Subject: Transfer Application

Good Morning Ryan:

It looks like the transfer application is almost ready for advertising. I ran this past the manager and a couple more things were requested.

1. On page 4, question 5 – Please include a statement that all of the wells are interconnected.
2. Please provide a map showing the mainlines from the wells that service all the pivots. You can just modify your existing map to show this.

And hopefully, that is all we will need to get your transfer to advertising. If you have any questions please let me know.

Thank you,

Kerrie Mathews

Kerrie,
Here is the application with my new signature.
Thanks,
Ryan Cranney

Good Afternoon:

I think everything looks ok... I am attaching a *full and complete* copy of the transfer application. I will get this application data entered and sent to advertising...

I would like an updated signature for the application, could you please sign and date page 2 for the file to show that this is the transfer application that you are submitting. Please send me a copy of the signature.

If you have any questions, please let me know.

Thank you,

Kerrie Mathews

Kerrie,
Thanks for all the help on this. I made the correction you found on section 29. I guess we will have to abandon the irrigation portion of 17-4027 right to make this all work. Let's try it again.
Thank you,
Ryan

Subject: RE: G5 Land Co - Transfer Application

Good Afternoon Ryan;

I went through the information that you sent... A couple of things... On page 3 of the application, could you please correct the period of use for #17-7157. The dates are incorrect. On page 4 of the application, question g is checked as yes for undergone a period of five or more consecutive years.. Please explanation this in the space provided, under the question.

Also, would you please create a narrative for the application? This can be on a separate paper and included as an attachment for the application. What I am looking for in this separate attachment is a description of how 17-4027 is currently used. Is the priority date correct? I do not have a well log so any help you could provide as to when the well was drilled and any historical information you have, would be appreciated. Also, I need you to confirm that you understand that the irrigation portion of this claim will be abandoned through the transfer process. If you could also put a quick sentence or two stating that you do not want the points of diversion updated on this application.

Sorry for the extra work – but it helps if the file contains this information – because I will be asked by several supervisors.. If you have any questions, please let me know.

Kerrie Mathews

Kerrie,
Thank you for the reminder letter. Look these revised attachments over and see if they answer your questions. Let me know if you have any additional questions.
Thank you,

RE: G5 Land Company Transfer Application

Dear Mr. Cranney:

On September 14, 2016, I talked with you on the telephone regarding the transfer application that you submitted to the Department for processing. It was determined that additional information would be required to process your request. In order to move forward with your application, please submit the following information:

1. The place of use identified in the application contains 4 acres located in the SENW quarter of Section 28 T14S, R28E. According to our tax lot data these 4 acres are owned by The Orvil Tubbs Trust. In order to use this property you will need to provide authorization from the Trust or proof of ownership.
2. In the SWSW of Section 29, T14S, R33E there is an irrigation/stockwater, Statutory Claim, #17-4027. This claim is overlapping your proposed place of use. In order to move forward with your transfer there are a couple of options, 1. Completely surrender the claim, in a separate form. 2. Surrender the irrigation portion of the claim, within the transfer.
3. The transfer did not request a point of diversion change. Without this change, the diversion rate will be limited from each well. If the point of diversion is corrected on the water rights – you can divert the entirety allowed under the rights from either well.

Unfortunately, the Department cannot hold a transfer application indefinitely. Please provide the additional information by November 14, 2016. If I have not heard from you by then, I will return the application and refund the transfer fees. If you have any questions, please let me know.

Sincerely,

Kerrie Mathews
Sr. Water Resource Agent
