Subject: RE: Barinaga Water Right 63-32641

Mr. Barinaga,

Thank you for the email. I've corrected the location of the point of diversion to more closely match the actual location of the well based on your drawing. I did not update the location of the place of use because the area identified on the license represents the area our agent confirmed beneficial use during the development period. Note that you appear to have a portion of water right 63-8311 that provides irrigation for the areas of your property outside of the place of use depicted on the license for 63-32641. Further, the description on your water right license is the real measure of your water right; the map is for illustrative purposes only. This means that your water right confirms 1.1 acres of irrigation within the NENE tract, which 1.1 acres you choose to irrigate under this water right is up to you. Again, any irrigation beyond the 1.1 acres can be accomplished under your portion of 63-8311.

I hope this helps alleviate any concerns you may have had about the water right license.

Thank you again for letting us know of your concerns.

Nick Miller
Manager, IDWR Western Region.

Nick,
I don't know how important this is but the aerial photo depicting the area of the water right is wrong. Please see attached. I also more accurately recorded the location of the point of diversion (well).
Thanks,
John Barinaga
