418174.pdf

Rachel,

See the attached document.

The transfer does intend to change the period of use of water rights 61-7114, 61-7206D, 61-7262A, 61-10561, 61-12185, 61-12203, and 61-12205 to 3/15 through 11/15. Which would make all of the periods of use the same for the water rights applicable to this farm.

The attached Part 1 Continued contains corrections to the volumes of 61-7114 and 71-7262A and the 1570.0 acre PPU.

Exhibit A and the aerial map of the farm identifying the PODs has been amended. The original map and exhibit A listed the PODs that are listed on the water rights for this farm. The farm manager verified that there are only 5 wells on this farm and they are described in the amended Exhibit A and the amended aerial map that is attached. It is intended that all of the water rights will divert water from each of the 5 PODs.

Please let me know if I can help further with the processing of this transfer.

Thank you,

Greg Sullivan

Subject: Transfer Application 80749 - Frank Tiegs LLC
Attachments: Application for Transfer 80749.pdf

Good Morning Greg Sullivan,

The purpose of this email is to request clarification from you pertaining to transfer application 80749 submitted on March 7, 2016 in the name of Frank Tiegs LLC. Please address the following items.

1. Part 1A.2 of the application is incomplete. Part 1A.1 identifies change to the point of diversion, period of use, and place of use; Part 1A.2 describes the place of use change only. Confirm the point of diversion change is to have the nine rights within this transfer authorized to divert water from any of the eight wells described on Exhibit A attached to the application. Also confirm the period of use change is to affect rights 61-7114, 61-7206D, 61-7262A, 61-10561, 61-12185, 61-12203, and 61-12205.
2. Amend Part 1B.1 of the application. It appears the rate and volume amounts for right 61-7114 and 61-7262A have been interchanged. Right 61-12205 should list a rate of 0.20 cfs instead of 0.02 cfs. The total amounts authorized should not be affected by the amendments.
3. Amend Part 1B.4 of the application or Attachment #7b (proposal map). The application describes a PPU of 1600 acres though the proposal map only identifies 1570 acres. The discrepancy appears to be within the SESW of Sec 23 in T40S, R06E; the application describes forty acres whereas the proposal map identifies only ten acres.
4. Right 61-7206D currently describes a point of diversion authorized in the NWSW of Sec 24 in T04S, R06E. This quarter-quarter is not described on Exhibit A of the application though the NWNE is. If this was in error, please amend Exhibit A to describe the correct quarter-quarter. If the description is correct, please describe what well is to be used or state that a new well is to be constructed.
5. Amend Exhibit A of the application or Attachment #7b (proposal map). The proposal map illustrates nine points of diversions though only eight are described on Exhibit A of the application.

Please let me know if you have questions.

Sincerely,

Rachel Sommer | Water Resource Agent

Re: Frank Tiegs LLC

Dear Mr. Miller:

Frank Tiegs LLC is submitting a transfer application at this time that is proposing to combine all the existing water rights on this farm into a permissible place of use. This transfer will also update the POU of these water rights to match the current irrigation practices on the farm.

The well and mainlines systems are currently operating as one hydraulic system that provides irrigation water to the entire farm.

The ownership, beneficial use and period of use will not be changing with this transfer.

Please copy our office on all correspondence regarding this application.

Sincerely,

Greg Sullivan, M.S., Engineer
