FORM 200 Rev. 09/16

DEC 05 2016

WATER RESOURCES
WESTERN REGIONSTATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT
To appropriate the public waters of the State of IdahoIdent. No. 65-23672

AMENDED

1. Name of applicant(s) LARRY OR BARBARA SZURGOT Phone 208-793-2581
 Name connector (check one) ☐ and ☐ or ☒ and/or
 Mailing address 50 DEKE DR City HORSESHOE BEND
 State ID ZIP 83629 Email szurgot@frontiernet.net
2. Name of representative, if any _____ Phone _____
 Mailing address _____ City _____
 State _____ ZIP _____ Email _____
- a. ☐ Send all correspondence for this application to the representative and not to the applicant OR
☐ Send original correspondence to the applicant and copies to the representative.
- b. ☐ The representative may submit information for the applicant but is not authorized to sign for the applicant OR
☐ The representative is authorized to sign for the applicant. Attach a Power of Attorney or other documentation.
3. Source of water supply HILL CREEK which is a tributary of PAYETTE RIVER
4. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
07N	02E	01			SW	NE	BOISE	HILL CREEK	

5. Water will be used for the following purposes:
- Amount 31.8 af for Wildlife Storage purposes from 1/1 to 12/31 (both dates inclusive)
 (cfs or acre-feet per year)
- Amount 0.04 cfs for Diversion To Storage purposes from 1/1 to 12/31 (both dates inclusive)
 (cfs or acre-feet per year)
- Amount 15.0 af for Irrigation Storage purposes from 3/15 to 10/31 (both dates inclusive)
 (cfs or acre-feet per year)
- Amount 15.0 af for Irrigation From Storage purposes from 3/15 to 10/31 (both dates inclusive)
 (cfs or acre-feet per year)
6. Total quantity to be appropriated is (a) 0.04 cubic feet per second (cfs) and/or (b) 46.8 acre-feet per year (af).
7. Proposed diverting works:
- a. Describe type and size of devices used to divert water from the source. headgate delivers water through 12" pipe.
Water enters pond through delivery ditch.
- b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 12. For dams 10 feet or more in height AND having a storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ No
- c. Proposed well diameter is _____ inches; proposed depth of well is _____ feet.
- d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ No
- e. If well is already drilled, when? _____; drilling firm _____;
 well was drilled for (well owner) _____; Drilling Permit No. _____.

For Department Use

Received by RN Date 12-13-16 Time _____ Preliminary check by P. Kelly
 Fee \$ 100 Received by CS Receipt No. W044504 Date 8-11-2016
additional \$150 RN W044822

8. Description of proposed uses (if irrigation only, go to item 9):
- Hydropower; show total feet of head and proposed capacity in kW. _____
 - Stockwatering; list number and kind of livestock. _____
 - Municipal; must complete and attach the [Municipal Water Right Application Checklist](#).
 - Domestic; show number of households _____
 - Other; describe fully. Wildlife storage used for fish, geese and other wildlife in the area.

9. Description of place of use:
- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
 - If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
07N	02E	02																3.0	3.0
																		WS	

Total number of acres to be irrigated: 3.0

10. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? 65-3803C

11. a. Who owns the property at the point of diversion? Randy Heffner
- b. Who owns the land to be irrigated or place of use? Larry and Barbara Szurgot
- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: Randy Heffner controls diversion to our property. We work together.

12. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. To fill 0.4 acre pond on our property, approx. 5 ft average depth. Storage purposes for wildlife year round and occasional irrigation.

13. Time required for completion of works and application of water to proposed beneficial use is 1 years (minimum 1 year).

14. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map or maps clearly identifying the proposed point of diversion, place of use, section #, township & range. The map scale shall not be less than two (2) inches equal to one (1) mile.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

Seepage Loss Calculations

This spreadsheet has been designed by Idaho Department of Water Resources to estimate the total annual seepage losses from a pond.

