

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

WATER SUPPLY BANK RENTAL AGREEMENT NO. 128

This is to certify that:

IDAHO CUMO MINING CORP
125 MILL ROAD
PO BOX 516
HORSESHOE BEND, ID 83629

RECEIVED

APR 05 2017

DEPARTMENT OF
WATER RESOURCES

filed an application to rent water from the Water Supply Bank ("Bank"). The Idaho Water Resource Board ("Board"), being authorized to operate a Bank and to contract by and through the Director of the Idaho Department of Water Resources ("Director, Department") for rental of water from the Bank, agrees to rent water as follows:

Summary of Water Rights or Portions Rented from the Bank

Water Right No.	Priority Date	Source	Diversion Rate (CFS)	Diversion Volume (AF)
63-2338	11/12/1919	GRANITE CREEK	0.670	10.0
Combined Rental Totals			0.670	10.0

Term of Rental: This rental shall take effect when all parties have signed it and shall continue in effect until December 31, 2017

Annual Rental Fee:

2017: \$170.00

The full fee for the rental of the above-described right is \$170.00 for 2017. The rental fee includes an administrative fee of \$17.00 for 2017.

Detailed water right conditions are attached.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
WATER SUPPLY BANK RENTAL AGREEMENT NO. 128

The undersigned renter agrees to use the water rented under this agreement in accordance with the Water Supply Bank rules and in compliance with the limitations and conditions of use described in this agreement:

Signature of Renter

RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
4. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
5. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
6. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
7. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
8. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.

9. Prior to the diversion and use of water under this approval, the right holder shall comply with applicable water quality permitting requirements administered by the Department of Environmental Quality or the Department of Agriculture.
10. The right holder shall comply with any bonding requirements for matters administered by the Department of Water Resources that are applicable to the use of water under this right.
11. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).
12. This rental is subordinated to all water rights diverting from Grimes Creek between the confluence of Granite Creek and Grimes Creek and the renter's points of diversion.

STATE OF IDAHO
WATER RESOURCE BOARDAPPLICATION TO RENT WATER
FROM THE BOARD'S WATER SUPPLY BANK

RECEIVED

JAN 27 2017

DEPARTMENT OF
WATER RESOURCESApplicant Name: Idaho Cumo Mining Corp.

Is this application being submitted with a lease application as a lease/rental package?

Yes ☒ No ☐

If yes, specify companion water rights in Section 4

This application must be completed according to the minimum requirement checklist below. This checklist is part of the rental application and must be included with the rental application. Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.

Rental applications should be submitted well in advance of the desired start date for the use of rental water. Rental applications may be processed as early as November 1 of the year prior to the intended use of rental water. Any rental application received on or before November 1 for use in the next year will be assigned a received date of November 1. Rental applications submitted more than one year in advance of the proposed start date for the use of rental water will not be accepted and will be returned to applicants. Rental applications may be returned to applicants if the desired start date for the use of rental water cannot be accommodated by the Water Supply Bank. Rental requests will not be accepted once the rental season of use period has concluded.

One rental application per beneficial use of water. For multiple beneficial uses of water, separate rental requests should be submitted for each unique beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources.

For additional instructions on completing a rental application, visit the Bank's website at http://idwr.idaho.gov/water_supply_bank.

MINIMUM REQUIREMENT CHECKLIST

Check All Items as Either Attached (Yes) or Not Applicable (N/A)

		Yes	
		☒	Completed <i>Application to Rent Water from the Board's Water Supply Bank</i>
		☒	Confirmation that this form has been printed single sided, per requirement of the Water Supply Bank
Attachment	N/A	Yes	
2		☒	A map showing the proposed point(s) of diversion, place(s) of use, and water diversion and distribution systems proposed to be used with your rental request
3A	☒	☒	Detailed information on a proposed use of rental water
3F	☒	☐	Authorization from the owner/operator of the rental point(s) of diversion
3H	☒	☐	Water modeling to account for the impacts of the rental request
3J	☒	☐	Documents justifying a rate of flow greater than 0.02 cfs/acre
3K	☒	☐	Authorization from the owner/operator of the property at the proposed rental place(s) of use
4B	☒	☐	Explanation of how the rental water will sufficiently accomplish your rental purposes
4C	☒	☐	Explanation of consumptive use amounts for water rights experiencing a change in nature of use

Application to Rent Water (Continued)

1. CONTACT INFORMATION

A. Applicant Idaho Cumo Mining Corp.

Mailing Address PO Box 516 125 Mill Road Horseshoe Bend ID 83629
Street City State Zip Code
 Email Address joepooch@live.com Phone Number (208) 589-3811

B. Is this application being completed by an authorized representative on behalf of the applicant? Yes ☒ No ☐
 If yes, representatives (includes company employees if the applicant is a corporation, as well as legal counsel or consultants) should provide their information below if they desire to be included on correspondence with the rental applicant.

