Narrative of Proposal

This transfer is one of several transfers on behalf of Brett Williams to update the water rights relative to the properties that he irrigates and farms. The other transfers are relative to properties directly adjacent to those in this transfer and pertain to water rights deliverable from one or more of the same diversions. The properties are operated as one farm, even though the ownership does not reflect one owner. This transfer is an amendment to existing Transfer No. 80350 that was submitted in August 2015 to include additional changes.

Applicant (Williams) currently owns four water rights pertaining to a Place of Use in Custer County, Idaho. All four water rights share a Place of Use of 167 acres, in which the surface water rights and ground water rights are completely overlapping. This transfer proposes to accomplish two goals: update the irrigated acres to reflect current irrigation practices and change the ground water point of diversion.

This transfer proposes to rearrange the irrigated acres by formally transferring corners and other small acreages for use on other acres within the farm. There are no forfeiture concerns, since the water is already being used on these acres. The final Place of Use description includes 167 acres irrigable by the water rights. The total change in acreage is only 26.5 acres by legal description. Table 1 below identifies the change in acreage locations using the water right Place of Use description and the actual measured acres.

Table 1. Acreage Calculations

		SWSW	38	33	5.0
	Sec 19	NWNW	5	0	5.0
Total			167	167	26.5

The surface water rights are only being changed in part by the proposed 26.5 acres. No point of diversion change is proposed for the surface water rights. However, since the point of diversion for the ground water rights is proposed to be changed, the entire quantity of the ground water rights will be transferred to the new PODs. Table 2 shows the acreage changes for both the ground water and surface water rights and the quantities of each water right proposed to be changed in this transfer.

There are other water rights in the name of Leon Williams and Brett Williams that use the same surface water diversion. There are also other water rights in the name of Brett Williams that will share the same well locations. Companion transfers describe these other uses. No other water rights will overlap the same place of use.

- g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

- ☐ ☒ undergone a period of five or more consecutive years of non-use,
☐ ☒ currently leased to the Water Supply Bank,
