MEMORANDUM

Date: November 30, 2016
To: Transfer 81274 File
From: Benny Walker
Re: Evaluation of Sufficiency of Information Submitted

Transfer proposes to convert a 7 acre portion (0.16 cfs and 28 af) of 13 ground water irrigation rights located on a farm approximately 6.0 to 7.0 miles south and 0.5 miles east to 0.5 miles west of the City of Wendell to stockwater and commercial use at an existing dairy facility, located approximately 5.6 to 6.0 miles south of the center of the City of Wendell on the eastside of 1950 east. The diversion of the 0.16 cfs will be from two existing wells at the dairy site. The irrigation to stock water use conversion was based on an acre to volume conversion factor of 2.78 afa average per acre, based on the U of I irrigation requirements from Hagerman, Buhl and Jerome stations. This is predicated on a crop mix, alfalfa and corn, average consumptive use from 2008 to 2015 for the 7 acres being dried up. The wells involved with the transfer are located within the ESPA smooth model boundary area; a ground water model analysis was not required because the irrigation well is located within adjacent cell of the proposed existing dairy wells. These rights are within water measurement district 130, therefore watermaster comments will be requested.

- **Authority to File:**
Applicant is listed as current owner on IDWR records. The applicant submitted a letter from the lien holder giving their consent for the transfer.
- **Water Right Validity:**
The rights involved in this transfer were decreed in 2002. Review of recent aerial photography indicates that these rights appear to have been used in recent years. Therefore forfeiture does not appear to be an issue.
- **Injury to Other Water Rights:**
None anticipated.
- **Enlargement of Use:**
None anticipated. There will be a reduction in the maximum allowed diversion volume for the portion of the irrigation right being transferred to commercial and stockwater uses. A conversion factor of 2.78 af/acre was used for each acre being dried up rather than the allowable 4.0 af/acre for irrigation use.
- **Local Public Interest:**
No negative impacts anticipated. Application will be subject to public notice and protest.
- **Beneficial Use/Conservation of Water Resources:**
Proposed uses are recognized as a beneficial use of water
- **Effect on Economy of the Local Area:**
None anticipated.
- **Effect of the Agricultural Base of the Local Area:**
None anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

MEMORANDUM

TO: Transfer # 81274 File

FROM: Benny Walker

DATE: November 30, 2016

SUBJECT: Filing Fee

The filing fee of, \$450.00, for this transfer is based on the amount of water proposed to be transferred or changed, 0.16 cfs. The transfer fee schedule for a transfer involving 0.01-0.20 cfs indicates that the filing fee is \$200.00. The application also proposes a change in nature of use of the water rights. This requires an additional fee of \$250.00, for a total of \$450.00. The applicant submitted a fee of \$450.00 for this transfer. (Receipt S035694).

Dear Water Resource Agent,

Please find attached two Applications for Water Right Transfer prepared on behalf of South View Dairy. One transfer seeks to create a permissible place of use generally within the existing water right place of use while the second transfer seeks to change the nature of use and point of diversion for a portion of the irrigation water rights to provide additional stock and commercial consumptive water uses within the nearby dairy. These water rights have been split similarly in previous transfers #74874 and #74720 so it may be beneficial to combine the totals by priority to prevent increasing round-off errors and I would be glad to assist in that effort.

The estimate of crop consumptive use was evaluated over an eight year period (2008-2015) based on ET_{Idaho} 2012 estimated growing season precipitation deficit for reported crops interpolated between the Buhl, Hagerman and Jerome weather stations. Additional consideration was given to cover crops reported in the 2015 season. Refer to Attachment #8 for details.

The existing and proposed points of diversion lie within adjacent ESPA model cells as shown on Attachment #7a so no ESPA analysis was performed but can be provided if necessary.

If you have any questions or would find any GIS information shown in the attachments helpful with processing please call me at the number listed above at your convenience.

Thanks,

Jason C. Helms, P.E.