Representative Joey Puccinelli Professional Title Project Manager/Geologist
 Organization Idaho Cumo Mining Corp. Relationship to Applicant Employee
 Mailing Address PO Box 516 125 Mill Road Horseshoe Bend, ID 83629
 Email Address joepooch@live.com Phone Number (208) 589-3811

2. MAP

Create a map of the proposed point(s) of diversion, place(s) of use and water diversion, delivery and distribution systems. Make sure the rental place of use is outlined and annotated with legal land descriptions (Township, Range, Section and Quarter-Quarters) or with GPS coordinates. For irrigation purposes, mark the number of acres you desire to irrigate. Attach the map to this application and label it Attachment 2.

3. DESCRIPTION OF PROPOSED USE FOR RENTAL WATER

A. Describe why you desire to rent water and provide a detailed description of your proposed use. If the proposed use is not for irrigation, describe in detail how you determined the amount of rental water required. If the space below is insufficient, attach additional sheets as required and label them Attachment 3A:

In support of mineral exploration on the Cumo molybdenum project (core drilling). Upper Grimes Creek area,
Boise County. Initial core drilling exploration and water use will be on private ground until USFS permit is
approved to conduct drilling on USFS land.

B. Enter the desired and/or minimum rates of flow, volume, or irrigable acres requested for your rental purposes:

Desired Rate (Cubic Feet/Second)	Desired Volume (Acre-Foot)	Minimum Rate* (Cubic Feet/Second)	Minimum Volume* (Acre-Foot)	Desired Acres (if applicable)
0.67 CFS	10.0 AF	CFS	AF	AC

* Sometimes water rights provide an exceptionally low rate per acre and/or low volume per acre. This section is meant to establish an acceptable range of water sufficient for your proposed water use. Please see question 4B and complete if necessary.

C. This section must be completed in full. Enter the proposed start date and latest possible start date for using rental water as well as the number of years you would like to rent water. The latest possible start is the latest possible date by which you would be willing to pay for a rental and be able to benefit from utilizing rental water.

Desired Start Date (month/day/year)	Latest Possible Start Date (month/day/year)	*Mark Desired Rental Duration (Calendar Years)					**Applicant's preference if rental application cannot be processed prior to the latest possible start?	
4/1/2017	4/15/2017	☒ 1	☐ 2	☐ 3	☐ 4	☒ 5	☒ Process application as soon as possible	☒ Return application to applicant

* The number of years permissible for a rental is subject to the lease contract duration for the water right(s) being rented.

** Per Idaho Code 42-201, it is unlawful to divert or use water without a valid water right. Water Supply Bank rental applicants are not authorized to utilize rental water prior to the execution of an approved rental agreement. Rental requests may be returned to applicants if no water is available from the Bank to fulfill a rental request.

STATE OF IDAHO
WATER RESOURCE BOARD

Application to Rent Water (Continued)

- D. Describe your water distribution system and how rental water will be delivered from the point(s) of diversion (POD) to the proposed place of use (POU):

Water truck and honda WT30x trash pump / equivalent w/ 3/32" intake screen. Beam 435 high pump / equivalent and waterline system. Pumps will run intermittently as needed to supply water to the core drilling operations.

- E. Describe the physical type (pump, headgate, etc.) and location of the POD from which rental water is proposed to be diverted:

POD Description	Water Source	Other Water Rights Diverted from this POD
Honda WT30x/equivalent	Grimes Cr. & unnamed trib.	TP-63-118, TP-63-119, TP-63-120
Beam 435/equivalent	Grimes Cr.	TP-63-118, TP-63-119, TP-63-120

If the POD(s) above are located where water is turned into a canal, lateral or ditch, or if they are located on your property but are serviced by water that is delivered via a canal, lateral or ditch, your rental request must include documented authorization from all relevant canal companies, irrigation districts and/or water delivery entities, confirming that they consent to your diversion of water from their system.

- F. Has documented consent from all relevant water delivery entities been obtained? Yes ☒ N/A ☐
If yes, include documented consent as Attachment 3F.

- G. Do any POD(s) identified in Question 3E divert from a water source that may require water modeling? Yes ☐ No ☒
Refer to the Water Modeling Requirements Information Sheet to determine if a rental POD may require water modeling.

- H. Has water modeling been provided with your rental request? Yes ☐ N/A ☒
If yes, label modeling Attachment 3 H.
Rental applications that require modeling will be returned if modeling is not provided.

