Subject: Applications 79135 (Rangen) and 79498 (Districts)

Dear Parties,

In March 2014, Rangen Inc. filed Application for Transfer No. 79135, proposing to add the Farmers Box and the Bridge Diversion as authorized points of diversion for water rights 36-15501, 36-2551 and 36-7694. The application also proposed to adjust the place of use for the same water rights to cover the full extent of the Rangen facility. The application was protested by NSGWD, MVGWD and Southwest Irrigation District.

In August 2014, NSGWD, MVGWD and Southwest Irrigation District filed Application for Transfer No. 79498, proposing to change the place of use for a portion of water right 36-2338 from the Aqualife Facility to the head of Billingsley Creek. The application was protested by Rangen, Inc., Robert & Susan Gisler and Thousand Springs Water Users Assn.

As we have worked through other contested cases over the last two years, the parties agreed that these applications should be moved to the back burner. This email is intended to be a formal request for an update from each of the applicants. Have the other contested matters between the parties developed to a point where these applications can either be pursued or withdrawn? If not, what event are we waiting for?

Thanks for looking back through these files. I've included Paul Arrington on this email because he is the designated representative for the Gislens and Thousand Springs Water Users Assn.
