

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
BENEFICIAL USE FIELD REPORT

A. GENERAL INFORMATION

Permit No: 96-08812
Exam Date: 9/24/2003

1. Current Owner:
SOUTHSIDE WATER & SEWER DISTRICT PO BOX D SANDPOINT ID 83864 (208)263-1493
2. Accompanied by: Doug Bopp
Phone No: 208-290-5484
Relationship to Permit Holder: System operator

3. **SOURCE:**
GROUND WATER

B. OVERLAP REVIEW

1. Other water rights with the same place of use: 96-7113
2. Other water rights with the same point-of-diversion: None

C. DIVERSION AND DELIVERY SYSTEM**1. LOCATION OF POINT(S) OF DIVERSION:**

GROUND WATER SW¼SW¼SW¼ Sec. 3, Twp 56N, Rge 02W, B.M. BONNER County

Method of Determination: GPS and maps. POD location at 48° 13.411, 116° 34.035 (A0020097)

2.

Method of Determination: Google Earth and Arc map.

3.

Delivery System Diagram Attached (required). Indicate all major components and distances between components.

X Indicate weir size/pipe as applicable.

X Map Attached Showing Location(s) of point(s) of diversion and place(s) of use (required). Scale must be 1:24,000 or greater.

X Aerial Photo Attached (required for irrigation of 10+ acres).

X Photo of Diversion and System Attached

4.

Well or Diversion ID No.*	Motor Make	Hp	Motor Serial No.	Pump Make	Pump Serial No. or Discharge Size
96-95-N-174	FRANKLIN	15			

*Code to correspond with No. on map and aerial photo

D. FLOW MEASUREMENTS

1.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date
FLOWMETER	SENSUS	ACTPAK				

2. Measurements: FLOW METER ON SYSTEM AT 190 GPM. SAME MEASUREMENT THAT WAYNE BALDWIN GOT IN HIS EXAM.

E. FLOW

 X Additional Computation Sheets Attached

CALCULATIONS

Measured Method: THEORETICAL PUMPING EQUATION ATTACHED TO SHOW SAME FLOW AS METER.

F. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{IR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) =$$

$$V_{DR} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation season}) \times 1.9835 =$$

$$V = \text{Smaller of } V_{IR} \text{ and } V_{DR} =$$

2. Volume Calculations for Other Uses: SEE ATTACHED MONTHLY FLOW MEASUREMENT SHEETS PROVIDED BY DISTRICT FOR 2015 USAGE.

G. NARRATIVE/REMARKS/COMMENTS

IDWR field examiner Wayne Baldwin performed exam on this permit during the summer of 2003. In his field report he said the flow rate from well 96-95-N-174 was 190 gpm or 0.42 cfs as measured by a flow meter. He said the well was equipped with a 15hp pump. In his notes he recommended this be amended to municipal at time of licensing but did not recommend an annual volume for amendment. The file was then sent to the State Office for licensing. In 2016 it was discovered that the file still needed to be licensed and a re-examination should take place by the Northern Office. The re-examination would try to confirm the flow measurement Mr. Baldwin got back in 2003, verify amendment to municipal along with a proper annual volume, and get a better understanding of the system and how the groundwater permit 96-8812 was used along with the spring right 96-7113.

The re-examination with Doug Bopp, system operator, showed a well with 15hp pump. Flow meter on system confirmed Mr. Baldwin's measurement of 190 gpm or 0.42 cfs. Pump was set at 65 feet and theoretical pumping equation confirms the flow measurement. Water was pumped from well down an access road about 700 feet where it hooked into piping that was from spring source (96-7113). After the connection of the two sources it went through a meter and was chlorinated. From there it was either pumped to homes on demand or to a 100,000 gallon reservoir. Well source was only supply turned on during flow meter reading.

Mr. Bopp provided a list of existing users which equaled 223 and provided daily meter readings for calendar year 2015 for annual volume reference. Annual volume for system was equal to 23,187,000 gallons or 71.2 acre feet and the question arose how much was from spring and how much was from well. Mr. Bopp thought the system ran 60/40, 60% from the well. The department was then put in contact with Chris Horgan from JUB Engineering about the split. The final number they came up with was 55.4% from the well or 39.4 acre feet.

Licensing this permit became a big question and how much annual volume IDWR should give it. Do we hold it to a standard of licensing as was practiced in 1995 or take an accurate account of how much water was used more recently? Discussions between Northern Region, State Office, and JUB Engineers came up with 2 options; amend to municipal with annual volume of 276 acre feet (230 homes x 1.2 acre feet) with home limitation on license or amend to municipal with annual volume of 39.4 acre feet with no home limitation. It was determined by all parties that the best scenario for the district moving forward would be municipal with annual volume of 39.4 acre feet with no home limitation. The overlap condition will be combining both diversion rates because they are separate sources to 0.87 cfs (0.42 cfs from 96-8812 and 0.45 cfs from 96-7113). The overlap will also limit them between the two sources to only 276 acre feet of annual volume. They will be allowed 39.4 acre feet from the well but when both sources are combined cannot exceed 276 acre feet. The two annual volumes will not be added together because they have not shown that much annual volume is needed and has not been put to beneficial use.