- I. Specify the desired beneficial use of water and the requested season of use or number of acres required:

- ☐ Irrigation _____ (number of acres) Duration: Subject to IDWR standard seasons of use
☐ Commercial from: _____ (mm/dd) to: _____ (mm/dd)
☐ Stockwater from: _____ (mm/dd) to: _____ (mm/dd)
☐ Industrial from: _____ (mm/dd) to: _____ (mm/dd)
☒ Other: Minerals Exploration from: 04/15 (mm/dd) to: 12/15 (mm/dd)

- J. For irrigation uses, do you propose to divert water at a rate greater than 0.02 cfs/acre? N/A ☒ Yes ☐ No ☐
If yes, justify the rate of flow and attach any supporting documents as Attachment 3J. Justification may include information on soil composition, conveyance losses, crop type, irrigation systems, public access areas, etc. A rate of 0.03 cfs/acre is permissible for irrigation of 5 acres or less.

- K. Do you own the land at the proposed rental place of use (POU)? Yes ☒ No ☐
If no, attach documentation from the POU owner/operator confirming your authorization to use the POU and label it Attachment 3K.

- L. List all other water rights and sources of water at the rental place of use for the same purpose, including privately owned water rights and water received from a municipal supplier, an irrigation district, a canal company or any other water delivery entity. Explain why additional water is required:

TP-63-118, TP-63-119, TP-63-120. Drilling mineral exploration holes within W1/2 of Sec. 17 R. E and E1/2 of Sec. 18 R. 6E

**STATE OF IDAHO
WATER RESOURCE BOARD**

Application to Rent Water (Continued)

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request. For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
63-2338	Core Drilling	0.67	10.0	NA		0.67	10.0	NA
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	0.67 CFS	10 AF	NA AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it Attachment 4B:

For core drilling: water is pumped from the source, sent to the drill rig, used in the coring process, and either allowed to infiltrate through a sump or pumped back into the ground.

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it Attachment 4C:

STATE OF IDAHO
WATER RESOURCE BOARD

Application to Rent Water (Continued)

5. ADDITIONAL INFORMATION

- A. Is this the first time that rental water is being requested for this purpose at the rental place of use? Yes ☐ No ☒

If no, list previous rental requests/agreements and explain why you have not secured a permanent water right for your needs:

Temporary permits approved from IDWR for 5 years (2012-2016). A new lease application is now required by IDWR.

- B. Have you or do you intend to submit an application for permit or transfer proposing a similar use as this rental? Yes ☒ No ☐

If yes, describe:

Temporary permits already approved by IDWR

- C. Was this rental application submitted in response to a Notice of Violation (NOV) or a pending NOV? Yes ☐ No ☒

If yes, describe the date and location of the NOV.

- D. Additional Information

Idaho Cumo Mining Corp. wholly owns the Cumo project and was formally know as Mosquito Mining Corp. All prior applications and permits were under Mosquito Mining.

DECLARATION

I hereby assert that the information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval. I understand that if this rental application is approved, it will be subject to the provisions of Section 42-1766, Idaho Code and all applicable state and federal laws. I understand that the submission of a rental application provides no guarantee for approval of a rental agreement. I also understand that, per Idaho Code 42-201, it is unlawful to divert or use water without a valid water right and that I am not authorized to utilize water as proposed in this application prior to the execution of an approved rental agreement.

Attachment 5A

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TEMPORARY APPROVAL OF WATER APPROPRIATION

(For a use not intended to become an established water right, not to exceed a total diverted volume of five (5) acre-feet, and not to exceed one (1) year duration in accordance with Section 42-202A, Idaho Code.)

Name of applicant: Mosquito Mining Corp.Phone: 208-462-2197Address: PO Box 767, Garden Valley, ID. 83622Email: k.fend.cumo@gmail.com

1. Source of water: Grimes Creek, Upper Region Tributary tributary to Grimes Creek
2. Location of point(s) of diversion:

TWP	RGE	SEC	GOVT LOT	1/4	1/4	1/4	County	Source	Local name or tag #
8N	6E	18		NE	SW	NE	Boise	Unnamed tributary of	
								Grimes Creek.	

3. Location of place of use:

TWP	RGE	SEC	NE				NW				SW				SE				Totals
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
8N	6E	17					X	X	X	X	X	X	X	X					
8N	6E	18	X	X	X	X									X	X	X	X	

4. Describe proposed use of water: In support of mineral exploration (core drilling) on CuMo molybdenum project, Upper Grimes Creek area, Boise County. Plan of operations filed with Idaho City Ranger District, Boise National Forest.
5. Amount of water:
Maximum rate of diversion 0.134 cfs or 50 gpm.
Maximum daily volume 0.0202 AF; total volume 5.0 AF.
6. Duration of diversion: from May 1st, 2012 to December 31st, 2012
Day-month Day-month
7. Describe proposed diverting works: Honda WT30x trash pump or equivalent w/ 3/32" intake screen
8. a. Who owns the property at the requested point of diversion? Administered by Boise National Forest
b. Who owns the land to be irrigated or place of use? Administered by Boise National Forest
c. If the property is owned by a person other than the applicant, describe the arrangement allowing access to the water:
Project access road; Access controlled by locked gate; Mineral exploration area.
9. Additional remarks: Maximum daily pumping of 6,500 gallons. Pump will run intermittently as needed to supply water to the core drilling operations. Pump will be equipped with a 3/32" intake screen submerged in stream pool.