FILE NUMBER	65-23672
REVIEWER	Patrick Kelly
DATE	11/28/2016

User Input
Calculated value
Formula Explanations

INPUTS

Pond Surface Area (AC.)	0.4	AC.
-------------------------	-----	-----

Pond Surface Area (SQ. FT.)	17424	SQ. FT.
-----------------------------	-------	---------

My Soil Classification is	GP	
Suggested Seepage Rate (FT./DAY)	0.2000	FT./DAY

Formula: (Surface Area X Seepage Rate) X 7.48 = Gallons Per Day Loss
--

Convert to GPD	26066	GPD
----------------	-------	-----

Total Seepage Loss (AFA)	29.2	AFA
--------------------------	------	-----

Though sand and gravel seepage rates may actually be higher, the maximum allowable rate is 0.2 ft/day, pursuant to Administrative Memo "Seepage Loss Standards for Ponds and Reservoirs."

Suggested Seepage Rates for Different Soil Types:

GW, GP, GM, GC, SW, SP and SM (silty sand, sand silt mixtures and gravel mixtures) = 0.2 ft per day

OL and ML (inorganic silts - very fine sands, silty, or clayey fine sands) = 0.02 ft per day

SC (clayey sands, sand clay mixtures) = 0.007 ft per day

CL (Low to medium plasticity clays) = 0.003 ft per day

MH, OH, PT and CH (high plasticity clays) = 0.0003 ft per day

LINED PONDS (liners can be chemical, fabric, or bentonite) = 0 ft per day

Ponds Intercepting Groundwater (excavated ponds filled by ground water) = 0 ft per day

PLEASE NOTE: The initial basis for the Suggested Seepage Rates in the table above is found on Page 16 of Seepage from Fish Ponds, Bulletin 599, August 1989 Alabama Agricultural experiment Station, Auburn University, Auburn University Alabama. If you don't know the soil type, please refer to the map provided at <X:\Spatial\Soils\USCS\PondSoils.lyr>. Use "0" if the pond fill relies on the water table.

Evaporation Loss Calculations

This spreadsheet has been designed by Idaho Department of Water Resources to estimate the annual evaporation losses from a pond.

FILE NUMBER	65-23672
REVIEWER	Patrick Kelly
DATE	11/28/2016

User Input
Calculated value
Formula Explanations

The acronyms used on the Kimberly Research Center website are defined below:
P = Precipitation
ET= Evapotranspiration
P _d = Precipitation deficit
P _d =ET-P

USING THIS SPREADSHEET

Use the link below to access the Kimberly Research Center website. This website provides the Precipitation Deficit for a station most representative of the pond under examination. The Precipitation Deficit is the total amount of free water surface evaporation minus the precipitation for a given area, which gives the total amount of evaporative losses incurred by the pond. There are several weather sites that are used throughout the state. IDWR staff can find the nearest site using Arc Map. The shape file containing the sites can be found at <X:/Spatial/Climate/ETIdahostations.shp>.

Instructions:

1. Use the link below to navigate to ET Idaho 2012.
2. Select the station which is most representative to your pond location.
3. Click Submit Query.
4. Under "Land Covers with Evapotranspiration Estimates," select "Open Water - Shallow Systems (ponds, streams)" or "Open Water - small stock ponds" depending on the pond size.
5. Click the link to "Precipitation Deficit."
6. Reference and copy (ctrl + C) the first subheading "Mean" values.
7. Click the "Paste Values from ET Idaho" button. The table will automatically enter a zero (0) for any negative precipitation deficit values.

Found at: <http://data.kimberly.uidaho.edu/ETIdaho/>

Precipitation Deficit

Station: Oia (NWS - 106586)

Month	mm/day ¹	Days per month	mm/Month
Jan	-2.12	31	0.00
Feb	-1.28	28	0.00
March	-0.75	31	0.00
April	0.78	30	23.40
May	1.72	31	53.32
June	2.91	30	87.30
July	4.33	31	134.23
August	3.72	31	115.32
September	2.14	30	64.20
October	0.06	31	1.86
November	-1.45	30	0.00
December	-2.56	31	0.00

Total mm/year = 479.63

PLEASE NOTE: The seasonal average for precipitation deficit should not be used for calculations because precipitation often exceeds evaporation during wetter months of the year. If the pond is kept full, excess precipitation during wetter months does not serve to refill the pond during drier months.

For example, see Sandpoint KSPT (NWS - 108137), the annual precipitation deficit is -106 mm. However, April through September have positive precipitation deficit values. To properly estimate the annual volume of water necessary to refill a pond due to evaporation losses, the table will automatically enter a zero (0) for each month that the precipitation value is reported as a negative value.