Have conditions of permit approval been met? ☒ Yes ☐ No

H. RECOMMENDATIONS

1. Recommended Amounts

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>DIVERSION RATE</u>	<u>ANNUAL VOLUME</u>
MUNICIPAL	01/01 to 12/31	0.42 CFS	39.4 AF
	<u>Totals:</u>	0.420 CFS	39.40 AF

2. Recommended Amendments

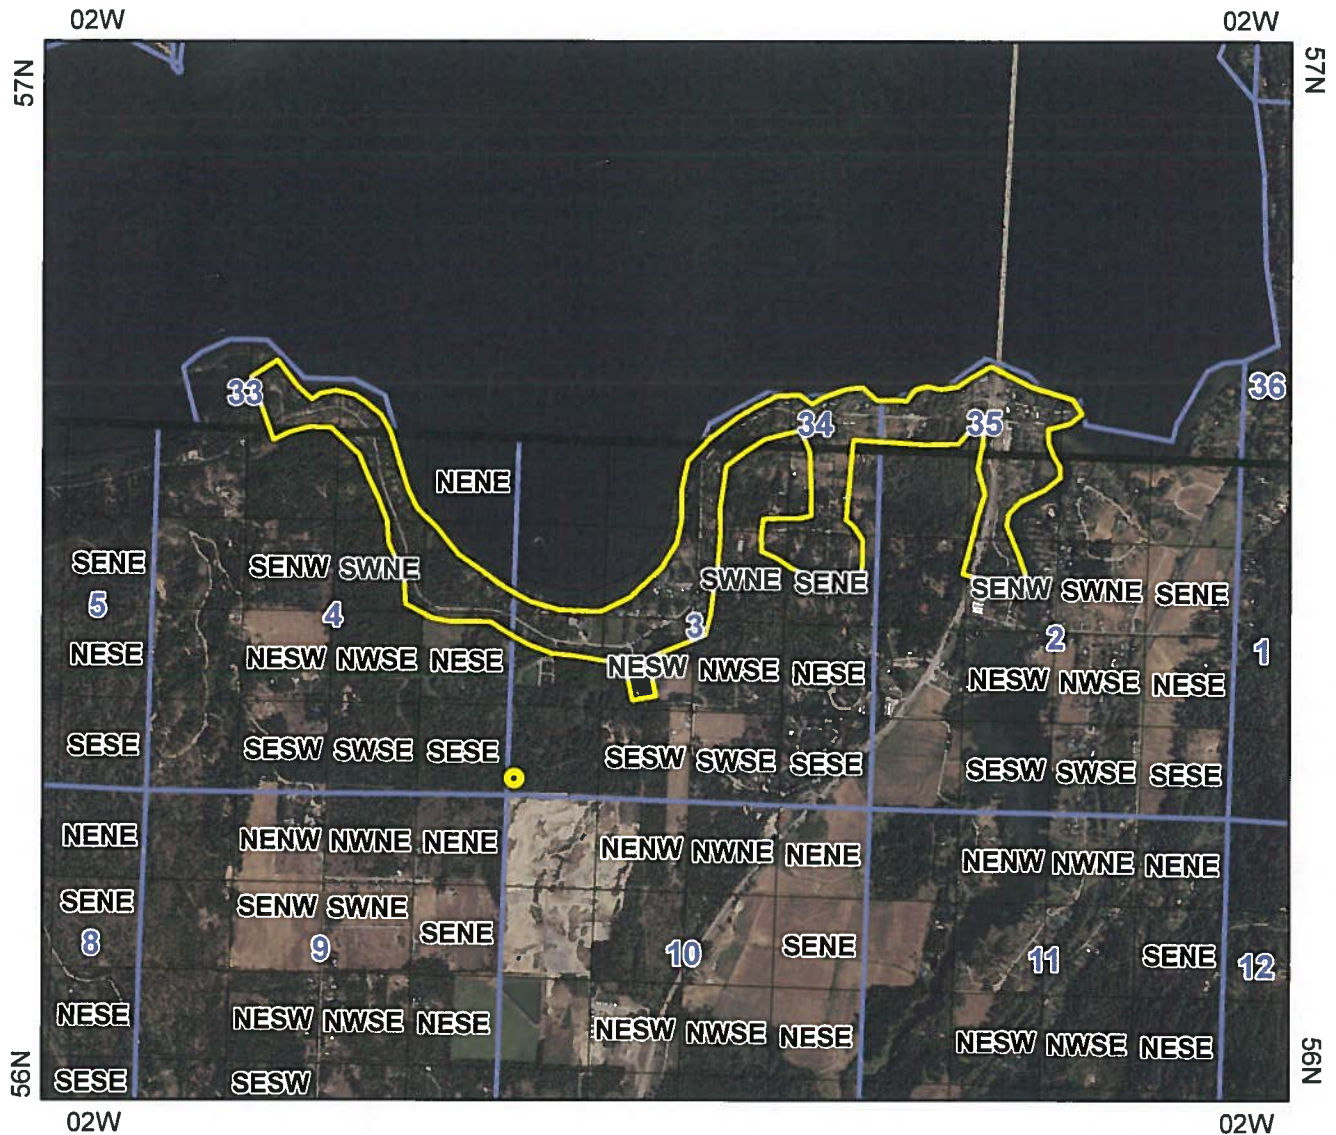

☐ Change P.D. as reflected above ☐ Add P.D. as reflected above ☒ None

☒ Change P.U. as reflected above ☐ Add P.U. as reflected above ☐ None
