MEMORANDUM

TO: Water Right File – 65-13369
FROM: Aaron Skinner – Water Resource Agent
DATE: November 3, 2016
SUBJECT: Field exam review

This water right permit was approved on July 20, 1992 for domestic use for 0.04 cfs. On August 30, 2016 an in-house field exam was completed by WRA Aaron Skinner. After completing the in-office exam, an old file was found at the Western Region office that included a field exam. The field exam was completed on 10/21/1993 by Steve Lester. This memo was written to dove-tail both exams for clarification purposes.

I reviewed the field exam that Steve completed and found the document was complete and a great supplement to the in-office exam. The field exam indicated external beneficial use only of the domestic permit. The system consists of one loose 2" black pipe that gravity feeds water to a 1" riser. A garden hose is then attached to the riser and used to water the lawn, flowers, and garden areas as shown in the enclosed pictures.

Correlation of the two exams is as follows:

Ownership: Permit no. 65-13369 is in the name of Thelma N Tucker and Bernard F Tucker. Valley County taxlot data shows the current owners of the legal description on the permit to be Gregory M Hampton and Catherine Hampton. The Hamptons have another WR license for the same legal description; license no. 65-23434.

Source, POU, POD: The source for permit no. 65-13369 is two-fold and was partially clarified in the field exam notes. Although the field exam didn't include both diversion points, a DRG overlay in ArcMap verified the sources to be as follows: The diversion in L3 NESE Section 12, Township 14N, Range 02E has a source of an unnamed stream, a tributary of Deer Creek. The diversion in L3 NWSW Section 7, township 14N, Range 03E has a source of Deer Creek, a tributary of the North Fork Payette River. Source updates have been completed in AdHoc. POD points were moved to better represent actual location using the DRG layer in ArcMap and field exam notes. The points were also updated in AdHoc. The POU is described as Lot 5, Block 6 of God's Acres Subdivision and was verified during the field exam and aerial imagery in ArcMap.

Diversion rate and Volume: At the time of the field exam water measurements could not be obtained as there was no way to open the valve to perform a 5-gallon bucket test. Enough noted evidence of irrigation outside the cabin allows the beneficial use to be recognized. As a result, exterior domestic use of 0.04 cfs and volume of 0.6 af is recommended for permit no. 65-13369.

Overlap Review: Overlap analysis suggests there is no overlap for the PODs. POU analysis indicates that WR no. 65-23434 does overlap. Condition X35 will be forwarded to licensing and have a combined use limit of 0.04 cfs or annual volume of 0.6 af for both WRs. Other overlaps were noted, but are acceptable because they are properties within the subdivision corridor.

Summary: The State will license WR no. 65-13369. It will have a combined use limit with WR no. 65-23434 of 0.04 cfs or an annual volume of 0.6 af. Permit no. 65-13369 will be licensed in the current permit holder's name and an Ownership Change form will be sent to the current property owner.

Condition 1 (004) is retained to licensing as there is a different property owner for the POD and POU.

Condition 2 (R05) will also stay in place. This condition was previously called R04 and was changed.

Condition 3 (POU location) is retained as the description is the only means of verifying the POU.

Taxlot data and the water permit reveal different ownership.

Condition 4 (X01) continues on to licensing because the water right is only for a single household domestic use right.

Condition 5 (X35) is referred to licensing as the total domestic use shall not exceed 0.04 cfs or a annual volume of 0.6 af for both WRs.

Narrative:

Permit no. 65-13369 authorized the diversion rate of 0.04 cfs from Deer Creek, a tributary of the North Fork Payette River, for a single household domestic use purpose. Based on the small permitted diversion rate and POU, this qualifies for an in-office field exam as stated under IDAPA 37.03.02.035.01r. The exam was completed on August 30, 2016 by WRA Aaron Skinner.

Legal descriptions identified on the permit were used to locate the property. Unfortunately, the names on the water right permit do not match the current taxlot data. Verification was confirmed through the POU description listed on the permit as Lot 5, Block 6, God's Acres Subdivision (Condition 3). Further investigation revealed an ownership notice of change for the POU was received on September 10, 2010 for a portion of WR no. 65-23434 and confirmed through a warranty deed signed November 11, 2003. This document was found in WR no. 65-23434's backfile for the current property owner, Gregory or Catherine Hampton.

The Pedigree search function was used to better understand the water right splits since 1992 (issuance of permit no. 65-13369). The initial subdivision water right number was 65-2836C for 54 homes. WR no. 65-2836C was split into two WRs; 65-23433 and 65-23434. The new subdivision WR no. 65-23433 subtracted 0.01 cfs and 0.6 af domestic BU from the original WR. It also only included 53 of the original 54 homes in the subdivision. WR no. 65-23434 established a single household domestic use right of 0.01 cfs and 0.6 af BU. WR records were updated to reflect these changes as the previous WR records did not correlate with the split WRs' diversion rates.

Lot 5, Block 6, God's Acres Subdivision is assigned to WR no. 65-23434 and permit no. 65-13369. Although the POU is the same for both WRs, the PODs are different systems. Both WRs pull from the same source through different pipe. Therefore, a combination use limit is recommended. The combined use limit is described as permit no. 65-13369 + license no. 65-23434 not to exceed 0.04 cfs and 0.6 af/y.

Aerial photography (GIS and Google Earth) was used to verify Deer Creek as the POD for permit no. 65-13369. Overlap review using IDWR software (Place of Use Comparison) showed overlap of POU and POD property (other than WR no. 65-23434). These overlaps are acceptable because they are properties within the subdivision corridor.

The State will license no. 65-13369 in current permit holder's name, but but send a copy to the new owner with an Ownership Change form.
