Re: Evaluation of Sufficiency of Information Submitted

Application for transfer proposes to change the place of use (POU) of four water rights which irrigate 319 acres with a flow rate of 6.38 cfs. The proposed transfer is associated with two surface water (Raft River) irrigation rights 43-184 and 43-185 and two ground water irrigation rights 43-2479 and 43-2538. The applicants are submitting this transfer application to record changes in irrigation practices due to the use of a more efficient pressurized irrigation system. Groundwater and surface water points of diversion will not change. Installation of flow meters at groundwater points of diversion will comply with Water District 143 measurement requirements and surface water diversions will be measured and reported by Water District 43B. The POU is located approximately 3.6 - 4.9 miles east and 1.3 - 2.2 miles south of the Tracy Store in Almo. The rights involved with the transfer have all been decreed in the SRBA and are in the Raft River Critical Ground Water Area. Advertising will not be necessary since (1) the changes involve only shifting portions of the POU within contiguous land of the original POU and (2) the water right changes proposed through this transfer application are not expected to change the effect on the original, or hydraulically connected, water source or affect other water rights.

- **Authority to File:**
The Department's database indicates that the water rights involved are owned by the applicants; William D. Jones & Sons. The application was signed by the applicants.
- **Water Right Validity:**
The four water rights were decreed in the SRBA in 2002. Review of aerial photos indicates that the lands involved with the transfer have recently been irrigated so forfeiture does not appear to be an issue.
- **Injury to Other Water Rights:**
None anticipated or foreseen. The transfer is not changing points of diversion or the amount of water used within the POU.
- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No issues anticipated.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.
- **Effect on the Economy of the Local Area:**
None anticipated
- **Effect of the Agricultural Base of the Area:**

None anticipated

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

Re: Legal Notice Not Required

Legal Notice Not Required
1/23/2017

Pursuant to Section 42-222, Idaho Code, the Department has discretion to provide public notice as deemed appropriate. The water right changes proposed through this transfer application do not appear to change the effect on the original or hydraulically connected water source or affect other water rights. Therefore, staff review of the transfer application found no cause to require public notice. This application will continue processing without advertisement and be forwarded for approval consideration.

Jaxon,

You sent in a new proposed place of use description that removed the BLM parcel and adjusted acre amounts (per quarter-quarter) slightly. Can you provide us with a new place of use map that reflects these changes to replace the old map that accompanied the original application?

Thanks,

Corey

Hi Kent,

I talked with Rod Jones and he asked me to remove the BLM portion of the water right. Attached is the new description of lands. I shrunk the pivot a little bit up on that area so he could keep from irrigating the BLM ground by cutting off his endgun and shutting off the last nozzle if needed on that one QQ corner.

Let me know if there is anything else we need to do to help you out.

Thanks,

Jaxon

MEMORANDUM

TO: Transfer # 81265 File

FROM: Kent Aasa

DATE: October 11, 2016

SUBJECT: Filing Fee

The filing fee of \$580.00 for this transfer is based on the amount of water (1.06 cfs) proposed to be transferred or changed. The water rights associated with the place of use are limited to a combined total of 319 acres with a combined diversion rate of 6.38 cfs. The filing fee is based on the proportionate quantity of cfs affected by changing the place of use for 53 acres. The 53 acres is 16.6 % (0.166) of the 319 acres and 1.06 cfs (6.38 cfs multiplied by 0.166) is the proportionate quantity of water being affected. The IDWR transfer fee schedule for a transfer involving 1.01-2.00 cfs indicates a filing fee of \$580.00. Receipt # S035766 reflects the fee of \$580.00 paid on 10/14/2016.
