ADDITIONAL CONDITIONS OF ACCEPTANCE

1. The water rights referenced above will be rented from the bank at the current rental rate.
2. There is no rental payment to the lessor of the water right if the right or a part thereof is not rented from the bank.
3. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. Any violation of the terms of this lease may result in enforcement procedures pursuant to Idaho Code § 42-351 for illegal diversion and use of water and may include civil penalties pursuant to Idaho Code § 42-1701B.
4. A right accepted into the bank stays in the bank until the Board releases it, or the lease term expires. A right may be released from the bank upon request, provided the Board approves the release. Unless approved by the Department, leased rights may not be immediately available for release.
5. While a water right is in the bank, forfeiture provisions are stayed pursuant to Idaho Code § 42-223(5).
6. Rental of water under this right is subject to the limitations and conditions of approval of the water right.
7. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.
8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.

9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
13. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.
14. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.
15. Rights 17-2052 and 17-7063 when combined shall not exceed the irrigation of 316.0 acres.
16. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
17. The period of use for the irrigation described in this approval for water right 17-7063 may be extended to a beginning date of 4/1 and an ending date of 10/31 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 5/1 and after 9/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than December 7, 2012.
18. The unleased portion of water right 17-2052 is limited to the irrigation of 90.8 acres within the authorized place of use in a single irrigation season.

WATER RIGHT(S) 17-2052 and 17-7063**

Jean,

I don't have any issues with the proposed WSB Lease. Because the lease proposes to dry up acres under an existing pivot, I believe the WSB staff should review aerial photos at the end of each year to ensure the acres are truly dried up.

13	Narrative: The applicant wishes to place a portion of these water rights in the Bank. 118.1 acres. This right was licensed in 1973. Transfer 78181 validated these rights. Forfeiture is not an issue. A portion of these rights was in the Bank in 2016 but not the portion being offered in this contract. There are no other overlapping rights.

Jean,

If the leased acre amount is going to be amended to 118.1 acres, then the rental application must be changed to reflect that same 118.1 acres. The plan is to install a new pivot point at the rental location and physically move the pivot to the rented location. So the same acres are going to be irrigated because the pivot size is going to be exactly the same.

Subject: WSB Lease for 17-2052 and 17-7063 Holbrook Farm

Greg,

Attached is a map of the portion of water rights 17-2052 and 17-7063 owned by Holbrook Farm that are proposed to be leased to the Bank that duplicates the map that came with the WSB Lease applications. I have put the number of acres available for lease on each QQ which equal 118.1 acres. The acres on the map submitted with the applications are incorrect. The Department is going to need a new Attachment 2, attached, for each application to correctly match the available acres.

I have also attached a DRAFT contract with the 118.1 acres for your benefit. Please provide the additional information within 30 days and the Department will continue processing these applications. If the information is not received within 30 days, the Department will return the applications unprocessed. If you have any questions, please contact the Department. Thank you.

Re: Holbrook Farm, LLC

Dear Mr. Buyer:

Holbrook Farm, LLC purchased water rights 17-2052 and 17-7063 in 2016. Holbrook Farm, LLC desires to lease 125.0 acres of ground water into the Idaho Water Supply Bank.

The 125.0 acres to be leased are comprised of acres that were previously irrigated by a pivot that will not be irrigated in 2017. Historical aerial photographs clearly indicate that these areas have been irrigated in the last 5 years.

The lease applications propose to lease the water for only the 2017 irrigation season.

Please copy our office on all correspondence regarding this applications.

Sincerely,

Greg Sullivan, M.S., Engineer
