Transfer 73641 : Request for Rescind due to lack of accomplishment of transfer

To whom it may concern:

Anderland LLC requests that Transfer 73641 be rescinded due to changes authorized under the transfer not being accomplished. The planned expansion for the dairy located in 10S 25E 16 NESW was not accomplished due to change in dairy operation and plan.

Water rights 45-14067, 45-13394 and 45-13396 are the affected water rights involved in the transfer.

Water right 45-7107 is the current water right remaining for irrigation. The original right of 45-7107 was for 264 acres of which 30.9 acres was moved over to commercial and stockwater. Anderland LLC wishes to have this 30.9 acres reverted back to irrigation due to no development under Transfer 73641. The 30.9 acres under the transfer continued to be irrigated from the time of approval until present. Forfeiture of the 30.9 acres located in 10S 25E 16 NESW under the transfer is not an issue due to continued irrigation. The full pivot is visible in 2015 aerial photography imagery.

Respectfully,

Alan H. Andersen, Pres.

Alan Andersen