I hereby acknowledge that I assume all risk if the diversion and use of the water under this approval injures other water rights. I certify this is a temporary use and that I am not seeking a continuing right to use water.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that the department has examined this application for temporary approval to use water under the provisions of Section 42-202a, Idaho Code, and has determined that:

- ☒ a) The application for temporary approval should be approved, since
1. The temporary approval can be properly administered.
 2. Other water sources are not readily available.
 3. The approval is in the public interest.
 4. The approval will not injure known public values associated with the water source or any known water rights.
 5. Basins 77, 78, & 79- the location is not in the Wild & Scenic River Designation
- ☐ b) The application for temporary approval should be denied.

This application is therefore hereby:

- ☐ a) DENIED
- ☒ b) APPROVED, subject to the following conditions:
1. Diversion and use of water under this approval is subject to all valid existing water rights.
 2. The applicant assumes all risk the use of the water under this approval may injure other water rights.
 3. This approval authorizes a maximum diversion rate of 50 cfs gpm
 4. This approval does not grant a right-of-way across the land of another, does not create a continuing right to use the water and may not be used in connection with a use which requires a continuing water supply.
 5. The department may cancel this approval at any time if the department identifies injury to other water rights.
 6. This approval expires on 12/31/12.
 7. This approval does not create a continuing right to use water.
 8. The holder of this temporary permit shall not divert at a rate or in a manner that will significantly reduce the flow in the water source or otherwise adversely affect fish, wildlife or other public values. At no time shall the diversion exceed 25% of the total creek flow
 9. 1/4 inch mesh screen shall be installed on the pump intake
 10. Direct discharge of waste water/slurry into rivers, creeks, or streams is not authorized.
 - ☒ 11. The water use approved herein is subject to and shall conform to the terms of the Forest Service approved Plan of Operations for this location.
 - ☒ 12. Mitigation for water losses will be the rental of 7.5 acre foot of water from the Boise River Rental Pool, contact Rex Barrie, Watermaster, phone 208-908-5480
 - ☒ 13. Temporary Appropriations TP-63-119 and TP-63-120 combined shall not exceed 5 acre-feet total in volume.
 - ☒ 14. Site activities must comply with Idaho Water Quality Standards

DATED this 10th day of May, 20 12.

BOISE RIVER RENTAL POOL LEASE AGREEMENT
FOR 2012

ENTERED

MAY 14 2012

STATE OF IDAHO
WATER DISTRICT #63

The Committee of Water District No. 63 being authorized pursuant to Idaho Code Section 42-1765 to lease stored water which has been provided to the Boise River Rental Pool by water users who own reservoir space and have excess supplies for the current year, does agree to sell Mosquito Mining (entity), 10 A.F. of water requested for Mineral Exploration (use). This agreement is subject to the adopted Rules and Regulations of the Boise River Rental Pool and execution of same by the party herein named.

Upon receipt of \$ 140.00 and the information requested below, the Boise River Watermaster will release to you from storage, at the rate you specify 10 A.F. of stored water between May 11th and Dec. 31st of 2012.

Description of point of diversion:

Located in 1/4 1/4, Sec. , T. , R. ;

Other Charlotte Creek & Headwaters of Grimes Creek

Pump H.P. Lift

Headgate (canal name if appropriate)

Description of place of use:

Legal Description: West 1/2 of Section 17 T8N, R6E & East 1/2 Section 18 T8N, R6E

Total number of acres irrigated

Dated this 11th day of May 2012.

A. DESCRIPTION OF WATER SOUGHT FOR RENT

1. Maximum Flow Rate (cfs) Maximum Volume (ac-ft) Nature of Use Period of Use
.668 10 Mineral Exploration 6/1/2012 to 12/15/2012
 _____ to _____
 _____ to _____
 Total: .668 10

2. Source of water Grimes Creek and unnamed tributary tributary to Mores Creek

3. Point(s) of Diversion:

Twp	Rge	Sec	Lot	¼	¼	¼	County
8N	6E	18		NE	SW	NE	Boise
8N	6E	8		SE	NW	SW	Boise
8N	6E	19		SE	SE	NW	Boise

