Narrative:

Permit 65-13680 authorized the diversion rate of 0.04 cfs from spring water for domestic use purposes. Based on the small permitted diversion rate and POU, this qualifies for an in-office field exam as stated under IDAPA 37.03.02.035.01r. The exam was completed on August 26, 2016 by WRA Aaron Skinner.

Legal descriptions identified on the permit were used to locate the property in the name of Fred Udall. County taxlot data confirms and matches the current owner of the water right permit. Aerial photography (GIS and Google Earth) was used to verify the spring as noted in the application. Overlap review using IDWR software (Place of Use Comparison) show no overlap of POU and POD property.

Using IDWR's Administrator's Memorandum 22, single household domestic use was defined and established a maximum acceptable diversion rate of 0.04 cfs and volume of 1.2 af/y. Permit 65-13680 established a diversion rate of 0.04 cfs, therefore, must not exceed the maximum diversion volume of 1.2 af/y.

Conditions 27A and X01 will be carried forward to licensing. Condition 26A will not be carried as the project construction to show beneficial use has commenced.
