RE: Field Exam Corrections.

I reviewed Mr. Flood's January 5, 2017 letter and I agree the East-West mainline on Lots 8,9,10, and 11 is off-set approximately 25 feet to the north, relative to the mainline crossing the remaining lots to the east. I had presumed the mainline was placed in a straight line. However Mr. Flood had actually told me the line is placed at a certain distance north of the road and the road jogs to the north on the western lots. This means approximately an additional approximately 0.6 acres are under irrigation for the western lots beyond the amount calculated previously.