As described above, precipitation offsets evaporation in winter months, so the net effect is that wintertime precipitation deficit is usually zero.

$$\left(\frac{479.63}{304.8} \right) \times 0.40 = 0.6 \text{ AFA}$$

Total Storage Calculations

FILE NUMBER	65-23672
REVIEWER	Patrick Kelly
DATE	11/28/2016

This spreadsheet has been designed by Idaho Department of Water Resources to estimate the total seepage, evaporation and fill capacity required for a pond.

User Input
Calculated value
Formula Explanations

Surface Area (AC.)	0.4	"Surface Area" is automatically carried over from the "Seepage Loss" sheet.
Average Pond Depth (FT.)	5	"Average Pond Depth" depicts the actual depth of the pond either measured or estimated. Note: If you know the maximum depth and not the average depth, the Field Examiner's Handbook suggests multiplying the maximum depth by 0.4 to get the average depth, or you can use any method that seems reasonable to attain average depth.
Pond Capacity (AF)	2	Pond Capacity is calculated by multiplying the Pond Surface Area by the Average Pond Depth. If you know the capacity, divide the capacity by surface area and enter the average pond depth in the space above. Note: If pond capacity is determined using a method shown on the "Pond Capacity" sheet, the user may need to modify the value of "Pond Capacity" (cell B9) manually. Note that if the value is modified manually, the formula will be altered for future use.
Multiple Fill Volume Above Initial Fill to Fulfill From Storage Needs- "Multiple Fills" (AF)	0	The "Multiple Fill Volume Above Initial Fill" is the acre-feet of water required to meet a <i>from storage</i> component if the <i>from storage</i> component exceeds a one time fill. This section should not include the amount of water needed to fill the pond initially or the amount of water needed to maintain the pond level due to evaporation or seepage. For example: If a pond has a capacity of 5 acre feet and 2.5 acre feet of seepage and evaporation, but the pond is used for irrigation that requires 10 acre feet of from storage for the irrigation use, then you would insert 5 acre feet into this location (10 acre feet needed - 5 acre feet from the initial fill = 5 acre feet of additional storage needed). Note: You must have a "From Storage" component exceeding the initial fill on the permit to include a volume in this space.
Estimated Seepage Loss (AF)	29.2	The "Estimated Seepage Loss" is automatically carried over from the "Seepage Loss" sheet.
Estimated Evaporation Loss (AF)	0.6	The "Estimated Evaporation Loss" is automatically carried over from the "Evaporation Loss" sheet.
Total Volume Required (AF)	31.8	The "Total Volume Required" is calculated by adding the Pond Capacity, Multiple Fills, Seepage Loss, and Evaporation Loss amounts to determine the total amount of storage required.

Application for Permit No. 65-23672

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the IDAHO WORLD on 12/21/2016 and 12/28/2016. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the application.

Sincerely,

Rachel Neely
Administrative Assistant

Neely, Rachel

RE: Application for Permit No. 65-23672

Dear Legal Notice Department:

Please publish the enclosed legal notice on the dates indicated (once a week for two consecutive weekly issues). If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. Please send the affidavit and bill to this office before 1/9/2017. Your cooperation is appreciated.

Sincerely,

Rachel Neely
Administrative Assistant

Dear Mr. Ward:

The Idaho Department of Water Resources (IDWR) is seeking written comment and/or recommendation(s) from your agency regarding the above referenced water right application(s). Copy(s) of the application(s) are enclosed with this email for your reference. Please review the application(s), complete the enclosed recommendation form, and submit your reply, if any, to this office by the protest deadline of January 9, 2017.

If your agency desires to formally protest approval of this application, you may do so by filing a written protest along with a \$25.00 filing fee for each protested application by the protest deadline.

IDWR will assume your agency does not object to this application if a timely response is not received. Please contact me if you have any questions regarding the application. Thank you for your help.

RE: Additional Information Request for Permit 65-23672

Dear Mr. & Ms. Szurgot:

On September 8, 2016, you filed an application for permit to appropriate water for wildlife and irrigation storage in the SESE $\frac{1}{4}$ of Section 2, Township 7 North, Range 2 East. I am contacting you today because review of your map indicates a legal description different than identified on your application. Additionally, uses should be amended to reflect development associated with your property.

The map you provided shows a diversion in the SWNE $\frac{1}{4}$ of Section 1. Your application suggests the diversion is located within your property in SESE $\frac{1}{4}$ of Section 2. This must be amended to reflect the correct diversion of water.

