WATER RESOURCES
DIVISION
WESTERN REGIONSTATE OF IDAHO
DEPARTMENT OF WATER RESOURCESTransfer No. 80856MINIMUM REQUIREMENTS CHECKLIST
TO BE SUBMITTED WITH APPLICATION FOR TRANSFER

An application for transfer must be prepared in accordance with the minimum requirements listed below to be acceptable for processing by the Department. Incomplete applications will be returned. The instructions, fee schedule, Part 2A reports and additional Part 2B forms are available from any Department office or on the Department's website at www.idwr.idaho.gov.

Name of Applicant(s) Moskell Becker

Check whether each item below is *attached* (Yes) or *not applicable* (N/A) for the proposed transfer.

Yes N/A * Means the item is always required and must be included with the application.

- ☐ * Completed Application for Transfer of Water Right form, Part 1.
- ☒ * Signature of applicant(s) or applicant's authorized representative on Application for Transfer Part 1. Include evidence of authority labeled Attachment #3 (see below) if signed by representative.
- ☒ * Application for Transfer Part 2A. Attach a Part 2A report describing each water right in the transfer as currently recorded.
- ☐ ☒ Complete and attach an Application for Transfer Part 2B for each water right for which only a portion is proposed to be changed through this transfer application.
- ☒ * Application for Transfer Part 3A is always required (see Attachment #7a below); Parts 3B and 3C must be completed for transfer applications proposing to change the nature of use of the water right(s) or proposing changes to supplemental right(s).
- ☒ * Correct fee submitted with transfer application form. (Fee schedule is on website and instructions for application for transfer.)

Attachments to Application - Label each attachment with the corresponding number shown below as Attachment #1-10.

- ☐ ☒ #1 If the applicant is a business, partnership, organization, or association, and not currently registered in the State of Idaho as a business entity, attach documentation identifying officers authorized to sign or act on behalf of right holder. (See Part 1.)
- ☐ ☒ #2a Water Right ownership documentation if Dept. records do not show the applicant as the current water right owner. **
- ☐ ☒ #2b If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s). **
** Additional fee(s) required for water right ownership changes; see fee schedule.
- ☐ ☒ #3 Documentation of authority to make the change if the applicant is not the water right owner.
- ☐ ☒ #4 Power of Attorney or documentation providing authority to sign or act on the applicant's behalf. (See Part 1.)
- ☐ ☒ #5 If the transfer application proposes to change the point of diversion for a water right affecting the Eastern Snake Plain Aquifer (ESPA), attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. ESPA transfer spreadsheet and model grid labeled cells are available on the Department's website at www.idwr.idaho.gov/WaterManagement/WaterRights/WaterRightTransfers/resources.htm.
- ☐ ☒ #6 Notarized statement of agreement or a statement on official letterhead signed by an authorized representative from each lien holder or other entity with financial interest in the water right(s) or land affected by the proposed transfer. (See Part 1.5.c.)
- ☒ * #7a Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described on the application. Include legal description labels. If only a portion of the right is proposed to be changed, identify the current location of the part of the existing right(s) proposed to be changed. (See Part 3A.)
- ☒ ☐ #7b If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. If some or all of any right is leased to the Water Supply Bank, you must also show the the specific location and/or acres to be idled at the new, proposed place of use to satisfy lease requirements.
- ☒ ☐ #8a If the transfer application proposes to change the nature of use or period of use for one or more rights, provide documentation describing the extent of historic beneficial use for the water rights proposed to be transferred and document how enlargement will be avoided. (See Part 3B.) Additional fee required for proposed changes to nature of use; see fee schedule.
- ☐ ☒ #8b If the transfer application proposes to change the place of use of a supplemental irrigation right, provide documentation regarding the historic use of the supplemental right(s) and availability or reliability of the primary right(s) being supplemented, both before and after the proposed change. (See Part 3C.)
- ☐ ☒ #9 Water Supply Bank information for all rights proposed for transfer and currently leased to the Bank. (Attachment WSB)
- ☐ ☒ #10 Other. Please describe: _____

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 1 Continued

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:

Pumps to main lines and pivots

- b. Who owns the property at the point(s) of diversion? Marshall Becker

If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? No

If yes, ☐ attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: _____

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- d. Are any of the water rights proposed for transfer currently leased to the Water Supply Bank? No

If yes, ☐ complete Attachment WSB.