4. Lands to be irrigated or place of use:

Twp	Rge	Sec	NE ¼				NW ¼				SW ¼				SE ¼				Totals
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
8N	6E	17					X	X	X	X	X	X	X	X					
8N	6E	18	X	X	X	X									X	X	X	X	

If the use is for irrigation, show total number of acres proposed through rental. Total Acres 320

B. OWNERSHIP

1. Do you own the land at the proposed point of diversion? Yes ☐ No ☒
 If no, list owner, contact information, and provide documentation of the authority to use the proposed point of diversion. U.S. Forest Service, Finding of No Significant Impact, letter attached
2. Do you own the land at the proposed place of use? Yes ☐ No ☒
 If no, list owner, contact information, and provide documentation of the authority to use the proposed place of use. U.S. Forest Service, Boise National Forest

C. MAP

Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described by this application in section A. Include legal description labels.

D. GENERAL INFORMATION

1. Please provide a description of the proposed diversion system. Pump water into tanker trucks from Grimes Creek and unnamed tributaries
2. Describe any other water rights diverted through the same point(s) of diversion or used for the same purpose(s) as described above. TP-63-118, TP-63-119, TP-63-120
3. Will the proposed place of use receive water from any other source? Yes ☐ No ☒
If yes, describe. Drilling Mineral Exploration holes within W1/2 of Sec. 17 R. E and E1/2 of Sec. 18 R. 6E
4. If the proposed use is not for irrigation, please provide a detailed description of the proposed use and how you determined the amount of water required. Attach additional sheets if needed. Mineral Exploration Core drilling
5. Are there any other applications pending before the Department, such as an application for permit or transfer, for the same use(s) proposed by this rental? Yes ☒ No ☐
If yes, describe. Temporary Permits already approved by IDWR
6. Was this rental application submitted in response to a Notice of Violation or a pending Notice of Violation? Yes ☐ No ☒
If yes, describe. _____

E. RENTAL TERM

1. Do you wish to rent water from the Board's bank for more than one (1) year? Yes ☒ No ☐
If yes, please specify the number of years desired through proposed rental. 5

I hereby assert that the information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

If this application is approved, the applicant agrees to the following:

1. The use of water under this agreement shall be subject to the provisions of Section 42-1766, Idaho Code.
2. Renter shall comply with all applicable state and federal laws while using water under this agreement.
3. Renter shall hold the Board, the Director, and the state of Idaho harmless from all liability on account of negligent acts of the renter.
4. The Director may terminate diversion of water if the Director determines there is not a sufficient water supply for the priority of the right or portion thereof being rented.
5. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
6. Renter is not authorized to use water proposed by this application until the rental fees are paid in full and the renter receives an executed copy of the agreement signed by the Director.

Date: FEB 11 2011

Greetings:

Enclosed is the Decision Notice/Finding of No Significant Impact (DN/FONSI) for the CuMo Exploration project. You are receiving this letter because you provided comments during the 30-day notice and comment period on the proposed action for the project (as documented in the environmental assessment (EA) last summer, or otherwise expressed interest in the project. The DN/FONSI documents my decision to implement Alternative B (Reduced Roads Alternative).

Key features of my decision are outlined below:

- Mosquito Gold Corporation (Mosquito) will conduct a 5-year mineral exploration project on the CuMo claim block (Project Area), under a Plan of Operations, including terms and conditions, approved by the Forest Service. More specifically, the exploratory operation will focus on delineating the extent of a copper/molybdenum mineral deposit that will allow subsequent modeling of the subsurface geology and associated structure and mineralization.
- The exploration drilling program will be result-driven, so that holes will be drilled to expand and complement the existing database. Consequently, it is difficult to predict the exact sequence of events, exact road locations/alignments, when any particular hole might be drilled, or at what orientation. It is possible that not all of the temporary roads and/or drill pads in the design will be constructed. Additionally, the exploration program may end earlier than anticipated. Nonetheless, my decision captures our best estimate of the sequence and location of actions.
- The operating season will be approximately April 15 to December 15. The Forest Service will review special circumstances that may require date adjustments.
- Up to 10.2 miles of new temporary roads will be constructed, and 4.7 miles of previously-constructed road will be permitted as temporary road, for a total of 14.9 miles of temporary road. A total of 16 stream crossings will be used, including four new crossings on the new temporary roads to be constructed, five on the 4.7 miles of previously-constructed temporary road, and seven on existing NFS roads. In constructing temporary roads, natural routes and topographic features would be utilized and temporary roads would be located on ridges wherever possible.
- A total of 60-80 percent of the proposed temporary roads will be constructed and operational at any one time. As a result, the total length of the temporary roads in service at any given time will be reduced by 20 to 40 percent. Concurrent reclamation (final reclamation conducted during exploration operations) and interim stabilization will be implemented in order to remain within 60-80 percent threshold for permitted temporary roads open at one time.
- Up to 137 drill pads will be developed. At each drill site, a small drill pad and mud pit will be developed so that equipment and vehicles are able to access each site and drill fluids can be retained onsite. Appropriate erosion control and Best Management Practices (BMPs) will be installed around drill pads. Drill holes will either be vertical or angled holes designed to best investigate the subsurface geology. Holes will range in length from 1,500 to 3,000 feet.

