

MEMORANDUM

Date: October 4, 2016
To: Transfer 80338
From: Phill Hummer
Re: Comment/Analysis

Even though the parent rights and the child rights still share part of the same diversion-injection-rediversion system this transfer adds two points of rediversion unique to the rights owned by Mr. Schaetzel. For this reason water rights no.78-12440, 78-12441, 78-12442, and 78-12443 were separated from the combined limited system of the parent rights. These rights now have their own combined acre limit of 9.3 acres and the parent rights combined limit was reduce by 9.9 acres, the number of acres split by ownership before the 0.6 acres were forfeited. Condition E56 was changed/updated to condition X35 on all rights to reflect these changes.
