Re: T6 East Farm Transfer

Dear Mr. Cefalo:

MPH Farms LLC is proposing to transfer an 83.3 acre portion of 35-2306 and 35-8197. The new POU will be irrigated utilizing wheel lines. Existing wells will be used as the new PODs. The ownership of the water rights will not be changing, the beneficial use and period of use will not be changing with this transfer.

ESPA model analysis was performed on the 83.3 acre portion of the transfer. No mitigation is required based on the ESPA Model transfer analysis tool.

A spreadsheet of historical pumping volumes based on data downloaded from the WMIS database are attached to this letter. The historical pumping volumes indicate that water rights 35-2306 and 35-8197 have been used fully to irrigate the maximum allowed acres under these water rights.

Please copy our office on all correspondence regarding this application.

Sincerely,

A handwritten signature in blue ink, appearing to read "Greg Sullivan", is written over a faint circular stamp.

Greg Sullivan, M.S., Engineer
