IDAHO DEPARTMENT OF WATER RESOURCES
Proof Report

4/29/2016

Right Acre Limit: 122.0

POU Total Acres: 1,286.0

Conditions of Approval:

1. 046 Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.
2. A single new point of diversion is authorized in either Lot 4 (SWSW) or SESW, S18, T01N, R02E to provide water that shall not exceed a temperature greater than 85 degrees Fahrenheit.
3. Right holder is required to utilize cold water wells to their capacity. Low temperature geothermal water from the point of diversion in NWNE, S06, T01N, R02E, shall only be diverted at a rate equal to the remaining portion of 2.23 cfs not capable of being satisfied by cold water wells.
4. X27 This right is limited to the irrigation of 122 acres within the authorized place of use in a single irrigation season.
5. X35 Rights 63-3362, 63-7531, 63-10383 and 63-11347 when combined shall not exceed a total diversion rate of 10.77 cfs, nor a total annual maximum diversion volume of 4403.1 af at the field headgate.
6. Rights 63-3362, 63-7531, 63-10383 and 63-11347 when combined are limited to the irrigation of 619.0 total acres under the irrigation components of the rights in the 1286.0 acre place of use described above in a single irrigation season. This condition does not limit the acreage upon which wastewater from the industrial and commercial uses under the rights may be land applied for wastewater treatment purposes to satisfy water quality requirements.
7. 260 The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right for land with an appurtenant surface water right(s) to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.
8. 261 If the surface water right(s) appurtenant to the place of use is unavailable for any reason other than drought or curtailment by priority (for example abandoned, forfeited, sold, transferred, leased, used on another place of use, or disallowed by court decree), this right to divert ground water shall not be used on the land with an appurtenant surface water right(s) without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
9. R65 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
10. T17 Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
11. X61 The period of use for the irrigation described in this approval may be extended to a beginning date of 3/1 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 3/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.
12. T07 The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
13. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

14. T19 Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.
