

MEMORANDUM

Date: October 28, 2016
To: Transfer 81262
From: Chelsey Serrano
Re: Review & Evaluation of Sufficiency of Information

This transfer proposes to change the place of use for WR 35-2389. The applicant proposes to replace three existing pivots with five smaller pivots. The place of use will be rearranged, and the total volume pumped and acres irrigated will not change.

Authority to File: The applicant, Kortny L. Albertson, is the current owner of the water right and the property at the existing and proposed places of use.

Water Right Validity: Water right 35-2389 was decreed in December 2009. Aerial photography shows consistent irrigation and use of the water right. There are no apparent signs of forfeiture.

Injury to Other Water Rights: The POD will not change. The place of use is only being rearranged over the existing POU. In addition, this application does not require public notice, since there will be no hydrologic change.

Enlargement of Use: The proposed change will not result in enlargement as the volume, rate, and irrigated acres will not change.

Local Public Interest: No issues identified

Beneficial Use/Conservation of Water Resources: No issues identified

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
