Subject: Amendment of Permit for Licensing
Attachments: Amendment of Permit 15-7187.pdf; Draft License 15-7187.pdf; Field Exam for Permit 15-7187.pdf

Mr. Price,

I am currently reviewing all of the permits remaining to be licensed in Malad Valley. Permit 15-7187, which is currently in your name, is one of the last permits needing to be licensed. In July 2014, Scott Bergendorf from our office met with you to complete a beneficial use field exam for the water right. Scott prepared a field exam report, but did not work with you to complete the licensing process. Scott has since taken another job outside of IDWR, so I am picking up the file to bring it to completion.

Scott found two wells tied into the irrigation system, one on the east side of the property and one on the west side. Permit 15-7187 described two wells located in Section 24. The east well was actually developed in Section 19. Because the east well was developed in a different Section than the location listed on the permit, the permit must be amended (to reflect the actual system) before a license can be issued. Amending a permit for licensing is a very simple process. I've attached the amendment application. All I need is your signature and the appropriate amendment fee (\$100). Please sign the amendment and mail the signature page and filing fee to our Idaho Falls office (900 North Skyline Drive, Suite A, Idaho Falls, ID 83402). Once I receive the amendment and the filing fee, I will issue the license. Once the license is issued, we can discuss what is needed to update ownership of the right to Lazy E, LLC.

I've also attached a copy of the field exam and a draft license. Please feel free to contact me if you have any questions.
