Re: POU

Application 57-11884 proposes groundwater use for some of the same property as these water rights. The previous POU shapefile was not specific to the acres actually irrigated but instead was the generic QQ outlines. I changed the shape to a more accurate boundary to clarify the place of use based on an adjudication map from the backfile microfiled 10/07/1992. Acres in the NWSE NESW and SESW of section 27 were not included in the shapefile despite being on the map because there are no authorized acres in these QQ on the face of the water rights. The 3 acres in the SWNW of section 28 authorized on the right was added to the POU shape.

State of Idaho
Department of Water Resources
Attachment to Water Right License
57-2235

This map depicts the IRRIGATION place of use boundary for this water right at the time of this approval and is attached to the approval document solely for illustrative purposes.