- e. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:

the reason for the transfer is to be able to transfer water back and forth and in the case of a well problem in the middle of summer it would make it possible to spread water

- f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:

- g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

- ☐ ☒ undergone a period of five or more consecutive years of non-use,
☐ ☒ currently leased to the Water Supply Bank,
☐ ☒ currently used in a mitigation plan limiting the use of water under the right, or
☐ ☒ currently enrolled in a Federal set-aside program limiting the use of water under the rights?

If yes, describe:

T19 Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.
9. X36 Right 57-7036 is also diverted through the points of diversion described above.
10. X61 The period of use for the irrigation described in this approval may be extended to a beginning date of 3/1 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 3/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than 2/20/2003.

4. X35 Rights 57-11633, 57-11635, 57-11637, 57-11639, 57-11641, 57-11643, 57-11645, 57-11647, 57-11649, 57-11651, 57-11653 and 57-11655 are diverted through the points of diversion described above. All of these rights when combined shall not exceed a total diversion rate of 10.97 cfs, a total annual maximum diversion volume of 2749.5 af at the field headgate, and the irrigation of 811 acres.
5. X27 This right is limited to the irrigation of 70 acres within the place of use described above in a single irrigation season.
6. R65 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
7. Diversion of water from the new point of diversion located in the NESW, Section 14 shall not exceed 5.57 cfs.
8. 01M After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.
9. T07 The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
10. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT PART 3

A. PLAT MAP (See Part 3A of Instructions for application for transfer for complete requirements.)

- ☒ Attach a map of the diversion, measurement, control, and distribution system. Label it **Attachment #7a**.
- ☒ If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b**.

If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

If any part of the irrigation water right is leased to the Water Supply Bank, you must also specify the location and number of acres that will remain idled for the duration of the lease contract at the new, proposed place of use.

B. CHANGES IN NATURE OF USE (Water Balance)

- ☐ If you propose to change the nature of use or period of use of all or part of the rights(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a**.

C. PLACE OF USE CHANGES TO SUPPLEMENTAL IRRIGATION RIGHTS

- ☐ If you propose to change the place of use of a supplemental irrigation right, answer below and attach supporting documentation. Label it **Attachment #8b**.

Describe how the supplemental water rights have been used historically in conjunction with other water rights at the existing place of use. Describe the time during the irrigation season that the supplemental rights have been used. Include information about the availability or reliability of the primary right(s) being supplemented, both before and after the change. If the applicant is proposing to change a supplemental irrigation right to a primary right, provide the information required on Part 3B above:

I want to be able to shift water around in the case of a well going out in the peak use months of summer

Dear Applicant(s):

The Department of Water Resources has received your water right transfer application. Please refer to the transfer number referenced above in all future correspondence regarding this transfer.

A legal notice of the application has been prepared and is scheduled for publication in the OWYHEE AVALANCHE on 2/1/2017 and 2/8/2017. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the approval document.

Please contact this office if you have any questions regarding the application.

Sincerely,

Rachel Neely

MEMORANDUM

TO: Transfer No. 80856
FROM: Patrick Kelly
DATE: 10/14/2016
RE: Evaluation of Application

Summary of Information Submitted

Narrative: Transfer No, 80856 proposed to combine all of the ranches water rights into one large PPU description. The Beckers have an interest either through sole or shared ownership in a grand total of 19 water rights. The Becker portions of all 19 rights carry a limit of 745.9 acres. The transfer will create a PPU for all of the rights as well as split water rights associated with the Unruh – Becker split (see Feb 2016 Ownership Change). The rights are mostly ground water rights, with two Shoofly Creek rights. This allows the user to create an interconnected system from POD's described in "Document C" and deliver water to all places within the POU in case an emergency situation occurs.

Combined use limits were extensive considering limits identified by previous transfers and then decrees. Combined use limit conditions that reference Transfer 5665 acknowledge all rights from surface water as well as all rights from groundwater. But these diversion limits could not be duplicated or justified based on the information available in the file. Particular problems arose when attempting to include smaller limits such as 1.99 cfs or 427.5 af limits that were decreed with the limits suggested by the transfer.