- Up to 259 drill holes with various orientations and inclinations will be drilled from the drill pads, utilizing a truck, wagon, or skid-mounted diamond coring machine. The drilling will be completed in a series of stages, initially with wide-spaced drilling followed by infill drilling for reserve definition. Although most of the proposed drill holes will be vertical, geology may dictate angled drilling. Most drill pads will have more than one hole drilled from them. Drilling operations will be conducted on a 24-hour schedule.
- The primary access to the project area will be from NFS roads 380F, 382B, 382C, and 382C4 on the southwest side of the project area. Access to the project area via NFS road 397B will be for emergency use only.
- All temporary roads will be reclaimed (10.2 miles of newly constructed and 4.7 miles of existing) as close as practical to their original topography, and affected areas would be revegetated to forest standards, by the end of the reclamation period (e.g., up to 2 years after the 5-year exploration period).
- Reclamation or obliteration of the temporary roads and drill holes will consist of earthwork and revegetation of all surface disturbances to stabilize the reclaimed areas and to achieve post-exploration land use pursuant to 36 CFR §294.12(b)(7). As described above, reclamation of the mud pits will include backfilling and recontouring the pits as drilling is completed. Temporary roads constructed on steep slopes will be backfilled and recontoured to the approximate original contour. Temporary roads constructed on moderate and shallow slopes will be reclaimed using a combination of partial contouring and ripping as site conditions warrant. All disturbed areas will be seeded with a combination of range and reclamation species that are suitable for soil stabilization and reclamation projects in the Boise NF.

In making my decision, I carefully considered your comments, along with the environmental analysis documented in the EA, which showed the difference in environmental effects between Alternatives A and B. After deliberation, I concluded that Alternative B meets Mosquito's need to acquire detailed geologic data within the CuMo molybdenum prospect in order to determine the extent of mineral resources, while reducing potential impacts to other resources, especially erosion and sedimentation. The "Rationale for Making this Decision" section of the DN/FONSI summarizes how I considered public comment, with more detail provided in Attachment B of the DN/FONSI.

The DN/FONSI is also available at the Boise National Forest Web site (<http://www.fs.usda.gov/boise> - click on "Cummo Mineral Exploration" in the right-hand bar) or by contacting the Boise NF at the address and phone number above.

For further information, contact Jeff Alexander, Forest Minerals and Engineering Officer, Boise National Forest, 1249 South Vinnell Way, Suite 200; Boise, ID 83709; or phone 208-373-4100.

Sincerely,

 CECILIA R. SEESHOLTZ

**STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
WATER SUPPLY BANK RENTAL AGREEMENT**

This is to certify that: **MOSQUITO MINING CORP**
PO BOX 767
GARDEN VALLEY ID 83622
(208) 866-8579
K.FEND.CUMO@GMAIL.COM

filed an application to rent water from the Water Supply Bank ("Bank"). The Idaho Water Resource Board ("Board") being authorized to operate a Bank and to contract by and through the Director of the Idaho Department of Water Resources ("Director, Department") for rental of water from the Bank agrees to rent water as follows:

Summary of Water Rights or Portions Rented from the Bank

	<u>Water Right</u>	<u>Rented Rate</u>	<u>Annual Rented Volume</u>	<u>Total Rented Acres</u>
	63-2338	0.67 CFS	10.0 AF	NA
COMBINED RENTAL TOTALS:		0.67 CFS	10.0 AF	NA

TERM OF RENTAL:

June 5, 2012, to November 30, 2012
March 1, 2013, to November 30, 2013
March 1, 2014, to November 30, 2014
March 1, 2015, to November 30, 2015
March 1, 2016, to November 30, 2016

The fee for rental of the above-described water is \$140.00 per year. An annual payment shall be received by the Department prior to March 1, the beginning of the season, each year for the duration of the rental period. The agreement will be void if payment is not received prior to the due date in a given year. To terminate the agreement prior to the end of the rental period, written notice must be received by the Department at least 30 days prior to the rental fee due date.

RENTAL FEE: \$140.00 annually

Detailed water right specific limitations and conditions attached.

The undersigned renter agrees to use the water rented under this agreement in accordance with the Water Supply Bank rules and in compliance with the limitations and conditions of use described in this agreement:

Dated this 17 day of July, 20 12.

CONDITIONS OF WATER USE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. This rental does not grant any right-of-way or easement to use the diversion works or conveyance works of another party.
5. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
6. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
7. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.

**WATER RIGHT NO. 63-2338
WATER SUPPLY BANK RENTAL AGREEMENT**

CONDITIONS OF WATER USE

8. Renter acknowledges and agrees that the Director may terminate diversion of water if the Director determines there is not a sufficient water supply for the priority of the right or portion thereof being rented.
9. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
10. Use of water under this agreement will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.
11. The renter shall install and maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).
12. Prior to the diversion and use of water under this approval, the right holder shall comply with applicable water quality permitting requirements administered by the Department of Environmental Quality or the Department of Agriculture.
13. The right holder shall comply with any bonding requirements for matters administered by the Department of Water Resources that are applicable to the use of water under this right.

**RE: REQUEST FOR RETURN OF SIGNED RENTAL AGREEMENT AND PAYMENT FOR
WATER RIGHT 63-2338**

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources ("Department") mailed a **Water Supply Bank Rental Agreement ("Agreement")** for your review and signature on March 6, 2017. The signed agreement and rental fee has not been returned to the Department.

Please sign the rental agreement and return it with the rental payment in the amount of \$170.00 within ten (10) days of this letter to complete processing. Diversion and use of the water right is not authorized under the proposed agreement until it has been signed by both the renter and the Department. Any use associated with your proposed rental request before it has been executed is considered unauthorized and, if occurring, will be subject to any necessary enforcement action.

If the signed rental agreement and fee is not received by the department within the 10-day period, the rental application will be returned, and the proposed rental right made available for other rental applicants. You can reapply to rent water from the Bank again in the future by submitting a new rental application form that will be processed in turn with other pending applications.

If you have questions regarding this matter, please contact this office at 287-4800.

Sincerely,

Debra Budd
Water Supply Bank

Subject: RE: Rental for Idaho Cumo Mining Corp 63-02338

Clay,

I apologize for taking so long to get back to you on this one. I was out of the office for unexpected surgery for over a week and I'm still playing catch up.

The water use is in a sensitive area where no appropriations are difficult to come by. However, it looks like Steve indicated in the past that the Grimes Creek water supply is "pretty good" in relation to other surface water sources in the area. However, I think you are right to be considered about enlargement and potential injury (due to move upstream on Grimes Creek drainage). But, I'm not aware of any complaints from the public alleging injury or enlargement in the past while the previous rental use was occurring. It may be difficult for the applicant to acquire water right authorization if the right they are renting is removed from the bank next year, but without knowing the applicant's future plans I'm not sure I can or should weigh in on that now. In summary, it looks ok to proceed with renewal of this rental, but the watermaster may have comments/concerns. Please let me know if you'd like to discuss at further length or you feel I'm not fully grasping the situation or ramifications.

Regards,
Angie

Subject: Rental for Idaho Cumo Mining Corp 63-02338

Angie,

We are currently processing this rental application. It was previously handled with temporary permits with mitigation rentals. You'll see some e-mails in the file between Steve and Monica on the prior rental. We may wish to discuss the future of this request. The right that has been rented, is scheduled to be released from the bank at the end of this year. Do you have any concerns/comments? Thanks.

Sincerely,
Clay Webster

**RE: APPLICATION TO RENT WATER FROM THE WATER SUPPLY BANK
WATER RIGHT NO. 63-2338**

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of \$170.00 was calculated based on the current rental rate of \$17.00 per acre-foot times a diversion volume of 0.670 acre-feet.

Please send a check for \$170.00 made payable to the Idaho Department of Water Resources, together with the signed rental agreement, within 14 days so I can complete processing. Pursuant to the Water Supply Bank Rules, 90% or \$153.00 of the rental fee will be paid to the lessor(s) and 10% or \$17.00 will be retained by the Department to offset administrative costs.

If you have any questions, please contact this office at (208) 287-4800.

Sincerely,

 Water Supply Bank

MEMORANDUM

To: Water Right 63-2338 Rental Agreement #128
From: Clay Webster
Date: 2/27/2017
Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: The department received the application to rent 0.67 cfs and 10.0 af to support mineral exploration for a mining operation from the Idaho Cumo Mining Corp on January 21, 2017. This request is for a one-year rental. This is a continuance of the rental that was approved from 2012 through 2016 in the name of Mosquito Mining Corp. The previous rental was coordinated through the regional office instead of pursuing back-to-back temporary permits.

The original agreement with the National Forest Service (NSF) was for 2012 – 2016. However, the operation was shut down after August 2012 to allow NSF and the applicant to address court imposed requirements. A new signature page was provided showing that the agreement is extended to 2018. The applicants believe they will receive another extension in the future.

