

IN-OFFICE BENEFICIAL USE FIELD REPORT

Permit No: 63-12553

Examiner: A. Skinner

Date: 12/8/2016

In-office qualification (IDAPA 035.01.r):

- ☐ Irrigation ≤ 5 acres
☐ Stockwater storage ≤ 14.6 af
☒ Total diversion rate ≤ 0.24 cfs and not irrigation or storage

Current Owner Name: Maple Hill LLC

Address: 2236 Elderberry Pl, Boise, ID 83706

Beneficial Use Fee Paid: \$50

Receipt: C052448

Source: Groundwater

 Source change? ☒ N ☐ Y Change clarifies originally intended source.
 If not – void permit.

Conditions:

Condition 046 and WB5 were removed and not forwarded to licensing. Condition 121 was changed to code 103 and forwarded to licensing. Condition 071 is forwarded to licensing. Condition 070 was kept, but adjusted and forwarded to licensing. Condition X60 was added and forwarded to licensing to clarify what mobile home spaces are attached to this permit. Condition X02 was added to specify domestic use for four mobile homes.

Have conditions of permit been met? ☒ Y ☐ N

Narrative:

Permit no. 63-12553 authorized the diversion rate of 0.10 cfs from groundwater for domestic in-home use only. Based on the small permitted diversion rate and POU, this qualifies for an in-office field exam. The initial in-office exam was started by Patrick Kelly on 4/8/2015. Needing clarification and authorization to adjust conditions, the exam was completed on December 28, 2016 by WRA Aaron Skinner.

Reviewing the backfile of this permit and the overlapping WR no. 63-7310 proved inconsistent and difficult to understand the benefit of this permit. On December 28, 2016 a meeting was held with Nick Miller, Angie Grimm, Aaron Skinner, and the permit holders, Craig Noll and Dave Martin. The meeting was held to better understand the need for this permit and develop justification to license the permit.

HISTORY

In 1999 four new mobile home spaces were added to the park after tearing down an old house and barn. The old house was part of WR no. 63-7310. The WR was for 25 homes with a rate and volume established at 0.48 cfs and 30.00 af. The WR covered both in-home and external use. This prompted this permits application in an effort to cover the 4 new mobile home sites for in-home and external use. A memo in the backfile of this permit dated March 1, 2000 from Sharla explains that as it was understood, the area where the four mobile homes were being place were already covered under WR no. 63-7310 for exterior use. As a result, Permit no. 63-12553 was approved for in-home use only. The permit was developed and used as in-house and external use. In 2009/10, the park hooked up to municipal water. The park still used WR no. 63-7310 and 63-12553 to irrigate throughout the park, but in-home use is strictly provided by the municipal right.

ISSUES

1. The mobile home park currently uses municipal water for in-home use. Is this permit necessary?
2. Does WR no. 63-7310 cover external use for the four mobile home sites added in 1999?
2. Only one well is represented on the permit cover. Do we need an amendment for the other well?

CONCLUSION AND JUSTIFICATION

Permit no. 63-12553 is needed to irrigate the exterior of the four mobile home sites. WR no. 63-7310 is for 25 homes with irrigation associated to each home. For this property, home is synonymous to mobile home site. Four new mobile home sites were developed totaling 29 mobile home sites for the entire park. It was expressed during the meeting that space #4 was inhabitable and is now covered in grass. The Department will take note of space #4, but will still license this permit for four mobile home spaces; 26, 27, 28, and 29. The intent of Sharla in her memo was not to amend policy as she was looking at acreage not

IN-OFFICE BENEFICIAL USE FIELD REPORT

the number of homes. In-home and external use was developed and used from 1999 to 2009/10. Although the park is currently hooked up to municipal water, the permitted use was established for 11/12 years and should be licensed accordingly.

There is only one well represented on the permit. It is clear from the application two wells were proposed and applied for as the POD. The wells were already existing under WR no. 63-7310 POD. The backfile for WR no. 63-7310 notes three wells, but the well supplying the barn and house water was abandon during the development of the four mobile home spaces. Each well has the same legal description. The permit only describes the location. This could be interpreted to mean two wells with one location to save space on the permit approval. Since there are no documents in the backfile explaining the discrepancy, we have no reason to limit the number of wells for this permit. No amendment will be necessary to recognize the second well.

WATER PERMIT REVIEW

Legal descriptions identified on the permit were used to locate the property in the name of Maple Hill LLC. Ada County taxlot data confirms and matches the current owner of the water right permit, but ID SOS search did not find a business under 'Maple Hill LLC.'

Place of Use Comparison software was used for POD and POU analysis. POD analysis exposed four (4) WRs with potential overlap; WR no. 63-15726, 63-22814, 63-22905, and 63-7310. WR no. 63-15726 is a centroid POD under the name Roger and Lilian Thomas. The proof report for WR no. 63-15726 has an address of 505 S. Maple Grove Road. This address does not exist today. An address comparison was done. Maple Hills Mobile Home Park's address (445 S. Maple Grove Road) and the next closest address on Maple Grove, Republic Storage 665 S. Maple Grove Road, were used. It is assumed that WR. 63-15726 previously existed between the two addresses, but has since been developed into Grayling Place Subdivision. WR no. 63-22184 and 63-22905 are located in the NWSENE QQQ, while this permit is located in the NESENE QQQ. WR no. 63-7310 was the initial WR for Maple Hills Mobile Home Park. This permit piggy backs off the two well system and does overlap. The first three WRs do not overlap. POU analysis exposed 120 WRs with potential overlap. 88 of the 120 WRs were identified as groundwater municipal WRs. Since the beneficial use form submittal in 2001, the mobile home park has hooked up to municipal water and does overlap with this permit. 32 of the 120 WRs were identified as surface water municipal and irrigation WRs totaling 4 and 28 respectively. These WRs are also not pertinent to overlap. Three (3) groundwater domestic WRs were noted as potential overlap; WR nos. 63-22814, 63-22905, and 63-7310. As described in the POD analysis, WR nos. 63-22814 and 63-22905 are not pertinent to this permit and WR no. 63-7310 does overlap.

The permitted diversion rate of 0.10 cfs was established per Administrator's Memorandum #22 for multi-household systems (4 homes = 0.10 cfs). A volume limit was not established, but conditions 071 (13,000 gpd per mobile home site) and 070 (limit irrigation to a 1/2 per mobile home site) were attached to the permit to set those limitations.

Condition 046 and WB5 were removed and not forwarded to licensing. Condition 121 was changed to code 103 and forwarded to licensing. Condition 071 is forwarded to licensing. Condition 070 was kept, but adjusted and forwarded to licensing. Condition X60 was added and forwarded to licensing to clarify what mobile home spaces are attached to this permit. Condition X02 was added to specify domestic use for four mobile homes.
