Decreed Date: 1/31/2011

Applications' Explanation:

Nineteen ground water rights listed in Table 1 authorize irrigation use at the City's Twenty-Mile South (TMS) Farm. These rights can be divided into the following two groups:

- The senior group of rights were decreed in the Snake River Basin Adjudication in February and April 2009. Included in this group are water right 63-3013, 63-3014, 63-7005B, 63-7042B, 63-7047, 63-7053, 63-7055A, 63-7055C, 63-7055D, 63-7064A, 63-7064B, 63-7078B, 63-7755B, 63-8130B, 63-8435, 63-9243 and 63-9359. When combined, these water rights are limited to total diversion rate of 51.07 cfs, a total annual maximum diversion volume of 14,500.0 acre feet, and the irrigation of 3058 acres. The rights share twelve wells as points of diversion, and irrigation is allowed within a 3320-acre permissible place of use (ppu) as shown on the attachment 3.
- The junior group of water rights consists of two rights (63-12461 and 63-12470) that were licensed and then decreed in January 2011. The two rights are limited to the irrigation of a combined total of 595 acres in a single irrigation season, a total diversion rate of 9.80 cfs, and a total annual maximum diversion volume of 2317.6 acre feet. The two junior rights share the same 12 wells as the senior group of water rights, and have a 3776-acre permissible place of use which includes the 3320-acre ppu from the senior group of water rights. These two junior rights can be used anywhere within a 3776-acre area, but the senior water rights are restricted to a 3320-acre area. The rights were decreed in January 2011.

The total authorized irrigated area under all of the water rights is 3653 acres (3058 + 595 acres).

Recent Irrigation Water Right Utilization

Total irrigated area in 2015, estimated from Google Earth imagery, was approximately 3440 acres. Given that 3653 acres are authorized for irrigation, 213 of those acres were not utilized in 2015. All of the non-use appears to have occurred within the 3320-acre permissible place of use for the older water rights, as approximately 595 acres are currently irrigated within the acres authorized solely by the junior water rights 63-12461 and 63-12470 (i.e., not overlapped by the older water rights).

Future Irrigation Water Right Utilization

Within the next one or two years, the City plans to develop 63 new acres within their property ownership boundary, but outside their water right ppu boundary. For future irrigation flexibility, the accompanying ***Application for Transfer*** is being submitted proposing a modified ppu boundary for all the rights listed in Table 1 to reflect the City's property boundary. Within the next one or two years, the City plans to start irrigating 63 new acres that are located within the proposed ppu. Consequently, of the 213 acres currently not being irrigated, 150 acres are being submitted to the Water Supply Bank via this application for long term protection from forfeiture and 63 acres are being proposed for short term protection from forfeiture via an accompanying ***Application for Extension of Time to Avoid Forfeiture***. This will allow the City to easily withdraw the extension application once the 63 acres are to be developed.

Water Right 63-7755B

Since all the rights are limited to separate acres within the authorized ppu's, a portion of water right 63-7755B was chosen for the water bank lease application and extension application since it had enough authorized acres to account for all 213 currently not irrigated.

Hi Lori,

Just a quick clarification question regarding the City of Boise transfer application then it should be ready for advertising. Some of the water rights have other uses besides irrigation such as domestic and/or stockwater. Does the city want the POU's for all the uses on all the rights to be that same area or is the transfer just for irrigation?

Good morning Phill,

I called to discuss this with you, but thought an e-mail would suffice. The application was placed on hold until the transfer was completed. The application was submitted in 2015, and according to Multiple Programs Memo 2, if an application for lease to the Water Supply Bank is submitted before the end of the year and eventually approved it will be considered protected from forfeiture for that calendar year. I looked at the copy of the transfer application briefly and have found that their transfer is just to change their POU. If that is correct and they are not transferring any portion to a new owner, we will not require a new W9 nor a new Lessor designation form.

Hi Clay,

I am working on a transfer application submitted by the City of Boise (80626) and they indicated in the application that they have submitted an application to lease part of water right no. 63-7755B to the water supply bank to avoid forfeiture. Has their application been accepted, is it still being worked on? or is it on hold because of the transfer application? Do you want/need me to request the WSB attachment form that goes with transfer applications? I haven't worked on a transfer application that includes water rights in the WSB yet so let me know if you need anything from me.

MEMORANDUM

TO: Transfer No. 80626

FROM: Phill Hummer

DATE: 4/25/2016

RE: Evaluation of Application

This transfer proposes to change the place of use of 19 water rights held by the City of Boise so that each water right has the same permissible place of use. The 19 water rights share 12 wells as points of diversion.

The site is 15 kilometers southeast of Kuna, ID south of Poen RD between Cloverdale Rd and Cole Rd. The site is also known as Twenty-Mile South (TMS) Farm.

The contact person for the applicant is Lori Graves, water rights specialist for SPF Water Engineering.

Deviations from Transfer Policy Standards

Water rights no. 63-12461 and 63-12470 do not have shapes for the place of use. Shapes will be generated for these water rights during the transfer data entry process. The POD shape files will be moved from the center of the QQ to the locations shared by the rest of the water rights as the applicant has indicated that all the rights are diverted from the same 12 wells system. Additionally, water right no. 2-2268B is being used as a mitigation right so the beneficial use will be changed to "mitigation by non use" per transfer processing memorandum no. 27. These changes to water rights no. 63-12461, 63-12470 and 2-2268B will be made whether or not this transfer application is approved.

