If yes, specify companion water rights in Section 4

This application must be completed according to the minimum requirement checklist below. This checklist is part of the rental application and must be included with the rental application. Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.

Rental applications should be submitted well in advance of the desired start date for the use of rental water. Rental applications may be processed as early as November 1 of the year prior to the intended use of rental water. Any rental application received on or before November 1 for use in the next year will be assigned a received date of November 1. Rental applications submitted more than one year in advance of the proposed start date for the use of rental water will not be accepted and will be returned to applicants. Rental applications may be returned to applicants if the desired start date for the use of rental water cannot be accommodated by the Water Supply Bank. Rental requests will not be accepted once the rental season of use period has concluded.

One rental application per beneficial use of water. For multiple beneficial uses of water, separate rental requests should be submitted for each unique beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources.

For additional instructions on completing a rental application, visit the Bank's website at [http://idwr.idaho.gov/water\\_supply\\_bank](http://idwr.idaho.gov/water_supply_bank).

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes  No

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

**Important Information:** Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request. For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
37-2619	irrigation	0.08	14.0	4.0		0.04	6.3	1.8
<b>Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank</b>					<b>TOTAL</b>	0.04	6.3	1.8
						CFS	AF	AC

\*Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it Attachment 4B:

N/A

---

C. Does your rental request propose to change the nature of use for any water right(s) being rented? Yes  No

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it Attachment 4C:

RE: APPLICATION TO RENT WATER FROM THE WATER SUPPLY BANK  
WATER RIGHT NO. 37-2619

\*\*\*TIME SENSITIVE RESPONSE REQUIRED\*\*\*

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. I have enclosed a Water Supply Bank Rental Agreement for your review and signature. Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of \$107.10 was calculated based on the current rental rate of \$17.00 per acre-foot times a diversion volume of 6.3 acre-feet. Since you have a private agreement with the lessor, you are only obligated to pay the 10% administrative fee or \$10.71. An annual payment shall be received by the Department prior to the execution of this agreement and prior to January 1 in all subsequent years for the duration of the rental period. The agreement will be void if payment is not received prior to the due date in a given year. If you would like to terminate the agreement prior to the end of the rental period, you must submit written notice of your intent to the Department at least 30 days prior to the rental fee due date.

Please send a check for \$10.71 made payable to the Idaho Department of Water Resources, together with the signed rental agreement, within 14 days so I can complete processing.

If you have any questions, please contact this office at (208) 287-4800.

Sincerely,

## MEMORANDUM

**To:** Water Right No: 37-2619 Agreement # 112  
**From:** Clay Webster  
**Date:** 02/10/2017  
**Re:** Review and Analysis of Application to Rent Water from the State Water Supply Bank

---

**PURPOSE/NARRATIVE:** This application was received from Jim Speck on behalf of James D. Sinegal on December 14, 2016. It proposes to rent 0.04 cfs, 6.3 af to irrigate 1.8 acres at the NENE of sec 12 Twp 4N, Rge 17E. They acquired a rental of the same amounts from the same water right in 2016.

**AUTHORITY TO FILE:** The application was signed by James D Sinegal. Current taxlot information shows that he and Janet L Sinegal, Trustees are the property owners at the POU and POD.

**WATER RIGHT VALIDITY:** Water right 37-2619 has a portion leased into the WSB as lease/rental packages. This rental is one of those packages. This right was decreed in 2010. The same portions have been leased into the bank since 2015. I have no forfeiture concerns.

**INJURY TO OTHER WATER RIGHTS:** The lease POD falls just outside of the Ketchum Zone shape. I contacted the hydrology department and they confirmed that this water right's POD should be considered a part of the Ketchum Zone when applying the Water Supply Bank's Interim Ground Water Rental Policy for the Wood River Valley. This area was left off of the shape because the canyon narrowed to a point that it effected the new model that is being built for the WRV.

**ENLARGEMENT OF USE:** I have no enlargement concerns on this rental.

**LOCAL PUBLIC INTEREST:** Review staff has no information to suggest this application is inconsistent with the local public interest.

**BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:** The rental appears consistent with the conservation of water resources in Idaho.

**DEPARTMENT STAFF OR WATERMASTER COMMENTS:** The location for the rental PD is subject to Water District # 37. I requested comments from the watermaster and the regional office on February 1, 2017.
