 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

Water Bank Lease Application Explanation:

This right is for hot ground water supplemental to surface water under water right 63-365. Historically, the hot ground water under water right 63-8627 is injected, cooled and delivered through the surface water system. Because the surface water source is undependable and impractical to use in a pressurized irrigation system, it has been offered to the Bank for lease. To prevent unstacking, this right is being offered also as requested by the Department.
