RE: Water Right Permit 97-7397

Dear Permit Holder(s):

The Idaho Department of Water Resources (IDWR) is in the process of licensing your water right permit for municipal purposes from ground water.

The authorized development period for your permit was in between March 2000 to March 2001. A field examiner conducted a field examination in July 2001 but did not collect information regarding the beneficial use of water; i.e., water use that was developed within the authorized development period. During the licensing review, IDWR must quantify the amount of lots that have been stubbed-in to the municipal system during your permit's authorized development period.

Please submit information to IDWR that illustrates the number of homes/lots that have been stubbed-in to the municipal system in March 2000- March 2001. In addition, please describe any other uses in connection with this permit that may have been occurring in that year; e.g., irrigation of lawns and how many acres per home, use at the golf course, etc. Information that may be helpful in your submittal include "as-built" engineering plans, and/or but not limited to, water use records.

Once IDWR is able to confirm the number of lots connected to the municipal system in connection with this permit and account for any other uses in 2000-2001 we will be able to issue your license. Your cooperation is appreciated in this matter and let me know if you have any questions. You can contact me at (208) 287-4944.

Sincerely,

Cherie Padilla, Sr. Water Resource Agent  
Water Allocation Bureau