Condition x27 on water right no. 63-7042B should be reworded to clarify the intent of the condition. The use of water under the right on 150 of the 400 acres authorized should be considered junior to the other water rights involved in transfer no. 4901. This water right is not supplemental to any surface water rights.

Summary of Information Submitted

Authority to File:

The applicant (City of Boise) is also the owner of the 19 water rights listed on the application. The application is signed by John Tensen, an engineer for the City of Boise.

Water Right Validity:

All rights presumed to be valid. Water rights 63-3013, 63-3014, 63-7005B, 63-7042B, 63-7047, 63-7053, 63-7055A, 63-7055C, 63-7055D, 63-7064B, 63-7078B, 63-7064A and 63-7755B, were issued partial decrees on 2/6/2009. Water rights 63-8130B, 63-8435, 63-9243, and 63-9359 were issued partial decrees on 4/3/2009. Water rights 63-12461 and 63-12470 were issued partial decrees on 1/31/2011. Beneficial use has occurred at the place of use within the last five years except for 213 acres within the permissible place of use. The applicant has leased 150 acres of water right 63-7755B to the water supply bank for long term protection from forfeiture (starting

12/30/2015 and ending 12/31/2019). The remaining portion of water right 63-7755B is part of an extension of time to avoid forfeiture that was approved on 3/9/2016. The applicant plans to resume use on those 63 acres within the next two years.

Injury to Other Water Rights:

All rights involved in this transfer divert groundwater so they are not delivered in a rotation and have no affect on conveyance. Since the points of diversion and annual volume are not changing there are no anticipated changes to the water supply, water source or water quality. The rights are not within the boundaries of any groundwater management area or critical area. Water rights no. 63-12461 and 63-12470 are both conditioned to require water right no. 2-2268B be left undiverted for mitigation to offset depletion of the Snake River water. However, the acre limit for these two water rights is 595 acres while 2-2268B only provides 579 acres. All the rights were decreed this way and I was unable to find an evaluation of the mitigation plan in their files. The mitigation plan was acceptable at the time these water rights were licensed and mitigation is no longer required in that area, so is should still be an acceptable mitigation plan. Changing the permissible place of use for these rights will not result in any more water withdrawn from the aquifer on annual basis than was already occurring. For these reasons the changes proposed in this transfer application should not injure other water right users.

Enlargement of Use:

Changing the place of use will not create an enlargement of use since the source will remain the same and the total diversion rate and annual volume are restricted through combined use limit conditions.

Local Public Interest:

The application does not conflict with local public interest.

Beneficial Use/Conservation of Water Resources:

The application proposes beneficial use consistent with conservation of water resources in Idaho.

The application is consistent with criteria of I. C. § 42-222 and should be processed.

Discussion

Overlapping rights

All 19 water rights in this transfer application share the same 12 well system. Additionally, the City of Boise owns water rights no. 63-30138, 63-15489, 63-15491, 63-15492, and 63-18683 that authorize domestic and/or stockwater use. Of these it is likely water rights no. 63-15491 and 63-15492 are diverted from one of the well in the same system as the water right involved in this transfer. All of these rights overlap the place of use proposed by this transfer but authorize a different use than irrigation. Water right no. 63-3639 in the name of the BLM authorizes stockwater use on property owned by the City of Boise. I will send a letter recommending the city file a change of ownership form to claim this water right.

Mitigation

Water right no. 2-2268B is used to mitigate depletions of Boise River water. The mitigation plans was approved prior to this transfer.

Water Supply Bank

150 acres of water right no. 63-7755B is currently leased to the water supply bank. The lease was approved on 12/30/2015 and will continue until 12/31/2019. The lease was submitted along with an extension of time on 63 acres to provide protection from forfeiture. Water supply bank staff is aware of the lease and have confirmed transfer processing can continue without the WSB attachment form.

Data entry affected the correct record:

Water Right No.	Right ID	Water Right No.	Right ID
63-3013	621352	63-7078B	626251
63-3014	626240	63-7064A	626249
63-7005B	626244	63-7755B	626252
63-7042B	626245	63-8130B	626253
63-7047	626241	63-8435	626243
63-7053	626246	63-9243	626254
63-7055A	626242	63-9359	626255
63-7055C	626247	63-12461	635557
63-7055D	626248	63-12470	635563
63-7064B	626250		

The total acres for irrigation on the application were 4224. However, it is department policy to round acres to the nearest whole number when the number of acre is greater than 10. In the SWNE and SWNW of section 36, township 01N, range 01E the applicant describes the place of use using tenths of acres, 3.5 and 17.5 respectively. These numbers were rounded up to 4.0 and 18.0 increasing the total number of acres to 4225.0. Since this was done according to department policy an amended application is not necessary and therefore not requested.

If approved the following changes should be made to the conditions:

- Add an X35 to all 19 rights limited to: 60.87 cfs, 16,817.6 af and 3653 acres.
- Replace the old T19 with the current version that has the unified decree date.
- Replace 067 with 01M and add 01M to the rest of the rights. Current administration does not required reports for Bs63 M wells and there are no WMIS points associated with any of the wells.
- Revise X27 on right 63-7042B to clarify it is not supplemental to surface water. Instead 150 of the 400 acres authorized are junior to the other rights involved in transfer 4901.

Assuming protests are not filed and/or other information does not contradict the above analysis, the application can be approved as reflected by the draft approval.