The Pumps for this project are the Honda WT30x/equivalent and a Bean 435/equivalent.
The Honda WT30x has the capability of pumping 317.0 GPM
The Bean 435 has the capability of pumping 53.0 GPM
 $317.0 \text{ GPM} / 448.83 = 0.706 \text{ cfs}$
 $53.0 \text{ GPM} / 448.83 = 0.118 \text{ cfs}$
 $0.706 + 0.118 = 0.824$
They have requested 0.67 cfs

These pumps could handle the requested diversion rate.

AUTHORITY TO FILE: This application was signed by Joey Pucinelli. He is the project manager/geologist for the Idaho Cumo Mining Corporation. He has provided a letter from the Company President/CEO of the company giving him authority to sign on behalf of the company.

WATER RIGHT VALIDITY: 63-2338 was decreed in 2003. It has been leased entirely to the WSB since April 2007. I have no forfeiture concerns.

INJURY TO OTHER WATER RIGHTS: The leased water rights divert from an unnamed stream tributary to Granite Creek and Granite Creek tributary to Grimes Creek. The rental will be diverting from an unnamed stream tributary to Grimes Creek and Charlotte Creek tributary to Grimes Creek and Grimes Creek tributary to Mores Creek. Because of moving this right upstream, a subordination condition will have to be added to the rental to protect the junior rights, located on Grimes Creek between the confluence of Granite Creek and Grimes Creek to the rental PODs, from injury. No other injury concerns are noted at this time.

ENLARGEMENT OF USE: Review staff have no enlargement concerns.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The location for the rental PD is subject to Water District # 63. Comments were requested from the watermaster and the regional office.

Subject: RE: Idaho Cumo Mining Corp rental of 63-2338

Joey,

The points of diversion listed on the application are also on public land. I will need an authorization to divert water at these locations from the property owner. I will also need to find out how you calculated the rate and volume needed for the rental. This would include the amount of water needed in the core drilling activities as well as water hauling capacity of trucks used to transport water to the drilling pads and for dust abatement along with the number of trips made daily. The other issue is that you are not listed with the Idaho Secretary of State (SOS) as having signature authority for the Idaho Cumo Mining Corporation. I need you to provide documentation that gives you authority to sign the rental application on behalf of the company. According to the annual report submitted on the SOS website. It seems that the only one listed is Shaun Dykes. He would have to sign the document. In order to approve this application, we will have to place a subordination condition on the rental. This will subordinate the rental water to the points of diversion (PODs) from your location to the confluence of Granite Creek and Grimes Creek. This will address the injury concerns that we have with moving this water upstream past junior rights. If you have any questions, give me a call. Thanks.

Hi Clay,

Yes you are correct the letter is from the prior water lease agreement. For this application and for this season starting out we will be working only on the private land that we own, those are the maps that were included in the application. At this point in time for the remainder of the public land we do not have approved permits to do work on them, we are anticipating having those permits at some point in the summer. As soon as we receive permits for public land work I will get them to you immediately. For the application this year we are

looking to pull water from the same locations that we have always pulled from, but we will be doing our program on the private land we own. Any questions please let me know.

Thanks

Joey

Joey,

I am currently reviewing this rental application. I have noticed that the letter from The Boise National Forest was dated 2011 and was for a five year exploration period. Do you have a letter renewing the use of the land yet? I know that we discussed that you were pursuing all of the permissions again when you visited the office on January 27th. You can e-mail me a copy when you receive it. I will need you to provide that before I can continue with processing the rental. I will be able to hold the rental for 30 days for this information. Then I will have to return it unprocessed. Thanks.

Subject: RE: Idaho Cumo Mining Corp rental of 63-2338

Joey – attached is the signature page from the 2011 Plan of Operations (PoO) authorizing operations through August 30, 2018 (the complete PoO is 23 megabytes).

On page 10 of the September 2015 Supplemental Decision Notice/Finding of No Significant Impact (SDN/FONSI) available at

http://a123.g.akamai.net/7/123/11558/abc123/forestservic.download.akamai.com/11558/www/nepa/39340_FSPLT3_2575746.pdf, Supervisor Seesholtz states:

Prior to the Court Order issued on August 29, 2012, CuMoCo had operated approximately one full operating season; the PoO to initiate operations was approved on August 30, 2011, and drilling operations were then subsequently shutdown following the August 29, 2012, Court Order. CuMoCo has not conducted any drilling operations since that time. Thus, as part of the supplemental decision, CuMoCo will be allowed to conduct the remaining 4 years of mineral exploration on the CuMo claim block (Project Area), under an amended PoO that includes changes in terms and conditions resulting from the supplemental decision as identified below.

This statement pushed the authorization out to September 2019.

Because we were unable to conduct field work last year and most likely will be unable to do so this year, the four year exploration timeframe will shift to 2021 when the next Supplemental EA is issued later this year or early next year.