Wildlife Storage is identified in the total annual volume of 5.0 af. An analysis of the pond constructed on your property with an average depth of 5 ft suggests a pond capacity of 2 af, an estimated seepage volume of 29.2 af and an estimated evaporation loss of 0.6 af totaling 31.8 af.

Irrigation with a diversion rate indicates a 'live water' appropriation directly from the source. To irrigate from the pond, irrigation storage and irrigation from storage should be included in your application. The diversion to storage use authorizes the act of placing water into your storage facility.

Item 10 of your application states, "Irrigation at times" to describe other water rights used for the same purpose on the land. Water right review of the land finds 65-3803C overlaps your property. An ownership change should be filed to split a portion of this right into your name. This water right number should be filled in to sufficiently answer the question.

For your convenience, I have completed and printed a draft application for permit. Please review this application carefully for accuracy. The application fee for 46.8 af is \$250. This requires you to pay an additional \$150 to complete processing. You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. The application will be voided without a timely written reply within the next thirty (30) days. Refunds are not issued for voided applications.

IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please contact me at 208-334-2190 if you need more information. Thank you for your attention to these matters.

Respectfully,

Patrick Kelly
Water Resource Agent, Sr.

Re: Water Right Application Incomplete - Returned

Dear Applicant:

The Western regional office received your application on August 11, 2016. The application was sent back to you on September 2, 2016 due to incomplete information. The Department received an amended application on September 8, 2016. Thank you for the corrections you have provided, however the map still does not clearly identify the point of diversion. Please provide an amended map that clearly shows the point of use as well as the point of diversion. Listed below are directions on how to create a map using our public website.

- **Section 14-** the map must clearly identify the proposed point of diversion and place of use. You must include an 8½" x 11" map that clearly identifies the proposed point of diversion, place of use, section #, township, and range. A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred or you may use the mapping tool found on our website at <http://maps.idwr.idaho.gov/map/>. To use the tool click on the "Change layers" button at the top of the screen, select the background drop down menu and add the 2011 NAIP background. Then click on the "Locate" button to find the location of the proposed project.

The original incomplete application is enclosed. Please make the necessary amendments to the original form and re-submit within the next thirty (30) days. If IDWR does not receive your written response within thirty (30) days, a refund will issued for this filing. This letter is an attempt to ensure that your application is complete in order to establish a priority date. You may receive future correspondence regarding more specific details of your application. IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please consult the IDWR website or contact this office at (208)334-2190 and ask for the "office day person" if you have any questions about the necessary information.

Sincerely,

Western Region Water Rights Staff

Re: Water Right Application Incomplete - Returned

Dear Applicant:

This office received your application on August 11, 2016. The application cannot be accepted into the records of the Idaho Department of Water Resources (IDWR) until the following items are addressed:

- **Section 5-** The second purposed use is not listed. Please provide the type and the period of use.
- **Section 9-** The application is missing quarter quarters. Locate all proposed uses listed in Section 4 by writing in the townships, ranges and sections. Identify the uses within each 40-acre tract with the appropriate symbols.
- **Section 11c-** Please provide the arrangement enabling the applicant to make this filing.
- **Section 13-** Period of Time to complete the project works and application of water to the proposed use was not provided correctly. Please complete section 13 with the number of years (1 to 5) that you require to complete the development of water for the proposed used.
- **Section 14-** the map must clearly identify the proposed point of diversion and place of use. You must include an 8½" x 11" map that clearly identifies the proposed point of diversion, place of use, section #, township, and range. A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred or you may use the mapping tool found on our website at <http://maps.idwr.idaho.gov/map/>. To use the tool click on the "Change layers" button at the top of the screen, select the background drop down menu and add the 2011 NAIP background. Then click on the "Locate" button to find the location of the proposed project.

The original incomplete application is enclosed. Please make the necessary amendments to the original form and re-submit within the next thirty (30) days. If IDWR does not receive your written response within thirty (30) days, a refund will issued for this filing. This letter is an attempt to ensure that your application is complete in order to establish a priority date. You may receive future correspondence regarding more specific details of your application. IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please consult the IDWR website or contact this office at (208)334-2190 and ask for the "office day person" if you have any questions about the necessary information.

Sincerely,