All of the rights associated with the transfer can be organized into 3 groups. There is the south end group (57-1202, 57-1205, 57-1207, 57-2285A & 57-2285B), the middle group of pivots on Becker's ranch (57-7036 & 57-7037) and the group being split from Unruh's rights. To simplify the limits and make them administrable, the combined use limits for this transfer will identify a limit for each of the three groups and one for the entire PPU. The rights will be stacked in 3 three groups and future processes would require the move of every right in its respective group.

The fee is based on the sum of rates authorized by the rights which totals 10.16 cfs. 57-1205 carries a diversion to storage component of 7.00 cfs and a volume of 49.3. Since this is a storage right, the 7.00 cfs is not considered a part of the fee formula. The fee schedule for 10.16 cfs totals \$1,300. The fee of \$2,260 was paid with the transfer app and a \$960 refund should be issued once transfer processing is complete.

South End Group: Shoofly Creek rights, storage rights, and ground water rights have all been mixed by combined use limits in the decrees of the 'south end group'. Mr. Becker has implied that he will never be able to divert Shoofly or storage water from the south end of the PPU to the north end. However, to prevent enlargement and maintain combined use limits, the rights will be moved into the PPU as part of the system. 57-1205 is a Shoofly Creek storage right that does not acknowledge a live water irrigation use. The 7 cfs diversion to storage component of the right will not be recommended to be included in the combined use limit. However the acres authorized under the right are included in the combined use.

Stockwater use under 57-1202, 57-1205 and 57-1207 acknowledge a stockwater use for 350 range cattle. 57-1202 & 57-1207 allow a direct source use totaling 0.13 cfs and 9.4 af. 57-1205 is a stockwater storage right for 4.7 af. It seems like these three rights were intended to service a total of 350 cattle, but there are no direct combined use stated in conditions that restricts the stockwater use. The stockwater use then totals 0.13 cfs and 14.1 af.

When considering the stockwater and irrigation use of this group, conditions limit the live water rights to 1.99 cfs. The irrigation use is restricted to 427.5 af and 95 acres. When including the stockwater use, the group as a whole should have a limit of 1.99 cfs, 441.6 af, 95 ac.

Authority to File: The application was filed in the name of Marshall Becker. Mr. Becker is the current water right owner to rights he already owns, and has completed an ownership change for the ones he does not. The ownership change includes an agreement where Mr. Unruh granted Mr. Becker 17% of all rights listed in the agreement. Current county taxlot data identifies Mr. Becker as property owner to the pertinent land.

Water Right Validity: Rights were decreed at different times dating back to 2001. Review of 2015 aerial imagery shows irrigated lands associated with all POU's potentially exceeding licensed use. Risk of forfeiture is not a concern.

Overlap Analysis: "Document C" is amended to reflect all water rights owned by the Beckers to be included in the transfer. It is implied that water from each source is connected and can be moved from one end of the ranch to the other. "Document D" of the application identifies all POD's to be removed and retained on the rights. Overlap analysis found no other rights associated with the irrigation use.

Injury to Other Water Rights: None anticipated. At the time of this review, the irrigation use is within the Bruneau-Grandview Ground Water Management Area as well as the Trust Water boundary. The transfer proposes to more accurately describe a use already established within these boundaries. Water not already being used in these areas is not being proposed. Careful review of enlargement and combined use limits should prevent injury to other users. An announcement period will allow any potential injury concerns an opportunity to be heard.

Enlargement of Use: None anticipated. The application proposes to create a PPU and eliminate diversion descriptions not being used to irrigate the property. All rights (including stockwater and storage uses) when combined will be limited to a total diversion of 17.16 cfs, an annual volume of 3370.5 af and 745.9 acres. Smaller combined use limits for specific groups will be maintained. "Live water" irrigation use rights will be limited to 10.03 cfs, 3356.4 af on 745.9 ac.

Local Public Interest: Review staff has no information to suggest the proposal is inconsistent with the local public interest.

Beneficial Use/Conservation of Water Resources: The application proposes beneficial use consistent with conservation of water resources in Idaho.

The application is consistent with criteria of I. C. § 42-222 and should be processed.

Mr. Becker,

Please see the attached document. Proof reports for 57-1202 and 57-1205 have been scanned to provide you with some information to add to your transfer application. Document C should be amended to include these rights. You can write them in, or create a new sheet. When that is complete, confirm that the information provided on POD and POU description is correct. Then send the amended document to:
